# London City bomb brings calls for terrorist action

By Andrew Jack, Richard Wate and Philip Stephens in London

THE UK GOVERNMENT faces calls to sharpen its anti-terrorist campaign after the massive frish Republican Army bomb in the City of London which left one man dead and caused damage provisionally estimated at more than £300m (\$462m).
As thousands of City workers

faced the prospect of being moved into temporary office space, the prime minister will come under pressure from mem-bers of Parliament for a much wider review of the government's efforts to halt the IRA's mainland bombing campaign.

However, senior ministers were cautioning last night against any "knee-jerk" response that would add to the propaganda value for the IRA of the latest attack.

The prime minister's office was seeking to avoid a formal statement to MPs on the bombing because of its longstanding view that government should not add to the publicity on which the IRA

thrives.
Mr Michael Cassidy, chairman of the Corporation of the City of London's policy committee, estimated that at least 20,000 people might need to be temporarily relocated from offices most affected. The Association of British

Insurers (ABI) said early esti-mates of the damage inflicted by the bombing, which have run as high as £1bn , may prove widely It said the damage was likely to be of the same order as last year's Baltic Exchange bombing,

which cost about £300m. Sir Francis McWilliams, the Lord Mayor of London, said the "Stock Exchange will be work-ing, Lloyd's [insurance market] will be working, the Baltic Exchange will be working, Liverpool Street station will be open

and London underground will be But a public call from Mr David Mellor, the former cabinet minister, for a review of security policy echoed the private view of many ministers and Conservative MPs that the counter-terrorist

effort needs to be sharpened. Mr John Major, the prime min-ister, plans to use a speech this morning to the annual meeting of the EBRD to underline his government's determination not to bow to terrorism. The prime minister will also stress that the gov-

Shattered interior of the Mitsubishi Bank building after the Irish Republican Army detonated a tonne of explosive in the heart of London

### Major under pressure from MPs as thousands of workers seek alternative sites for offices

to improve security against further attacks.

The government signalled last night that it was ready to pick up most of the bill for the devastation. Mr Norman Lamont, the chancellor of the exchequer, sought to underpin confidence in London's position by emphasis-ing that the government was "playing its part" by acting as reinsurer of last resort against terrorist attacks.

Mr Lamont, who is hosting the annual meeting of the European Bank for Reconstruction and Development, said: "I have every

nment will intensify its efforts tinue to locate here and work In the City, officials said here successfully. To do otherwise would be to succumb to ter-

> That message was echoed in private talks yesterday between Sir Francis and Mr Major, who indicated that the government would stick to its commitment to underwrite the insurance costs, even though legislation to set up such arrangements has not yet been passed by the House of Commons, the UK lower house.

> Mr Major has invited the Lord Mayor to another meeting this week in Downing Street to discuss further action to tighten

least two buildings would be demolished and another 20 would need important structural repairs. One man died and 44 were wounded in the explosion on Saturday, for which the IRA formally claimed responsibility on Sunday afternoon. The dead man was Mr Ed Henty, a News of

the World photographer.
An area around the site of the bomb outside the church of St Ethelburga the Virgin in Bishops-gate was still sealed off late yes-

terday as experts searched for evidence and engineers examined the safety of the buildings.

Police said warning calls came into newspapers between 9.20am cer at the scene yesterday admit-ted there was little the police could do about the suspect pick-up truck before the blast except clear the area. "All we could do was evacuate the area." he said.

The blast affected a wider area than the bombing at the Baltic Exchange in April last year.

# Spirit of the blitz returns to the City

By Richard Donkin and Peter John in London

THE SPIRIT of the blitz returned to the City of London yesterday as an army of contractors' lor-ries queued at first light down London Wall, waiting to help repair the damage caused by the latest terrorist attack,

"It was like the troops waiting to embark on D-Day," said a Guildhall official. Platoons of glaziers had started out for the City before first light.

By 7.00am, as key holders moved among the rubble and police cordons in the drizzle, about 200 contractors were waiting at the Guildhall. City landlords were on hand offering office space to those displaced by the blast. Two hours later the crowd had swelled to 600.

Inside the Lord Mayor was tell-ing the world that while the pictures told a story of devastation the spirit of London would beat the Irish Republican Army. Throughout the day he held the

At St Paul's Cathedral the Dean, the Rev Eric Evans, was moved to draw an historical metaphor: "This great city has faced plague, pestilence, fire and the blitz and it has won through. It will do so again and the IRA have no more hope of killing the spirit of London and its people than Hitler had."

Many of the victims were cared for at St Bartholomew's Hospital. Few could resist reflecting that if its history is abruptly ended by government closure the City may indeed lose a vital amenity which has served it through many wars.

In St Botolph's Churchyard spring blossom, blown from trees by the blast, mingled with shards of glass. Its leaded windows were bowed, and its heavy ors cracked, but the had survived.

St Botolph's was silent, but a few hundred yards away the bells rang out for morning ser-vice at St Michael Cornhill, one of the City's Wren Churches which suffered damage to some of its stained glass windows.

The Rev David Burton Evans, the rector, had guided his choir and congregation under the police tapes. The churchgoers,

# Yeltsin heads for qualified win in Russian referendum

By John Lloyd and Leyla Bouiton

EARLY indications from the Russian referendum last night suggested President Boris Yeltsin could achieve a qualified victory in his effort to win a mandate for sweeping constitutional and economic reform.

The results are certain to reactivate, in heightened form, the struggle between the president and the conservative-dominated parliament as each interprets the referendum differently. If the early results are confirmed, Mr Yeltsin will claim a mandate for change, while parliament will insist that his failure to win the majority of the 106m electorate has deprived him of authority for

radical action on any issue.

A Russian television exit poll of 2,400 people in 16 cities across the country showed Mr Yeltsin winning 75 per cent of the vote on the question of confidence in the president.

The first results, from the Koryak autonomous district, from the city of Magadan and from the town of Anadyr, all in the far east, showed about 70 per cent voting Da to the first question on trust in the president, the one which Mr Yeltsin had ideni-

tifed as the most important to cent by early evening - was him. However, there were lower recorded in the autonomous him. However, there were lower majorities supporting economic republic of Tatarstan. reform, the second question.

At the same time, high percent-ages voted for fresh elections to parliament – a vote which, under last week's decision of the constitutional court, requires a majority of the total electorate to be valid. In the Magadan results, 60 per cent of the electorate voted for elections, in the Koryak district 53 per cent and in Anadyr just under 50 per cent.

Relatively low votes were recorded supporting an early presidential election, a vote which also requires 50 per centplus of the total electorate and on which the president's supporters - though not Mr Yeltsin himself had advised a Nuel

The turnout was reported by local representatives of the president to be averaging 60 per cent or a little over - not high by Russian standards, but higher than feared by some of the president's aides, especially in good weather which tempted many to their country houses. By mid-afternoon it was clear that more than 50 per cent had voted - the qualifying mark for the referendum to be valid.

Voting stations appear to have

been provided across the vast Russian landmass, but there were complaints of violations from the president's side. The Public Headquarters for the Referendum, a pro-presidential organisation, alleged that voting stations had remained closed in the city of Chelyabinsk east of Moscow until noon rather than opening as ordered at 7am and that copies of the fiercely anti-Yeltsin Sovyetskaya Rossiya daily, with instructions to vote against the president, had been placed in some districts' polling

In the city of Tula to the south. international observers were denied access to the stations.

Mr Yeltsin, in an eve-of-poll address on television, stressed the importance of the poll when he said that the referendum was "our chance to peacefully and lawfully strengthen the state" and promised economic decrees aimed at cutting the flood of credits, laying the basis for pri-vate property and safeguarding Russia's interests.

### **NEWS: INTERNATIONAL**

# Muscovites back Yeltsin at the polls

By Edward Balls and Andrew

AT THE headquarters of the Writers Union station number

3 in Moscow's Krasnopresenski district – they were doing a brisk trade yesterday lunch-time. Of the 3,000 voters registered for the area, 500 had trooped in from the spring sunshine during the 5% hours since polls opened. An infor-mal survey suggests they were overwhelmingly voting Yes to

Pavel Kozhen, first voter of the day, anticipated the emergng trend in his answers to the main ballot questions: yes to Yeltsin, yes to his economic reforms, no to pre-term presidential elections, and yes to parliamentary elections - in the words of the campaign slo-

gan, da, da, niet, da. Nina Malachkova, an 83-year-old "veteran of labour" from Soviet days and an official poll observer, had been at station 3 since 6.30 am. Chivvying dawdling voters in slippers and housecoat, she had no doubt about how they should vote. "My whole family is united in support of Yeltsin and reform, and so is a majority of people in Moscow. Life is very hard, but most people know that without these reforms it would be worse.

Moscow is not typical, not least because its voters have been under a constant barrage of referendum propaganda. But street interviews yesterday revealed an interest in, and understanding of, the referendum that seemed to belie the image of the post-Soviet citizen

At Izmailovo market, a sprawling bazaar in the shadow of a sports stadium on the outskirts of Moscow, lunchtime buying and selling was keeping many from the polling booths. But all the traders sur-veyed had voted or intended to.

Volodya Rusin, 27. a caretaker during the week but a hawker of Soviet memorabilia at the weekend, was for Yelt-sin, although his support for the president was less than enthusiastic. "They used to call what I am doing specula-tion," he said. "If Yeltsin loses, communism will come back and we'll have to stop trading. If Yeltsin wins, at least things

won't get any worse."
Viktor Sensov, a journalist
and bookseller, had voted for Yeltsin but against his policies. "We are against the parliament, but we are concerned about Yeltsin," he said. "He is a man with courage but without policies.

Tatyana Sultanova, another bookseller, refused to endorse either the president or his parliamentary opponents but voted for new elections for both. "I am against all of them, because all they do is help themselves. I want young and clever people to enter politics." But for the young, Yeltsin

still seems to promise a better future. Slaking his thirst outside a cafe, Mikhail Borokov, 24, a worker in the Zil limousine plant, said: "Things will get better if Yeltsin wins, but it will take five to 10 years. Under communism young people couldn't breathe. But Yeltsin is giving everybody the chance to trade, to own land, to be free. Younger people believe in Yeltsin because they have time to wait."

'I voted yes to all the questions - that's what we're supposed to do, isn't it?'

ELENA Leskova, a 26-year-old teacher from the Russian town of Tula, south of Moscow, stood in the polling station at school number 45 yesterday and gave a

school interest as yesterday and gave a sheepish grin.

"Last week I thought I wouldn't vote. I'm fed up with politics," she said. "But today the weather isn't so good and we didn't go to our dacha, so in the end I voted for Yeltsin."

Judging from the scenes at the polling station in this industrial Russian city yesterday it appeared that Ms Leskova was not alone in her indecision. Although the turnout in the region had reached 50 per cent by mid-afternoon - the level needed nationally to render the first two questions on the referendum valid - there were signs of the apathy and uncertainty that surrounded the referendum, especially outside Moscow

"Compared to before, the turnout is not very good. But it's better than we expec-ted," said Ms Nadezhda Zabotina, head of the election committee at the Tulachermet factory, as she sat ticking off the voters on multi-coloured, hand-drawn charts. Like most polling stations the factory was playing music and selling cut-price snacks in an effort to attract the voters.

The expectation yesterday was that President Boris Yeltsin would receive a majority in this town, but not a large one. Although he received a warm welcome here on a visit during his presidential campaign two years ago, support among the regional council and local factory directors has evaporated, in part because the town's many arms factories have suf-

fered from cuts in defence spending.

Slightly over half the people questioned at polling stations yesterday said they had voted for Mr Yeltsin, some out of enthusiasm, others from habit. "I voted yes to all the questions - that's what we're sup posed to do, isn't it?" said an 81-year-old pensioner, as she shuffled out of the poll-

ing station, clutching a pot of milk.
Further along the street a group of young soldiers said they too had mostly voted for Mr Yeltsin. But about a quarter said they had voted against him, with many others refusing to answer. "I voted against him because he has betrayed his promises and it's so hard to live on our student grants," said Sergei, 22, a studen: at the local engineering institute.

Against a background of rumours of attempted vote rigging, every voting paper had been signed in duplicate by the election committees, and the ballot boxes

A Muscovite votes in front of a statue of Lenin, founder of the Soviet state

stamped with the old Soviet wax seal. Observers from the region's democratic movements and Russian Communist party were present at most stations.

Several US observers were also in attendance. But reflecting the political disputes now bubbling in the regions, the local election committee had refused to recognise them officially. "We don't want any foreign observers or journalists here. We have enough experience of running elections." said Mr Andrei Tuyarkin, chairman

of the regional election committee. However, the complexities of the vote, which required voters to deal with four separate pieces of paper, left many confused. "It's a very crude system," said Mrs Rufina Vitass. 65, who had arrived at a polling station with two other friends to vote for Mr Yeltsin. After receiving their ballot papers, they spread them out on a table and loudly argued over them for almost 10 minutes before agreeing on the

# Europeans look for US lead on Bosnia

EC FOREIGN ministers left open the possibility of using military force against the Bosnian Serbs at the end of their two-day meeting at Hindsgavl Castle in Denmark, but made it clear they will exert that tance and only under pressure

from the US. Mr Niels Helveg Petersen, the Danish foreign minister who chaired the talks, echoed majority sentiment when he told a news conference yesterday that he remained unconvinced about the value of milltary intervention. "I have great difficulty in seeing the really positive aspect and why it would go a long way to solve the problem [in Yugoslavia]."

But Mr Petersen, a member of Denmark's Radical Liberal party, which has a strong paci-fist streak, seemed unclear whether the tighter UN sanctions due to go into effect today would persuade the Bosnian Serbs to sign the Vance-Owen plan sponsored by the EC and UN.

After being reminded that Serbia-Montenegro - the rump republics of former Yugoslavia

By Peter Norman,

Economics Editor

- had already been threatened with expulsion from all international organisations without obvious effect, Mr Petersen issued a correction. On April 30, a meeting of the United Nations Industrial Development Organisation was due to take place; and he for one was not be allowed to attend.

Ministers insisted, but without great conviction, that the tighter sanctions approved by the UN a week ago would start to bite. They noted the raging inflation in Serbia, and the sharp fall in imports; and they pledged to enforce the sanc-tions more effectively - possi-bly through a "Super Co-ordin-ator" who could make the many international organisations such as the CSCE, West European Union, EC, and the United Nations work more efficiently. The most telling point, however, was that the EC/UN team had not had enough people to operate around the clock to block traffic on the Danube.

Tougher noises emanated from the French and British, who supply the bulk of the UN force in Bosnia. Mr Alain Juppe, the French foreign minister, said lifting the arms

embargo against the Bosnian Moslems or supplying large not acceptable; but France was ready to discuss tighter sanctions and possible selective air

Mr Douglas Hurd, UK foreign secretary, said air strikes needed to be consistent with international law, with due regard to UK troops and the overall UN humanitarian effort to supply besieged towns.

Despite their common reservations about military intervention, the French and British positions are blurred because London does not share Paris's desire for a new UN resolution. Partly, this reflects France's desire not to be marching to US orders; but it also suggests France believes there are political benefits in Russian support.

This week, Mr Warren Chris-topher, US secretary of state, or possibly Mr Reginald Bartholomew, the US special envoy, is expected in Europe for further consultations with the UK and France. He will discover an EC hesitant, divided and frustrated - and once again looking to the US for a lead.

Turn gunmen into taxmen – EBRI

# Britain set on closer EC ties

BRITAIN yesterday signalled that it intends to join its EC partners in closer European political and economic co-operation if Denmark rejects the Maastricht treaty in next month's referendum.

Mr Douglas Hurd, UK foreign there was no question of Britain joining Denmark outside the EC in the event of a second Danish "No".

Speaking in Denmark at the and of a two-day meeting of EC foreign ministers, Mr Hurd said if the Danes rejected Maastricht next month, the treaty would not proceed. But he added: "Of course, I am not saying we would not take part in further arrangements." Mr Hurd's position echoed

the UK government's recent enthusiastic pro-European line, which matches a growing confidence that the Tory Eurosceptics are on the run and that the treaty is likely to be ratified at Westminster by the end of the summer.

Mr Hurd made clear yesterday that he expected the Danes to support the treaty in the May 18 referendum - a view supported by recent opinion

argues for a low level of tax.

the Yes campaign.
At the Edinburgh summit

last December, France, Germany, Belgium and Spain all warned the UK and Denmark that failure to ratify Maastricht would prompt other countries to launch new treaty arrangements. Mr Hurd's explicit

ment to closer European co-operation contrasts with a much more guarded approach to future EC treaty arrangements last year, when the UK suggested that it might not take part in a future EC effort to recreate or expand on Maastricht in the event of a Danish or British rejection. Philip Stephens, Political Edi-

tor, adds: Mr John Major has made it clear that there could be no question of Britain pressing ahead with ratification of Maastricht if the Danes vote "no" on May 18.

But Mr Hurd's comments will nonetheless inflame the anger of the Tory Euro-sceptics. In the past the govern-ment has sought to limit the size of the Conservative rebellion against Maastricht by insisting that it would not allow the rest of the Community to leave Denmark behind.

### Call for model enterprises

By Charles Leadbeater

EASTERN European states should create model enterprises to serve as symbols of economic restructuring, a meeting of trade and industry ministers from eastern and stern Kuror Japan agreed yesterday.

The proposal to create enterprises as a model for capitalist restructuring came from Mr Yoshiro Mori, Japanese trade and industry minister.

The conference, the second of ministers from the Group of Seven industrialised countries and states of the former Soviet Union and eastern Europe, discussed measures needed to attract foreign investment to eastern Europe, promote privatisation, develop legal, financial and accountancy systems, encourage the growth of small businesses and help defence factories convert to civilian production.

The proposal for model enterprises will be studied by working groups over the next few months, before the third ministerial conference next year, to be held in Warsaw.

The plan is to draw up comprehensive restructuring plans from which other enterprises could learn. The plans would cover every aspect of the enterprise, from production methods and product mix to marketing, sales, finance and

foreign strategy,
Western officials said there
had been only limited progress ing. This reflects a lively debate within the bank over the merits and demerits of to create the conditions to sharp spending cuts in the forattract foreign direct invest-

By Robert Graham in Rome

ITALIAN President Oscar Luigi Scalfaro yesterday put strong pressure on the leaders of the main parties to co-operate in forming a new government as quickly as possible. After three days of consulta-

tions with all 16 parties represented in parliament, there was little sign that any of the leaders had shifted from entrenched positions. This was despite Mr Scalfaro's aim to have a new government agreed at the latest by today.

Mr Scalfaro alluded to widely contrasting views when he wound up his formal consultations yesterday. "The difficulties are there for all to see, and everyone must confront them with absolute clarity and calm," he said. It is the first time that an Italian president

in forming a new government. Mr Giuliano Amato, the Socialist prime minister, handed in the resignation of his four-party coalition last Thursday following the over-whelming referendum vote in favour of electoral reform. However, Mr Scalfaro has yet formally to accept the govern-

ment's resignation. In the search for a new prime minister, the Christian Democrats have refused to drop their objections to the candidature of Mr Giorgio Napolitano, the highly respected former communist who is leader of the Chamber of Deputies. Mr Napolitano has been proposed by the Party of the Democratic Left (PDS) to head a non-partisan "institutional" government.

The Christian Democrats say

they favour a government with a clear political base in parliament rather than relying on the prestige of a bipartisan fig-ure to secure a majority. Mr Mino Martinazzoli, the

هكنامن الأحبل

Christian Democrat leader, has also been unenthusiastic about the candidature of Mr Mario Segni, the referendum move-ment leader who is backed by the Lombard League and as an alternative by the PDS. Among possible compromise candidates yesterday were the

names of Mr Amato himself; Mr Leopoldo Elia, a Christian Democrat senator and former president of the constitutional court; Mr Romano Prodi, the distinguished economist and former chairman of Iri, the state holding company; and Mr Carlo Azeglio Ciampi, the veteran governor of the Bank of

# Stakes raised in Andreotti hearing

MR Giulio Andreotti has raised the stakes in his battle with magistrates seeking to remove his parliamentary immunity so that he can be questioned for allegedly consorting with the Mafia.

By accusing the Palermo magistrates

of conspiring to discredit him with cooked evidence from former Mafia 'supergrasses", the Italian life senator and former prime minister is no longer merely protecting his own reputation. He has placed the 23-member Senate commission hearing his case in an increasingly awkward position. The hearing, which began on April 14, has turned into an inquisition that

can now reach one of only two conclu-sions. Either his parliamentary col-leagues regard him as "economical with the truth" or they reject the evidence of the Palermo magistrates.

If Mr Andreotti loses his immunity,

parliament will be seen to have deserted Italy's best known politician and confirmed the links long suspected at the highest level between the Christian Democrat party and the Mafia. If the decision goes the other way the

public will be convinced that Mr And-

The evidence against Mr Andreotti

reotti is hiding behind the unacceptable device of parliamentary immunity, and his own party will be the chief loser. More important, any rebuff to the Pal-ermo judiciary will undermine the state

campaign against the Mafia. Mr Gian-carlo Caselli, the Palermo attorney-gen-eral, was brought in from Turin last year after the killings of the two lead-ing anti-Mafia magistrates, Mr Giovanni Falcone and Mr Paolo Borsellino, to

Tommaso Buscetta, Mr Francesco Man-ino Mannoia and Mr Baldassare Di Maggio. Both Mr Buscetta and Mr Mannoia are confessed senior members of Cosa Nostra living in the US under witness protection programmes. Their evidence has been central to prosecution cases in all the main Mafia trials of the past seven years: evidence accepted up to, and including, the appeal court. Mr Di Maggio has been co-operating with the

Any rebuff to the Palermo judiciary will undermine state's anti-Mafia campaign

deal decisively with the Sicilian Mafia,

Cosa Nostra.

He has put behind bars several top figures in Sicily's organised crime network, including Mr "Toto" Riina, the alleged "boss of bosses". The key has been the use of former Mafia figures who have agreed to give evidence under plea-bargaining programmes - the pentiti (supergrasses). Their evidence has led to the allegations against Mr And-

comes from three main sources - Mr Mr Andreotti is that he was for long the

Italian authorities for less than six months but his evidence as former chauffeur to Mr Riina led to the latter's capture after 23 years on the run.

All three are fundamental to Mr Riina's prosecution on charges including multiple murder. Thus if the allegations against Mr Andreotti are dismissed, doubts must be sown about prior evidence by these pentiti. The system of pentiti - the most effective means of prosecuting the Mafia - is at risk.

specific allegations range from his being party to the decision by the Sicil ian Mafia to the 1982 murder of General Carlo Alberto della Chiesa, the Palermo chief of police, to his links with Mr Salvatore Lima, the Euro-MP murdered last year by the Mafia and now acknowledged in a report by the parliamentary anti-Mafia commission to be associated with Cosa Nostra.

To these accusations last week came Mr Di Maggio's testimony of being present when Mr Andreotti met Mr Riina. Mr Lima and other Mafia leaders in Palermo in September 1988. Mr Andreotti has belittled the evidence as either hearsay or unreliable.

On Thursday his allies on the Senate commission (a majority who reflect faithfully the composition of the outgoing government coalition) secured a further delay of five days. The excuse was the need to know the names of individ-uals left blank by Palermo magistrates in the latest set of documents supplied this week. The names had been omitted to protect the secrecy of other anti-Mafia investigations in progress. But this delay has merely beightened the atmo-

giving his views about the European economy at the launch in Amsterdam of the Dutch bank's annual report, reckons plans for European monetary union are on track, even though he believes only a relatively small group of "core" EC nations may join the first phase of full currency union with one central bank.

The 57-year-old economist stands out in the somewhat

Wim Duisenberg: apostle of open government

staid central-banking community for his colourful and direct comments. He is probably one of the leading candidates for the future presidency of a pan-European central bank, assuming it is set up according to the Maastricht schedule towards the end of

Mr Duisenberg once described the Bundesbank as being "like whipped cream: the more you beat it the harder it

gets". Last week he ruffled feathers in London by criticising the UK government for not playing by the rules during its short-lived tenure in the Exchange Rate Mechanism.

An apostle of open govern-ment, who was called in by a Labour-led Dutch government in the 1970s for a five-year spell as finance minister, Mr Duisenberg has for some time invited 10,000 school or university students a year into the Dutch central bank to introduce them to high finance. He took over as bank governor 12 years ago and is looking forward to a third seven-year term.

As for Emu, he is playing his part by presiding over a mass of technical work by the EC's central banks, including the design for a pan-European banknote, in preparation for this event. Next month in Denmark he will present to EC finance ministers an account drawn by the governors' committee of what went wrong during the currency crisis between last September and

early this year.

He looks only slightly perturbed when asked to recall these events, which pushed the UK and Italy out of the ERM.

The central bank chief says the pound is welcome back into the ERM, even though if Britain wants to succeed in a future re-entry it would do well to follow the lead of Germany and Holland by making the Bank of England rather than government ministers respon-

sible for monetary policy. Mr Duisenberg gives the impression of being an Anglophile - he once wrote a thesis on the UK's balance of payments - and says he sympathises with Britain's predicament. Because of the large mortgage debts among householders and the preponderance of variable-rate rather than fixed-rate borrowing, decisions about short-term interest rates have much bigger political implications in Britain than in

most other European nations. Even so, an independent Bank would be a vital step in increasing financial markets' confidence. He believes that as a trading

nation Britain stands to gain by being part of a single-currency area, even with the inevitable loss of sovereignty and historical wrench. "The historical wrench. Netherlands once had an empire too," he quips.

# ferry link postponed

By Tom Burns

CENARGO, the UK marine group, has postponed the inau-guration of its ferry service linking the Moroccan port of Nador and Almeria in southeast Spain to allow time for an agreement between the Rabat and the Madrid governments over the new shipping link. Mr Michael Hendry, Cenargo's chairman, said yesterday the service, which was scheduled to start today in defiance of the Spanish authorities, would commence in 10 days time. He expected Morocco and Spain to amend next week an existing bilateral arrangement that shares out the ferry services between the two coun-

Cenargo claimed it was legally entitled to operate the ferry under the terms of the EC's single market deregulation of cabotage between Com-munity members and third nations. Spain however, insists changes must be introduced to their agreement with Morocco before the the EC's directive can be implemented.

# Peseta remains vulnerable to further attacks

By Tom Burns in Madrid

A BELIEF in the international money markets that Spain's foreign exchange reserves have been drastically depleted is likely to prompt fresh attacks on the peseta, now the weakest currency inside the European exchange rate mechanism. The reserves are understood

by traders to have fallen as low \$20bn, well down on the \$50.4bn recorded at the end of the 1992 and below the \$30bn level considered by the Finance Ministry to be the minimum amount needed to defend the peseta. In addition to forcing up

interbank rates the Bank of Spain is thought to have spent around \$10bn of its reserves in the past few days to avert a devaluation. Last Friday, the peseta dropped to an historic low in the ERM of Pta74.00 against the DM. Mr Carlos Solchaga, finance minister, pledged at the week-

and allies in the EMS...are convinced that exchange rate stability is good for the peseta and for the EMS and that the actual level (of the peseta) is realistic," Mr Solchaga said. But the Bank of Spain. which earlier this year inter-

the mechanism. "Our friends

vened when the peseta weakened to Pta72 against the D-Mark, now appears under pressure from the markets to accept a rate below the peseta's central parity. Analysts say the peseta could be pushed further down on its 6 per cent ERM band to Pta75-76 to the D-Mark, just off its Pta77 floor.

The attacks on the currency are being fuelled by Spain's recession and by predictions of political uncertainty after general elections on June 6. An opinion poll published yester-day by Barcelona's La Vanguardia newspaper put the centre right Partido Popular party marginally ahead of the ruling socialists but well short of gaining a governing majority.

### Warner Communications Inc. (successor to Lorimar Telepictures Corporation)

6% Convertible Senior Subordinated Debentures due August 18, 2001

On April 1, 1993, Time Warner Inc. ("Time Warner") redeemed (the "Series C Redemption") all outstanding shares of its Series C 87/% Convertible Exchangeable Preferred Stock, per value \$1.00 per share (the "Series C Preferred"), at a redemption price per share equal to \$50.00 principal amount of its 87/% Convertible Subordinated Debentures Due 2015 (the "84/% Debentures"). On Fabruary 5 and 12, 1993, Time Warner redeemed (the "Series D Redemption") all outstanding shares of its Series D 11% Convertible Exchangeable Preferred Stock, per value \$1.00 per share (the "Series D Preferred"), at a redemption price equal to \$53.85 per share (plus accrued but unpaid dividends to the relevant redemption date).

at a redemption price equal to \$53.85 per share (plus accrued but unpaid dividends to the relevant redemption date).

The 6% Convertible Senior Subordinated Debentures due August 18, 2001 (the "Debentures") of Warner Communications inc. ("WCI") were issued by Lorimar Telepictures Corporation, formerly a wholly-owned subsidiary of WCI (Lorimar"), under an Indenture dated as of August 18, 1986 between Lorimar and The Chase Manhattan Bank, N.A., as Trustee (the "Trustee"), as amended by the First Supplemental Indenture, dated as of January 11, 1989, between Lorimar and the Trustee and joined in by WCI (the "First Supplemental Indenture"), as further amended by the Second Supplemental Indenture 18, 2001, and as further amended by the Third Supplemental Indenture, dated as of June 25, 1992, between Lorimar and the Trustee and joined in by WCI and Time Warner (the "Second Supplemental Indenture"), and as further amended by the Third Supplemental Indenture, dated as of June 25, 1992, between Lorimar and the Trustee and joined in by WCI and Time Warner (the "Third Supplemental Indenture"). As a result of the merger of WCI with a wholly-owned subsidiary of Time Warner, each Debanture became conventible (after giving effect to the merger of Series D Preferred, 60, 0.5421044 of a share of Series C Preferred, 60, 0.5421044 of a share of Series D Preferred, 60, 0.5421044 of a share of Series D Preferred, 60, 0.5421044 of a share of Series D Preferred, 60, 0.5421044 of the Series D Redemptions, Inc. (the "BHC Class A Common"), pursuant to the terms of the Trustee entered into a Fourth Indenture. WCI assumed Lorimar's obligations with respect to the Debentures pursuant to the terms of the Trustee entered into a Fourth

In connection with the Series C Redemption and the Series O Redemption, WCI and the Trustee entered into a Fourth Supplemental Indenture, dated as of April 21, 1993 (the Indenture as theretofore amended, the "indenture"), joined in by Time Warner, which provides that the Debentures are convenible, as of April 1, 1993, into units of "Adjusted Conversion Consideration" at an effective conversion price of \$95.24 per unit, subject a digitarment in certain instances, as provided in the Indenture. Adjusted Conversion Consideration consists of a unit of the following: (I) \$35.94 principal amount of 8%% Debentures, (II) \$29,19 in cash and (III) 0.15166 of a share of BHC Class A Common.

This notice is given pursuant to Sections 105, 806 and 1205 of the Indenture. Dated this 26th day of April, 1993 at New York, New York.

# **Union leaders** urge E Germans to vote for strike

By Quentin Peel in Bonn

TRADE UNION leaders across Germany called on steel and engineering workers in the eastern states to vote for all-out strike action today to protect their pay deal for rapid wage equalisation with the

They warned that cancella-tion of the contract could undermine nationwide collective bargaining in west Germany as well as in the east.

The outcome of the strike ballot in the states of Saxony and Mecklenburg-Vorpommern over the next three days is in the balance, with a 75 per cent vote of all members needed to go ahead with the action. If they vote in favour, the giant IG Metall union is expec-

ern steel and engineering industries say that 100,000

ted to launch the strike from May 3, with a warning that it could last for months. Employers in the ailing east-

strike goes ahead.
They are refusing to pay from April 1, compared with a deal agreed two years ago to pay a 25 per cent increase on the wage rates existing then -equivalent to a 15.5 per cent

increase on current rates. Mr Franz Steinkühler, leader of IG Metall, told a rally of some 60,000 workers in Leipzig on Saturday that allowing the employers to abandon their pay deal in east Germany would threaten collective bargaining in the whole country. "We did not vote for reunifi-

cation [of Germany] just in order to allow the employers to turn east Germany into a cheap-wage colony," he said. However he left a hint of compromise: if the employers would cancel their legal move to abrogate the eastern pay deal, the union would immediately return to the negotiating table and discuss the timescale of wage equalisation, he said in workers out of some 320,000 an interview with the could lose their jobs if the Sonntag newspaper. an interview with the Bild am

# Export hopes ease industrial gloom

By Quentin Peel

THE GLOOM in west German industry eased marginally in March, thanks to hopes of higher export orders, although both production and order books continue to shrink.

That is the main conclusion of the monthly report on the German business mood pub-lished by the Munich-based Ifo institute.

In contrast, the more optimistic mood of those manufacturers still in business in east Germany has worsened, with both the current business situation, and the outlook for the next six months, seen to be growing less favourable.

The average level of order books in west German industry has dropped from 2.6 to 2.5 months' production since last isation has slipped from 80.5 participants.

to 78.5 per cent, the institute

Production plans for the coming three months in the west are being sharply reduced, but the expectation is for a continuing slowdown in price rises too.

In primary product industries, such as chemicals, paper and cellulose manufacturers, the decline in pessimism was also reported, although not directly related to exports.

Investment goods producers are more sanguine about export opportunities later in the year, although the overall mood remains extremely pessimistic. Orders remained at the same level as February.

As for consumer durables, there was a stabilisation in orders for electrical goods, but a continuing decline in car December, while capacity util- orders, according to survey

# UK warns US against Beijing bilateral trade accords

By Charles Leadbeater in Tokyo

THE BRITISH government yesterday warned the Clinton administration in the US that it would endanger the future of the free trade system if it were to press for bilateral agreements to guarantee shares of foreign markets in specific

Mr Neil Hamilton, UK trade minister, delivered the warning during a meeting in Tokyo with Mr Ron Brown, US commerce secretary. They were in Tokyo at a meeting of trade and industry ministers from eastern Europe and the Group of Seven leading industrialised countries to plan assistance for

industrial restructuring in finalise plans for a revised

eastern Europe. Mr Hamilton said he told Mr Brown the UK was opposed to "the balkanisation of trade by bilateral agreements". The minister added: "It is clearly unhelpful to the Gatt world trade talks if countries as powerful as the US and Japan go off and negotiate bilateral agreements. It sets a very bad precedent which might encourage others to follow suit."

The British concerns were raised by recent statements from the US administration that it will seek trade agree-ments with Japan which would deliver measurable progress in opening Japanese markets. The US and Japan are due to

framework for their trade relations in talks over the next

The US is widely expected to press for agreements to deliver a specific share of the Japanese market in key products such as

Mr Hamilton said: "Mr Brown was at pains to say that the US was not seeking Y per cent of X market - if that is the US policy, we are happy to support such a view."

He said US irritation with the closed character of parts of the Japanese market was understandable, but should not lead to responses which would set bad precedents for the

# Talks over Hong Kong will resume this week

By Tony Walker In Beijing

BRITAIN and China have agreed to resume talks this week on the vexed Hong Kong issue, having concluded a first round at the weekend.

Both sides are maintaining a virtual news black-out on any progress, with spokesmen noncommittal on details since the first round resumed on Thursday in Beijing. Britain's chief negotiator, Sir Robin McLaren. ambassador to China, said after negotiations had concluded on Saturday: "We're working hard and there's hard

The talks - over plans by Mr Chris Patten, Hong Kong governor, to broaden the scope for popular participation in elec-tions leading to China's takeover of Hong Kong in 1997 - could last for weeks or months.

Beijing has repeatedly denounced Mr Patten's plan, demanding his recall and referring to him in its official press as a prostitute and a petty thief. China claims that Mr Patten's plan for elections in 1995 runs counter to an agreement reached with London over arrangements for transition to Chinese rule. Beijing officials have charged Britain

and weeks." In Beijing, a Chinese official was quoted by the official New China news agency as saying that China hoped Britain

In Hong Kong, Mr Patten commented: "Both sides know there are very difficult issues we've got to resolve, but there has been a constructive oach. Both sides must be glad that the talks have started in such a sensible and balanced and businesslike way. I hope that we will be able to see progress over the next days

would "return to the correct

# to press for Gatt support

By Tony Walker in Beijing

CHINA will press European Community this week to support its entry to the General Agreement on Tariffs and Trade, arguing that orderly international trading would be better served

by its membership. Mrs Wu Yi, the new minister of China's powerful ministry of foreign trade and economic co-operation, will head the country's team in the 12th session of the China-EC joint commission on trade and economic co-operation.

The Sino-EC meeting assumes more than usual importance this year because of the Gatt issue, and because of continuing European misgivings over China's large trade surplus of \$13bn with EC member states.

Speaking on the eve of her

departure for Europe, Mrs Wu called on the EC to be more understanding of China as a developing country with low average per capita income. "We still need international understanding and support, including that from the EC," she told China Daily.

Beijing has been disap-pointed by the tough US attitude to its Gatt entry. The US is making the running on resolving details of Chinese access to the world trading body. One of Mrs Wu's aims will be to loosen EC support for the US position, which China believes is partly dictated by US domestic concerns.

The Aids memorial quilt stretches along the Mall in Washington, where up to a million marchers were expected to rally yesterday to demand equal rights for US homosexuals. President Bill Clinton sent a letter to be read to the crowd, but his decision not to attend angered

many gay rights activists, who claim that he has backed away from some of his electoral campaign promises to them. "I believe that, if a million saxophone players had come to Washington today, Bill would be here," said one

# IMF may seek to expand reserves

By Michael Prowse in Washington

MR MICHEL Camdessus, managing director of the International Monetary Fund, is expected to press finance ministers at this week's IMF/World Bank meeting in Washington to support moves to expand the foreign exchange reserves of former communist and developing countries.

The IMF believes world trade is being artificially restricted because at least 40 countries have severe shortages of

It is pressing for a new allo-cation of special drawing rights, an international reserve asset equivalent to a basket of

the leading currencies.

A senior IMF official said a new issue of SDR36bn. (£32.5bn), 10 per cent of the expected demand for reserves. resulting from increased global economic activity in 1992-1996,

was required. He said rich countries, which faced no shortage of reserves. should hand over a portion of any new SDR allocation to farmer communist and developing countries as loans or

The IMF would oversee this process and impose conditions: so that the reserves were used

responsibly.
The official said opposition by many finance ministers to a new SDR issue - in effect an increase in global liquidity -made no sense because inflationary pressures were at their lowest for 30 years. Ministers had agreed an increase in the 1980s when inflation was

The share of SDRs in total world reserves had fallen from about 5 per cent in the early 1980s to below 2 per cent.

# Funerals raise tension again

Patti Waldmeir on impatience with political talks in South Africa

OUTH Africa yesterday braced itself for another round of potential vio-lence at political funerals, after the death by natural causes of Mr Oliver Tambo, elder statesman of the African National Congress and patron of the liberation struggle. He had been in failing health

after a stroke in 1989 and was no longer active in ANC policymaking, but remained a potent symbol of resistance to apartheid. ANC officials said they believed his funeral would be as large as that for Mr Chris Hani, whose violent death two weeks ago provoked a major political crisis in South Africa. Within the next week to 10 days, South Africa will bury two political leaders - Mr Tambo (the date of whose funeral has yet to be announced) and Mr Andries Treurnicht of the right-wing Conservative party, who is to be buried tomorrow at a large-

scale ceremony in Pretoria. On Wednesday, a mass funeral will be held, at Sebokeng township near Johannesburg, for the 19 victims of a massacre on the eve of Mr Hani's funeral last week. A funeral will also take place for a TV reporter of the state-run South African Broadcasting Corporation, murdered in Sharpeville township at the

The funerals are likely to launch new tension, as multi-party negotiations resume today for a new consti-tution. Mr Nelson Mandela, ANC leader, speaking to mark Mr Tambo's death, stressed the impatience of young ANC members at the slowness of negotiations over a political settlement in South Africa. Time is not on our side. A date for elections must be set now," he said.

selves to push for agreement in the multi-party negotiations within six weeks, this to include an election date, the installation of a multi-party transitional executive council to advise the government before multi-racial elections,

an interim constitution until elections, and principles for a future constitution. This last would include multi-party power sharing until the end of

the century. However, while the basis for agreement exists between the two main parties to the talks, others in the 26-party forum vehemently oppose certain

Mr Tambo, though his health kept him away from the negotiations, is credited with helping to engineer a shift in ANC policy in 1989 - the movement opted to negotiate rather than fight for an end to apartheid. ANC and government negoti-ators have committed them-death on Saturday, Mr Mandela called him "my brother, my comrade, my friend and my colleague".

 Mr Charles Nqakula, a for-mer journalist, has been appointed general secretary of party to succeed Chris Hani.

# Clinton fails to join | Brazil launches plan in Barclays tax suit to stimulate growth

against the bilateral tax trea-

ties between the US and many

other nations. British MPs are

expected to argue for retalia-

tion, as permitted by a 1985 UK

law, during the second reading

of the finance bill in parlia-

and federal courts for more

than a decade. California's

state supreme court ruled

against Barclays last year and

the issue may be approaching

its final round in the US

ment today.

Supreme Court.

PRESIDENT Bill Clinton has broken with previous US government policy by deciding not to file a brief in support of Barclays Bank's suit against the California worldwide unitary tax law.

Past administrations have always argued with Barclays that California's efforts to tax companies on a percentage of rumbling through the state their worldwide profits, rather than on the profits they actually make within the state, interfered with the federal government's constitutional prethe South African communist rogative to "regulate comparty to succeed Chris Hani." merce with foreign nations".

### The UK government and 19 By Christina Lamb other industrialised countries in Rio de Janeiro have filed arguments against the California tax, which runs

BRAZIL is making yet another attempt to stabilise its battered economy with an emergency plan of spending cuts and acceleration of its privatisation programme. It aims - more controversially - to stimulate 3.5 per cent growth this year through a return to subsidies The Berclays case has been | and lowering interest rates.

This long-awaited first plan of the six-month-old government of President Itamar Franco was announced at a cabinet meeting on Saturday, broadcast live on television.

The plan, Brazil's sixth in

involve no shock measures such as freezing prices or bank

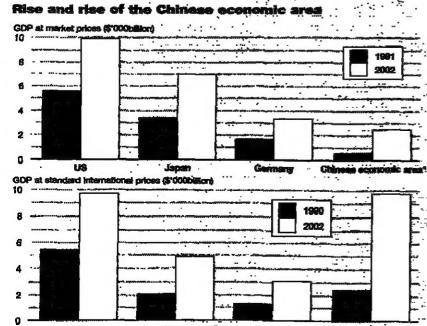

The plan concentrates more on spending than saving, and is unclear on how to reduce inflation, now 30 per cent a month. Mr Franco's address did not mention inflation as a priority, though finance ministry officials say they hope to reduce inflation to 17 per cent a month by December.

The plan will be presented to the International Monetary Fund this week by Mr Eliseu Resende, Brazil's third finance minister in the last six months. Analysts doubt that it will be sufficient to achieve a new IMF seven years, is the first to accord in the near future.

sessonally adjusted data used in all cases. Statistics for Germany apply only to western Germany. GDP/GNP is broken down into private consumption expenditure, investment (the sum of gross three capital formation and the change in stocics), general government final consumption, and net exports (exports of goods and services minus of growth rates are the percentage over the corresponding period in the previous year, and are positive unless otherwise stated. The figures in the fifth columns.

# China's potential emerging from behind the figures

CHINA is a large country with a big economy which is getting bigger by the year. But only now is it being understood quite how large and economically powerful China could become early in the next century - provided, that is, its development is not derailed by another of the bouts of inflation that have accompanied its impressive performance.

Chinese gross national product grew by an average 9 per cent a year over the last 13 years, far outstripping the growth rate of the population. The authorities may be about to put the brakes on to prevent over-heating, as at the end of the 1980s.

Growth rose last year to 12 per cent, but the year-on-year inflation rate also accelerated to 15.7 per cent in the first quarter of this year. But Chinese GNP in 1994 should still be four times larger than in 1978, when market-based economic reforms

began. Yet China's economic potential has been partly obscured from view by some strange World Bank statistics. According to the latest World Development Report. the dollar value of Chinese output per relative isolation.

person has been falling over the past

It has dropped from \$410 in 1976 to \$370 in 1990 - one-sixtieth of US GNP per head. With China's population estimated at 1.13bn in 1990, total measured GNP was \$410bn, smaller than that of Canada, which was \$542bn, and the UK, which was

The reason for this strange result is the 500 per cent fall in the value of the yuan against the dollar since 1979. This has cut deeply into the dollar value of Chinese GNP, measured at national prices. But Chinese GNP is understated at current exchange rates because of the low prices of services relative to those in developed countries at market exchange rates.

One measure of this distortion is the large size of the China's export sector relative to measured GNP. The value of Chinese exports has risen from \$13.7bn in 1979 to \$62bm in 1990, or 15 per cent of measured GNP. This implies that China's export/GNP ratio is twice that of the US, despite China's huge geographic size and

World Bank officials have never denied that these statistics are misleading. In the latest issue of Global Economic Prospects for developing countries, they have provided an alternative, more realistic measure of the potential economic size of the Chinese economic area - which includes Hong Kong, Singapore and Talwan, as well as China – at the beginning of the next millentium

The bank believes that China can maintain economic growth rates in excess of 7 per cent over the coming decade. Using its baseline forecasts, it estimates that CEA national output, measured at market prices, will be larger than that of the UK, Italy and France by 2002, although still only a quarter of US GNP.

The picture changes dramatically if GNP is measured instead by standard interna-

tional prices for both traded and nontraded goods and services. On this basis, CEA output is already larger than that of both Germany and Japan.

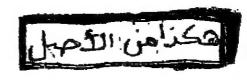

By 2002, the bank estimates that CEA's GNP will have risen to \$9,800bn, marginally larger than that of the US.

Even then, GNP per head in the CEA would be lower - \$7,300 compared to \$36,100 in the US. \$37,900 in Japan and \$39,100 in Germany - but the gap would be much narrower than when measured at current exchange rates.

These alternative calculations also mislead. As a measure of economic welfare or quality of life, they make sense: people in China need haircuts as much as those in the US, even if they cost far less in Beijing than in New York. But China can only convert the value of these haircuts into international goods at current exchange rates, which give little international pur-

chasing power to those who provide them. As the Chinese economy develops, the domestic price of these non-traded goods will gradually rise relative to the internationally determined prices of traded goods. But for now, GNP measured at standardised prices, while useful for some purposes, overstates China's presence on the world economic stage.

# ● Aftermath likely to be worse than 1992 bomb ● Damage assessment may take several weeks ● Repairers tout for business Unease over security as frustrations build up

By Richard Waters

ASSURANCES that business would continue as usual were again much in evidence as mopping up began yesterday after the second one-tonne bomb in little over a year.

But this time the questions being asked were more pointed, the unease among financial institutions more pronounced.

Sir William Purves, chairman of HSBC Holding, which owns Midland Bank as well as the Hongkong and Shanghai Banking Corporation, summed up the sense of frustration. "I am absolutely sure that the authorities are doing the best they can. It is very difficult. I'm sure, to track down these people. But it does seem quite extraordinary that that quantity of explosives can be put in a truck and brought into the City."

The shock from this second

bomb could have a bigger impact in the long term than the first. Sir William said: "At a time when there is a fair amount of competition for a future central bank of Europe, this must work against the

case for it being in London."

The attack is likely to have little effect on where institutions such as National Westminster Bank and HSBC Holding - two of those worst hit -choose to do business. NatWest

operates at the heart of the UK financial establishment, while HSBC only moved its head office from Hong Kong to London at the start of this year. Through subsidiaries such as James Capel and Midland Bank, as well as through the London branch of the Hongkong Bank, it has one of the biggest presences of any finan-cial institution in London.

The Corporation of London, the City's local authority, lists HSBC and NatWest - alongside BP, the oil giant - as among its biggest rate-payers. shouldering a large part of the Corporation's annual £700m budget. Large institutions such as these had already pressed after last year's bomb for a greater police presence to pro-tect the City from terrorist attack and are likely to become more vociferous still this time

The devastation could have more of an effect on institu-tions whose presence in London is smaller. The number of foreign banks in London has remained more or less constant at around 500, but many have already cut operations sharply in the face of unprofitable banking markets in recent years. Events such as the Bishopsgate bomb may give some the excuse they need to pack up altogether, though this would have little impact on the

The City establishment was yesterday dismissing the thought that London's competitive position was about to be undermined. Lord Alexander, chairman of National Westminster Bank, said: "At first glance, this is obviously bad for the City. But it does provide the opportunity to empha-sise that it is business as usual the next morning, which is, after all, what the City stands for. I'm confident that, whatever the pressures, the City remains competitive."

Sir Andrew Hugh Smith,

chairman of the Stock Exchange - itself the target of terrorist bombs in the past added: "It's perilously easy to get overwhelmed by the drama of events like this. Other centres have their problems -though perhaps they haven't had two big bombs like us." He pointed to the terrorist bomb this year at New York's world trade centre and to the assassination in the past two decades of the heads of two of Germany's biggest banks -Alfred Herrhausen of Deutsche Bank and Jurgen Ponto of

The Bank of England also waded in to the debate in defence of London's financial centre, which recorded £16.9bn of overseas earnings in 1991. The experience of last time

### Recent bomb attacks at financial centres

30/11/89: Alfred Herrhausen, chief executive of Deutsche Bank, talled in car by remote-control bomb at Bad Homburg, outside Frankfurt. Red Army Faction claim responsibility.

10/4/92: IRA bomb explodes in St Mary Axe, London, the day after the general election. Ten buildings severely damaged, including Baltic Exchange, Commercial Union building, Chamber of Shipping. Three people killed, 91 injured. Estimated \$350m cost includes \$250m of damage to property, the remainder being business

26/2/93: World Trade Centre, New York: six killed with more than 1,000 injured. Arrested suspects have links with the blind cleric Sheikh Omar Abdul-Rahman and his New Jersey Mosque. Estimates of insured claims run to \$1bn, with Lloyd's of London saying

12/3/93: Bombay Stock Exchange among the worst-hit targets as 13 bombs explode across the Indian city, killing 250 people and wounding more than 1,400. Part of radical Islamic upsurge in wake of Ayodhya trouble. Actual perpetrators said to be from Indian underworld, with Pakistan links. 44 arrests by April 2.

doesn't suggest that this will affect the City's ability to do business internationally or to attract business from overseas," the Bank said.

It conceded, though, that as far as London's competitive position was concerned, "obviously it doesn't help".

an acceptance that the City would remain vulnerable to

terrorist attack and that the cost of insuring against dam-age to property or the loss of earnings that results from bomb attack is likely to rise further. Last year's bomb had already led to a doubling of the cost of insuring large commer-cial buildings in the City,

The proof that Europe's lead-

ing financial centre is vulnerable to terrorist attack, despite extra security arrangements introduced after last year's bomb outside the Baltic Exchange, has not come at a good time for the City estab-

Last month's move by the Stock Exchange to scrap its planned Taurus automated settlement system, at an estimated cost of £400m, was a big reversal for the credibility of London's securities markets though the computer disaster had little effect on the operations of the markets.

Foreign financial institutions often complain of London's poor transport system or its heavy burden of regulation on the wholesale investment markets - though recent steps have reduced the second of these complaints. The threat of bombing, and the probable rise in the cost of insuring against it, could become the latest on

the list of moans. The City's future security arrangements were already the subject of discussion yesterday. "There's no financial centre that is free from all risk. and we can't expect to be either," the Bank of England said. However, the Corporation, whose £700m annual budget supports an 800-strong police force, among other ser-vices, was working on plans vesterday to make the chance

of a third bomb more remote. "This has got to have some impact on security arrange-ments," said Sir Andrew Hugh Smith. "There will have to be some further tightening up."

The Corporation has been trying to discourage private cars from entering the City area, in part by turning sidestreets into pedestrian areas. This process will be acceler-

head of policy, allowing the police to put more effort into checking commercial vehicles going into the Square Mile. There was an acceptance at the Corporation and elsewhere, though, that the City could not be protected from all risks of

The bomb is also likely to have a direct financial impact. in the process adding to the cost of operating in the City and making it a less attractive centre from which to operate Insurance costs have risen as a result of last year's bomb, asinsurance companies have moved to exclude terrorist damage as an insurable risk and a government-backed reinsurance arrangement has been

According to most estimates of the cost of last weekend's damage, the private-sector contribution to this insurance fund for the current year has been more than exhausted, leaving it to the British taxpayer to foot part of the bill and the full cost of any further damage to large commercial buildings on the UK mainland from further terrorist attack over the coming year. Given this, it was thought highly probable yesterday that insurance premiums to cover the risk of terrorism will rise sharply in future

# Estimated losses

Saturday's bomb attack are likely to exceed £300m, according to the Association of British fasurers, the industry

The ABI said the losses would be of the same magnitude as last year's City bombs. The pattern of payouts could also be repeated, it added. Two thirds of claims were for material damage - to property, fixtures and fittings - with roughly one third of payouts compensating lost profit and rental income

Mr Nick Balcombe, a loss assessor, said he expected losses to be more extensive and could exceed £1bn. "Many come down. The Hongkong bank has had its guts ripped out. I don't think Bishopsgate will be open for some time."

Describing these and other

Dresdner - as proof that other financial centres faced similar

# Damaged buildings may be destroyed

By Andrew Taylor and

AT LEAST one office building and a parade of shops will need to be demolished in the wake of Saturday's biast, construc-

tion experts said yesterday. St Ethelburga's, one of London's oldest churches, was also destroyed in the blast. Two other offices, the headquarters of the Hongkong and Shanghai Banking Corporation and a building belonging to the National Bank of Abu Dhabi. were also severely damaged.

A decision on their future will not be taken until a full structural assessment can be made. The initial reaction of experts was that more windows had been destroyed than in the explosion which last year badly damaged London's Baltic Exchange, but that structural damage was less.

The streets around Bishopsgate are broader than those around the Baltic Exchange, which allowed the effects of the blast to spread.

Among the first engineers to be called out was the dangerous structures team run by Costain, the UK contractor, The unit is under contract to a

Its first job yesterday was to

detailed searches for cines. Mr John Milcock, the team's foreman, said: "It could be sev-

"First impressions are that have suffered structural damage. In addition there are vast quantities of broken glass.

Mr Peter Bennett, deputy city surveyor for the City of London said: "Most of the damage to Hongkong and Shanghai bank was blast damage rather than structural. All the internal walls have been blown

through."

The National Bank of Abu Dhabi at 90 Bishopgate, next door to Kansallis House, was also severely damaged and might have to pulled down, Mr Bennett said.

demolished.

INSURED losses caused by trade association.

estimates as "likely to prove wildly inaccurate," the ABI said most businesses affected are likely to have "carefully worked out contingency plans which should minimise disruption and keep down business interruption claims."

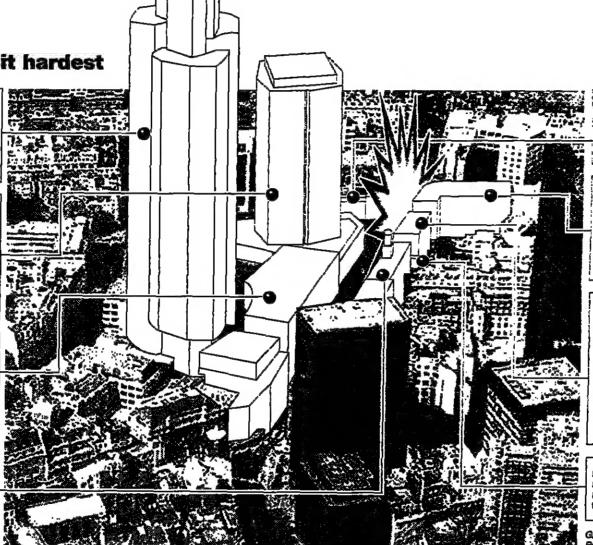

tower is minor. The complex at street level has been blown through, although the damage is mostly superficial. Work is in progress to replace an estimated 3,000–4,000 sq metres of gless, and fittings.

No. 99 Bishopsgate
Main occupier is Hongkong and Shanghai
Banking Corporation, but many floors are
sublet to other tanants. The office block
sustained serious damage. The blast blew
through all the walls leaving just an outer shell.
Damage was also sustained by some of the
supporting pillars. Engineers are attempting to
make the building safe but are being hampered
by falling glass. No decision has yet been
taken on whether to demolish the building.

Palmerston House No. 55 Bishopsgate. Sole occupier is Long Term Credit Bank of Japan. Serious blast damage has been sustained, but the structure remains intact. The fascia has been largely destroyed, along with internal fixtures and fittings Engineers are engaged in further safety checks before repair work can start.

Nos. 38-68 Bishonson Other offices and shops. Despite heavy outer times and snops, bespire neavy superficial damage, the structures of the next few hundred yards of buildings ramain sound. Glass and fittings have been blown out and some internal walls have collapsed. Repair work is being hampered by hazardous

Nos. 20-26 Wormwood Street The Victorian parade of small retailing units bere the side impact of the blast, which rapped out frontages and inflicted senous damage. Demoition is considered likely.

No. 90 Bishopsgate Sole occupier is the National Bank of Abu Chabi. The building bore some of the brunt of the blast, sustaining structural damage. All the ntenor walls have been blown through. Demolition is under consideration. Engineers are being hampered by the poor state of the neibouring building.

Nos. 76-86 Bishopsgate. Partly sublet. The building took the full impact of the explosion. No internal walls or tittings have survived. The exterior has been extensively destroyed and reinforced concrete supporting pillars are dangerously exposed. A buckled wall is said to be supporting the entire structure. bomb crater is making building work

St Ethelburga Church Smallest and one of the oldest churches in the City, it is now "a pile of rubble", according

### Hongkong Bank Shattered NatWest tower unfit for use bombed again Baltic Exchange bombing. The bank expects to be able to

By John Gapper in London and Simon Holberton in Hong Kong

MORE THAN 300 of Hong Kong and Shanghai Banking Corporation's 600 staff in London are expected to be at work today in different buildings. after the bank yesterday hastily re-allocated most of the work carried out at its Bishopsgate branch.

iary of HSBC Holdings, said the most severe disruption would be through the loss of paper files. Papers such as letters of credit dating back three months were scattered and destroyed in the blast. The bank was yesterday

Hongkong Bank, a subsid-

allowed to send managers into its office to retrieve computer data. It will today start re-running the data from a processing centre in Sheffield owned by Midland Bank, another HSBC Holdings subsidiary.

The bank said most of its offices inside the Bishopsgate building transferred their paper files to microfilm after three months, but customers with more recent dealings could suffer disruption.

The bank had to spend 9500,000, largely replacing windows, to repair damage to the same building caused by the IRA bomb that blew up the Baltic exchange a year ago. However, the damage this time

was far more severe. Sir William Purves, HSBC Group chairman, said the Hongkong Bank branch in Bishopsgate which concen-

trates on trade finance and cor-

porate banking was "a rela-

tively small branch" but was still the main one for the bank

in Britain. In Hong Kong, Sir William said: "It is fair to say that the computer is out and that the building is in a bad state. The water pipes were broken and water is flowing through the building and it has no power. Hongkong Bank occupied eight of the 26 floors in the

tower, which was opened 18 years ago. It had just moved its treasury operations to an office on Lower Thames Street in which its trading operations are merged with Midland. Hongkong Bank said that the

main banking and trade finance operations of the bank would be relocated to spare office space at HSBC Holdings' head office in Lower Thames Street, and an adjacent Midland Bank data processing

Its corporate finance and property services functions would be moved to an office in Devonshire Square where it currently carries out asset management functions and the fund management side of its James Capel subsidiary.

The bank's vaults on the lower ground floor are thought to have remained intact, in spite of the collapse of some lower level floors. They hold all valuable documents such as securities.

Hongkong Bank said it would have no clear idea of the damage to the building and whether it could be salvaged until it was allowed back in by the authorities, which it expected could be "a matter of weeks rather than days".

By John Gapper, Banking Correspondent

THE 600ft National Westminster tower, one of the City's landmarks, is likely to remain empty for some time. Up to a third of the 12,000 square metres of glass in its windows was shattered in the

bomb blast. The bank yesterday started allocating the 1,300 staff who work in the tower to desks at

CITY businesses could face big rises in insurance costs following Saturday's bomb attack, even though the government is expected to meet a large part of the bill

Increases are almost inevitable because the cost of the damage is likely to exceed £300m, exhausting available insurance funds of Pool Re, the specialist reinsurer set up by UK insurance companies earlier this year to cover terror-ism risk.

Insurers will provide some reinsurance for Pool Re, with the government guaranteeing all other claims.

"Unquestionably it looks like higher rates," said Mr Alan Fleming, executive director of the Association of Insurance and Risk Managers in Industry and Commerce (Airmic), which represents more than 300 insurance buyers.

Mr Tony Baker, public

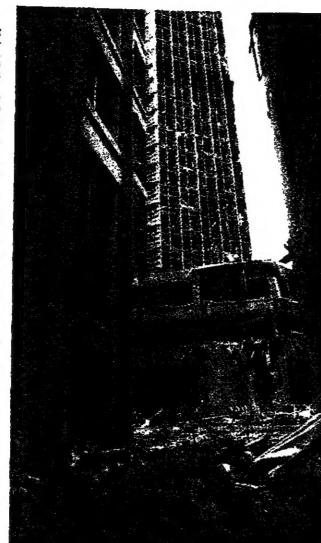

affairs manager for the Associ-ation of British Insurers (ABI), also suggested increases were likely, with City businesses bearing most of the burden.

Mr Fleming suggested it might become necessary to make the purchase of terrorism insurance compulsory, pos-sibly through the imposition of a standard levy on all commercial insurance policies.

He said: "The danger is that we will price some people out of the market. It has to be paid for one way or another. The only solution is to broaden it."

It also emerged that a number of insurance companies could be badly hit by claims on policies sold before terrorism was excluded from covers. Royal Insurance said yesterday that it had paid "several million" pounds to reinsure these exposures with Pool Re. But it is understood some other companies are unprotected.

Business has had to pay more to protect itself from terrorist attack since insurers withdrew cover from standard commercial insurance policies last year after sustaining losses of more than £300m from last April's bomb attack in the

The tattered remains of the Hongkong and Shanghai Bank towe

Additional premiums for terrorist cover are collected by insurers and fed into Pool Re. Pool Re meets all claims until its funds - relying on total premiums of between £250m to

£300m each year - are used up.
Insurers then contribute an additional tranche of cover equal to 10 per cent of premi-ums collected by Pool Re. Beyond this level the government meets all claims, acting as a reinsurer of last

government would stand by these commitments even though Pool Re has still not been authorised. Funds paid to it are being held by insurers in specially earmarked

Even under present arrangements cover is expensive, es cially for companies in highrisk areas. The owners of a central London office block worth £100m in central London might expect to pay £50,000 for terrorism insurance, according

office space have been badly

By comparison, the St Mary Axe bomb led to 300,000 sq ft of additional property being let after two buildings bore the brunt of the attack, according to the property surveyors,

Jones Lang Wootton.

Mr George Grillon, chairman of the Royal Institute of Chartered Surveyors, said yesterday that it was far too early to say how much of the damaged space would be back in service after easy and quick re-glazing efforts by the thousands of glaziers already swarming through the City.

would come against a backdrop of chronic oversupply.
Within the boundaries of the

City of London there are about 3.5m sq ft of new and unoccupied office premises ready for use and about the same quantity available within older

Extending the survey area marginally to include a broader definition of the City taking in post codes EC1 to EC4 - there are 5m sq ft of new office space and another 7.5m

should the property market show any sign of firming.

Other considerations suggest the damage to the City's repu-tation might have a more enduring impact than the increase in demand.

The larger affected comnanies - such as NatWest and HSBC - have contingency arrangements that mainly involve squeezing into space they already occupy elsewhere in London. Also, lessors have an obligation to return to their original buildings once they are repaired, so any increase in demand would be temporary.

# **Dunkirk** spirit rises at EBRD Peter Norman, at a

A BRIEF flickering of lights on the fifth floor of the European Bank for Reconstruction and Development gave the first hint of an explosion.

A moment later, at about 10.25 on Saturday morning, the 12-storey steel and concrete structure lifted and trembled as the blast, a few hundred yards to the south along Bishopsgate, rolled and roared around Liverpool Street station and the Broadgate office com-plex for what seemed several seconds.

While the EBRD has achieved notoriety for the un-British opulence of its headquarters, it reacted on Saturday with a very British stiff upper lip, business-as-usual approach to the IRA

While most of the City was enjoying a day off, the bank was almost as busy as on a normal day. About 1,000 busi-nessmen, bankers, journalists and officials were in the EBRD beadquarters for a day of seminars and round-table discussions ahead of the formal opening today of the bank's annual

meeting.
In the fifth floor room where I was, Mr Mario Sarcinelli, the vice-president responsible for development banking, gamely continued a press briefing on fiscal problems in eastern

NEWS: UK

Government aims to revive manufacturing base

# Heseltine to unveil export led strategy

By Michael Cassell, **Business Correspondent** 

MR MICHAEL Heseltine, trade and industry secretary, will tomorrow unveil to MPs plans for putting his department at the forefront of government efforts to help a long-term. export-led recovery in Britain.

Mr Heseltine will spell out a series of initiatives and structural changes within the department of trade and industry (DTI) intended to help revive Britain's manufacturing base and to boost its share of world trade when he addresses the House of Commons trade and industry select committee

His appearance will follow last week's remarks by Mr John Major, the prime minis-ter, who laid new emphasis on improving UK competitiveness. He said he regarded the manufacturing sector as "the soldier in the front line" of the struggle to win busine

Mr Heseltine, whose reforms in the DTI were sidetracked by his six-month battle over pit closures, will set out the parameters of his proposed. partnership with industry. Last week, Mr Heseltine dis-

closed his plans to the leaders of business organisations and to the Financial Times. His blueprint for restoring manufacturing to the heart of economic strategy was welcomed by business leaders although they expressed doubts about his ability to deliver.

Mr Howard Davies, director general of the Confederation of British Industry, said Mr. Heseltine and the DTI were "clearly moving in the right direction, albeit rather slowly." Mr Peter Morgan, director-

general of the Institute of Directors, welcomed Mr Heseltine's efforts to create a "department for the market" but stressed that said some of the preconditions spelled out for long-term economic strength were well outside the minister's remit.

"What he is trying to do is useful but, although he sees the total picture, he can only influence part of it. We will have to see how successful he

Heseltine: seeking a trade "catalyst for national, self-interest"

is in getting other departments which is enlisting growing to join in."

Mr Heseltine is calling for a new dialogue with all sectors of British industry and all sizes of business, enlisting their help to draw up a national, strategic appreach to winning a greater share of world markets.

The trade and industry secretary is emphasising that government's role will be strictly limited. But he wants the DTL

secondees, to act as "a catalyst for national, self-interest".

He said he wanted to rebuild the DTI's reputation as a department whose knowledge and opinions would be valued by industry. He intended to extend more help to small businesses and to step up the battle to lift unnecessary burdens from the corporate sector.

### Balance of trade holds key to UK recovery

PROOF that the DTI's new competitiveness strategy is working will lie in a lasting improvement in Britain's unhealthy balance of trade. writes Michael Cassell.

Boosting exports lies at the centre of any strategy to achieve long-term economic

recovery. The department's responsibilities in encouraging exports - Britain already sells over-seas 25 per cent of what it produces - is being given high

There have been a spate of recent initiatives aimed at assisting an export-led revival, including a boost to export insurance cover, lower insurance premiums, DTI-led export campaigns and the reorganisation of the department's Overseas Projects Board, whose remit it is to support the fight

for big export projects.

Mr Heseltine is also in the process of finalising a major. internal restructuring of DII export support operations, which currently cost the taxpayer £170m a year - excluding the bill for trade aid.

In the meantime, the private sector is being called upon to play its part in the shape of so-called export promoters, drawn on secondment from companies and brought in to give the benefit of their experience to others.

Mr Heseltine dismisses the concept of desk-bound government officials imploring companies to "get off your bottoms and go out there". The answer, he says, is to recruit people who have spent their careers selling overseas and who can teach others how to

About 25 full-time promoters have so far been enlisted, initially for one year, and the intention is to get about 100 into the DTL. The department traditionally recruits around one quarter of that number.

Freed from day-to-day line management responsibilities the promoters will haise with overseas posts and also maintain a dialogue with companies. They will be expected to visit businesses around the country, giving advice on export opportunities.

### Portillo sees modest upturn Sick pay targeted for cutbacks Economics Editor

BRITAIN is heading for an industrial disablement benefit be modest compared with the have emerged as front-line tar-gets for cutbacks in the gov-1980s but which should be "better sustained, for a longer ernment's review of social period of time and with greater security spending, writes certainty", Mr Michael Portillo, Philip Stephens.

A Treasury demand that the chief secretary to the Treasury,

Speaking ahead of the publication of provisional first-quarter gross domestic product figures today that are generally expected to signal a formal end to recession. Mr Portillo said it

"even a few years out" would not be as fast as in the 1980s. He said recent data on indusial production, retail sales.

exports and from the housing market were "very encouraging" while, contrary to expectations, there had been falls in unemployment. The government was confident that it would meet its goal of holding underlying inflation in the 1 to 4 per cent target range this year and next, he added.

In an interview on BBC radio's World this Weekend. Mr Portillo promised the gov-

was likely that rates of growth ernment would adjust its policies to keep inflation under control. Although "there was no immediate prospect" of the UK rejoining exchange rate mechanism, the government would take account of the sterling exchange rate in pursuing its goal of low inflation.

Because industry had kept control of wages, unit costs were falling, giving the British economy a lasting efficiency and competitive gain greater than that caused by the fall in the value of sterling since last September, he added

### Warning issued on British Gas break up

By Deborah Hargreaves

THE GOVERNMENT has been warned against breaking up British Gas by the gas consumers council, the lobby group opposed to moves by Ofgas, the industry regulator, aimed at dividing the group into separate companies.

Mr James Cooper, chairman of the council, said: "No case has yet been made for radical and irreversible restructuring." In the council's annual report, which is pub-

lished today, Mr Cooper says that any restruct-uring should show distinct benefits for the consumer. "Competition just for the sake of competition is no reason for change. Proposals to break up British Gas are being considered by the Monopolies and Mergers Com-

mission which is due to report at the end of The council said that complaints from consumers about British Gas fell by 14 per cent last year to 19,281 - the biggest drop since 1989.

Britain in brief

Norway to resume talks Negotiations between Britain

and Norway resume today on the ratification of a NKr20bn UK gas import deal agreed two years ago amid fears that they may have reached an impasse. The deal involves National Power, the electricity generator, buying 2.2bn cubic metres of gas over 15 years from the mid-1990s from GFU, Norway's gas negotiating committee.

National Power wants the gas to fuel two power stations to produce 1,300 megawatts. The deal would require an amendment to a treaty to allow new gas to flow through the Frigg pipeline which runs between the Norwegian North Sea Frigg gas field and St.Fergus in Aberdeenshire.

The GFU/National Power deal, which must have the backing of both governments, is viewed as a test case for the

UK's policy on Norwegian imports. Norway insists it is ready to facilitate the deal and agreed in principle to a UK demand for access to the Norwegian North Sea Norpipe

### NatWest warns of jobless rise National Westminster Bank,

one of Britain's main clearers, expects unemployment to rise by another 210,000 and to peak at around 3.15m. Base rates may also be cut

by 0.5 per cent to 5.5 per cent in the summer - but the government will have to backtrack and increase rates to perhaps 7 per cent by next summer according to Mr David Kern, the bank's chief economist.

Mortgage rates may also have to be increased but the housing market is set for a revival with prices rising by 3 per cent this year and 7 per cent next year, he said.

### Companies resist change

Companies are still resisting the Accounting Standards Board's campaign to outlaw extraordinary items, according Reporting, the monthly monitor of annual accounts. During the last 12 months. the analysis showed that 39 per cent of a sample of 570 companies were continuing to

use extraordinary items. For accounts published in the first quarter of 1993, the proportion was still 32 per cent. Extraordinary items are income or expenditure outside the normal activities of a company that are not treated as part of earnings on the profit

and loss account.
Their continued widespread use comes in spite of new standards issued in late 1991 by the Accounting Standards Board, which argued that very few items should be classified in this way.

### Labour backs dealing move

The opposition Labour party is to support a campaign for changes to the government's Criminal Justice Bill to ensure that the offence of insider dealing is not too sweepingly

"I have yet to be persuaded it will do anyone any good to create a large class of potential insiders who are doing no more than commentating on and analysing a company's to a survey by Company likely results," according to Mr

Alistair Darling, Labour's City spokesman.

The legislation, designed to implement a European Community insider dealing directive, would, as currently drafted, make it an offence not only to deal on the basis of inside information but also to take advantage of such information by disclosing it or by encouraging others to trade.

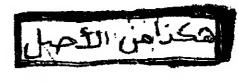

### Pesticide tests condemned

Government tests for pesticide contamination in food have been condemned as unreliable and often inaccurate following tests on deliberately spiked foods performed by commer-cial laboratories.

The Food Commission said it had obtained Ministry of Agriculture documents which raised "disturbing doubts" about the accuracy of government contamination figures.

The documents showed that the government's Food Science Laboratory sent foods deliber-ately spiked with pesticides to more than 50 commercial laboratories which it regularly employs to carry out scientific analysis.

In one test, bread was spiked with three pesticides. But only 44 of the 58 laboratories identified all three contaminants.

FINANCIAL TIMES MONDAY APRIL 26 1993

Aer Lingus have responded to the British Midland challenge by reducing business class fares

CLASS APRIL 26 1993

Balance of

trade holds

key to UK

recovery

Surprise, surprise.

No sooner had British

Midland launched Diamond Euro-Class, the first separate Business Class cabin to offer a genuine choice of fares, than other airlines started jumping on the bandwagon, falling over themselves in their haste to offer price cuts in Business Class.

Exactly like British Midland's. Or rather, not exactly like British Midland's.

Because their reductions are only selective:

some fares are reduced on some routes

(usually the ones they share with British Midland) for some of the time.

In contrast, Diamond EuroClass means real choice, and real savings, on <u>all</u> three of our Business Class fares, on <u>all</u> our international routes, <u>all</u> the time.

We think this sort of knee-jerk response to a British Midland initiative demonstrates only too clearly that other airlines have nothing like our genuine commitment to delivering top-class business travel at reasonable cost.

What do you think?

# Clear end to UK recession expected

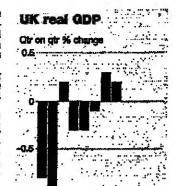

TODAY'S release of the provisional estimate of first quarter GDP figures in the UK will mark the clear end of a recession

Economists say manufacturing output will be the driving force behind the rise, having increased strongly so far this year.

There will be more clues to the strength of the UK's economic recovery in the Confederation of British Industry's quarterly industrial trends survey tomorrow, generally a good guide to future trends in manufactur-

But while the news in the UK might be good, the world's eco-nomic problems will be taxing the minds of G7 finance ministers and central bank governors when they meet in Washington on the eve of the IMF's Policy Making Interim Committee

Other economic highlights and figures this week follow. The figures in brackets are the median cial information company,

Today: UK, provisional first quarter GDP (up 0.4 per cent on quarter, 0.8 per cent on year); Annual meeting of European Bank for Reconstruction and Development: Institute of Directors bi-monthly business opinion survey. US, Treasury Secretary Lloyd Bentsen addresses Inde-pendent Bankers' Association;

92 .... 93

International Monetary Fund releases half yearly World Eco-nomic Outlook; March existing home sales. The Netherlands, central bank annual report pub-lished. France, final April con-sumer price index (up 0.4 per cent on month, 2.1 per cent on

year).
Tomorrow: UK, CBI quarterly industrial trends survey; EBRD meeting concludes. US, IMF managing director gives press conference: April consumer confidence ence; April consumer confidence index (63.0), Johnson Redbook week ended April 24; first quarter week ended April 22; trist data ter employment cost index. Japan, February leading diffusion index, coincident index; March retail sales (down 5.7 per cent on

year). Wednesday: US, March export wetnessay: Us, scarch export price index, import price index; first quarter export price index; import price index; Canada, March industrial production March industrial production price index, raw materials price index, Japan, March construction orders, housing starts (up 2.5 per cent on year), construction starts, industrial production, shipments. Australia, first quarter consumer prices index (up 0.7

per cent on quarter, up 0.8 per cent on year).

Thursday: US, G7 meeting of central bank governors and finance ministers; advance first quarter GDP figures (up 25 per cent), advance GDP deflator (up 3 cent), advance GDP deliator (up 5 per cent); fourth quarter after tax corporation profit (up 9.2 per cent); initial claims for week ended April 24 (350,000); state benefits for week ended April 17; March new home sales (575,000); merchas supply data for week money supply data for week ended April 19. Canada, February employment earnings. Japan, National holiday, markets

Friday: US, meeting of IMF Friday: US, meeting of IMF Policy Making Interim Committee; C10 industrial nations meet; March personal income (up 0.3 per cent), factory orders (down 1.5 per cent), factory shipments, bank credit; April Chicago NAPM, Michigan sentiment, agriculture prices. Canada, February real GDP. France, March unemployment rate (10.7 per cent). Japan, March unemployment rate: April Tokyo CPI (up 1 per rate; April Tokyo CPI (up 1 per cent on year), excluding perish-

ables (up 1.4 per cent on year), national CPI (up 1.4 per cent on year), excluding perishables (up 1.7 per cent on year).
Saturday: US, IMF/World Bank
Development Committee;
During the week: Germany.

March producer prices index for west (up 0.1 per cent on month, up 0.3 per cent on year); April cost of living index for Badenwuert, Nord-rhine Westphalia, Hassen and Bavaria); March import prices (up 0.1 per cent on import prices (up 0.1 per cent on month, down 2.5 per cent on year); April preliminary cost of living index (up 0.3 per cent on month, up 4.2 per cent on year); February trade balance, current account. Switzerland, March CPI for Basie. Denmark, March WPL Finland, March current account. Italy, March M2, non-EC trade balance, balance of payments, parance, parance ut payments, hourly wages (up 29 per cent), foreign exchange reserves (L66.1trillion). Belgium, April CPI (up 29 per cent on year). Spain, February industrial pro-

Emma Tucker

### RESULTS DUE

IMPERIAL Chemical Industries, the UK's biggest manufacturer, reports its first-quarter results on Thursday in the crucial run-up to the floration of Zeneca, its bicscience substidiary. Analysis expect pro-tax profiles of

Zeneca, its bicscience subsidiary.

Analysts expect pre-tax profits of about £180m compared with about £180m compared with about £180m compared the subset £11m for the same period last year.

They will be looking at the extent of the impact of the slowdown in continental Europe, particularly in fibres, as well as the upturn in films polyure-thanes and acryfics in the US.

As for Zeneca, the rate of decline in US sales of Tenormin following the expity of its patents will also studied. So, too, will the impact of the reform of the EC's common agricultural

policy on European agrochemicals.
Sears, the UK retail group that
includes the Selfridges department
store and a large slice of the UK's shoe

includes the Selfringes to the UK's shoe shops, is generally forecast to announce pre-tax profits of about 157m to \$100m tomorrow before exceptional frems of about 773m.

That would represent an improvement on last year's pre-exceptional 256.3m, although some forecasts are as low as £50m. The exceptional costs this year include about £32m for rationalising the footweer operations of British Shoe Corporation, other restricturing and redundancy costs, and a write-off for the sale of the Calliford houseboulding division.

of the chill savice. Witnesses: sesociation of first division and servants; Mr Casham Mether. European policy forum (1 term, com §). Trade and imbasty, subject work of the Department of Trade and Industry. Witness, Mr Michael

Tarmac is expected to announce pre-tax losses of up to £355m when it announces its 1992 results tomorrow. The company is widely expected to adopt the FRS 3 accounting standard

The company is where the company is adopt the FRS 3 accounting standard which means that provisions of nate than £300m will be taken above the line. The final dividend of 5.5p is expected to be maintained.

The market will want to know what progress the company's disposal programme is making, particularly the planned sale of its waste disposal braness. Analysts will also want to hear from Mr. Neville Simms, chief executive, about progress the group is making in the recently reasscent UK housing market.

hen Amstrad, the UK electronics group headed by Alan Sugar, advertised late last year for the appointment of two non-executive directors, Colin St Johnston was entitled to indulge in

12 O AV APRIL 26 1993

As managing director of Pro Ned, the organisation for the promotion of non-executive directors which coordinated the recruitment, he was witnessing the remarkable alliance of a vocal advocate for reform of corporate governance with a company criticised for its failure to embrace the topic

A decade after it began producing annual reviews, Pro Ned retains an evangelical slant, calling regularly for an end to the "old boy network" for appointments, and providing booklets and hosting conferences to promote better boardroom practice. But some are now questioning whether it should continue in its

Pro Ned came into being in 1981 with the backing of nine sponsors including the Bank of England, the Confederation of British Industry and the Stock Exchange. Its first, typewritten annual review in 1983 may have since been replaced by rather more glossy production tech-niques. But its objectives have remained almost unchanged.

The first and primary aim was "to create a climate of opinion in which boards perceive that it is in their own interest to put their house in order". That meant promoting independent non-executive directors and encouraging the split of roles between chairman and chief execu-

The second aim was to create a search service to help companies find these directors. In 1983, Pro Ned estimated that just 5 per cent were selected through search firms while three-quarters came through the personal recommendations of the chairman, company directors or senior management.

One senior executive with knowledge of the organisation says: "It worries me that Pro Ned lacks a clarity of purpose and focus and is not as commercial as it might be." He cites the dominance of representatives of associations rather than working business executives on the Pro Ned bound.

Peter Waine, joint chief executive of Hanson Green, a search firm for non-executive directors which claims to place nearly half the estimated 600-700 vacancies a year, has "a lot of respect" for Pro Ned. "But I think it has probably lost its pur-pose as an appointments agency. It should stick to being a professional institute."

Of the 850 people on Pro Ned's register, 60 per cent are 55 or older, and just 10 per cent are women. Many names stay on the register for

After 10 years fighting the old boy network, Pro Ned now faces questions about its own future, says Andrew Jack

# Big changes to take on board

years without being selected. Wains says the register is too reactive, and offers candidates "in the twilight of their careers" who are too reliant on non-executive remuneration to

But St Johnston argues that Pro Ned actively canvasses for new names, and does not "purge" its list ister without identifying themtoo ruthlessly because candidates who have been untouched for years

non-executives can consult the regselves, and in the knowledge that candidates will be available.

# Are two heads better than one?

re we in danger of going overboard on corporate gov-Lernance? No one challenges the concept or the objectives - but who is counting the cost? Uitimately, are shareholders getting added value?

For example, splitting the roles of chairman and chief executive can be expensive, particularly at executive level. Two salaries for what was previously one job is the starting point. And how often is the chief executive reimbursed at a lower level than his predecessor, who had been handling the dual role? Even a part-time chairman will, almost inevitably, bring an additional burden to the payroll.

The bidden costs are more difficuit to identify and justify. Decision making with one ultimate arbitrator should be straightforward. A decision with split roles can be time-consuming but the outcome is unlikely to be materially different or more profound from two minds than from one.

Another issue arises over communicating with the City, a process that the chairman is duty-bound to lead. Yet it is the chief executive who really knows the business, and it is he who fund managers wish to hear. I suspect that this will not be easy for many chairmen to accept. Many senior executives are frus-

trated with the challenge of working for two masters, particularly if they worked closely with someone combining efficiently the two roles. If a company has in place a well qualified, independent set of nonexecutive directors, are further safeguards necessary? If arm'slength committees covering audit, renumeration and so on are in place and working efficiently, will

the horrors of the past be repeated? When too much power lies in one person's grasp, then the likelihood of fraud, dishonesty and variations on those themes is always a danger. But executives and companies of the highest integrity will always outnumber those with the propensity to go off the rails. It should not be necessary, as a matter of course, for every company to split the chairman and chief executive. In providing such safeguards

companies are often wasting hun-dreds of thousands of pounds. It is time to think again, to analyse the practical implementations and to consider carefully whether we really are creating a better,

Alex Renfield The author is employed at a senior level in an FT-SE company.

Ned's primary aim. "The promotion of non-executives was one area in which there was no division between the City and industry," says Jonathon Charkham, adviser to the governors of the Bank of England and Pro Ned's first director

in 1981-66. Sir Adrian Cadbury, Pro Ned's sir Adrian Canoury, Pro Ned's chairman, says: "Pro Ned has estab-lished itself as the one really inde-pendent source of advice and has become an accepted authority. Everyone else has an axe to grind. But we have an enormous job still to do to make directors more independent and more effective."

There is little doubt that there has been tremendous change in the last decade. According to figures from Hemmington Scott, the corporate information company, all FTSE-100 companies now have nonexecutive directors, as do all but 8 per cent of the 1,533 UK-quoted com-Four-fifths have split the roles of chairman and chief executive.

By contrast, a survey by the Bullock Committee showed that one quarter of the Times 1,000 companies had no non-executive directors in 1976. Even in 1982, a Bank of England survey showed 20 per cent without any on the board.

How far Pro Ned was responsible for this change is difficult to assess. Other organisations and some regulators in the UK and overseas have influenced changes in corporate

Charkham cites at least one instance of a Pro Ned-generated publish details of the backgrounds of non-executive directors in their annual reports. That was taken up by the Stock Exchange, and is now a listing requirement.

A more fundamental question is whether Pro Ned's campaigning zeal has been focused in the right direction. Most evidence on corporate governance is dangerously anecdotal. A recent analysis by Hemmington Scott suggests that there is little correlation between long-term corporate performance and the presence of non-executives or the separation of chairmen and chief executives.

Equally, some argue that the organisation has focused on topics on which there is considerable consensus while neglecting more controversial but important issues, such as the scope for two-tier or supervisory boards.

Sir Adrian says: "That is an important question but let's not divert attention from what needs to be done here and now." He admits that there is a tension between the campaigning and the recruitment roles of the organisation, and says he will be drawing up options for his successor before retiring from the board next year.

# 'Flexecs' show their muscle

Being made redundant is not such a big deal, according to John Rauwerda, fiscal manager at the Foundation for San Francisco's Architectural Heritage. For him it was a blessing in

As in the UK, executives in the US have recently discovered that redundancy is not a malaise restricted solely to the ranks of the blue-collar worker. But Americans are finding increasingly that being a temporary executive has its perks. Rauwerda is one of thousands of

executives who fell foul of recessionary lavoffs and then found another position after a period as "flexecutive". With more than 30m Americans employed as either temporary workers, part-timers or independent contractors, the contingent workforce has become one of the fastest-growing sectors of employment in America and accounts for more than 25 per cent of civilian jobs.

"I had been working on a temporary assignment at the Founda-tion for four months when they offered me a permanent position," says Rauwerda, "I took it because gave me security."

For those who sit in wait for their next permanent role, becoming a flexecutive has advantages. According to Tom Johnston of New York-based Interim Executive Services, approximately 52 per cent of temporary executives receive permanent job offers. In addition, interim employment eliminates gaping voids on a CV and broadens one's skill base.

Not everyone regards temporary employment as a stop-gap. Amy Ross presently heads up the benefits unit at Lifescan, a nationwide medical monitoring manufacturer. Ross left the permanent job market because she sought greater freedom and flexibility. "I was burned out and my for-

mer role was too demanding. This way Γm more in control," she says. Roes, who spent two months travelling with her family recently, says that she would not accept a permanent job if it was offered to her.

But Ross is fortunate in that temporary employment suits her lifestyle. Others are resigned to a career in temporary executive roles because they do not see the

By Kate Button employment market supplying sufficient opportunity for them to return to the permanent positions

they would prefer. In the present economic climate there are advantages for companies in favouring temporary recruitment, especially at the higher echelons of management where perks are expensive. Temporary employees do not receive holiday pay, maternity leave, health care insurance, pension plans or sick leave.

It is largely for this reason that the incidence of temporary employment rises towards the end of a recession when companies find they have been too eager with the paring knife and need certain skills on board, but cannot afford a permanent executive.

Small companies as well as large have been attracted towards the ever increasing pool of executive expertise on the marketplace. Many have used temporary skills to cover for under-staffing caused by maternity leave, sabbaticals or overly enthusiastic redundancy

Says Don Muller, the director of client services for lawyers Thelen, Marrin, Johnson and Bridges: " bring in the level of expertise I need, when I need it." Muller now finds that while his permanent staff is on the decrease, his use of Dexecutives is on the increase and there is rarely a time when he does not have at least two temporary top managers on the payroll.
Muller stresses the financial advantages for companies are enormous. Recently, he employed a specialist to set up a new communications system within the company, at a rate of \$100 (£65) an

The project took seven weeks and the individual worked a 20hour week, costing \$14,000. "Had I employed her full-time, her level of expertise would have warranted a \$120,000 annuai salary," explains Muller.

Recent reports by the Bureau of Labour Statistics suggest that the growing army of "discouraged workers" in the US (resigned to never securing another permanent job) has reached im, while the temporary professional sector is the fastest growing segment of the temporary-worker industry, generating \$70m per annum.

### **COMPANY NOTICES**

### NOTICE OF REDEMPTION TO THE HOLDERS OF MAGNA INTERNATIONAL INC.

7% Convertible Subordinated Bonds Due 1993

NOTICE IS HEREBY GIVEN that, persuant to the provisions of the Trust Dead dated November 26, 1986 between Magna International Inc. (the "Company") and The Canada Trust Company, as trustee, as amended by a ental Trust Deed dated October 22, 1990 between the Company, The Canada Trust Company and National Trust Company, as successor trustee, and by a Supplemental Trust Deed dated June 1, 1992 between the Company and National Trust Company, as trustee (which Trust Deed, as amended, is hereinafter referred to as the "Amended Trust Deed"), the Company has elected to redeem and will redeem on May 26, 1993 (the "Redemption Date") all of its outstanding 7% Convertible Subordinated Bonds Due 1993 (the "Bonds") by payment to the holders thereof of the redemption price of 101% of the principal amount thereof, together with accrued and unpaid interest to the Redomption Date of U.S.\$35.19 per U.S.\$1,000.00 Bond.

Payment of the redemption price (U.S.\$1,045.19 per U.S.\$1,000.00 principal amount, including accrued interest and premium) will be made to holders against presentation and surrender of the Bonds together with all manatured oupons appertaining thereto and a copy of this notice at The Chase Manhattan Bank, N.A., Woolgate House, Coleman Street, London, EC2P 2HO; Banque Bruxelles Lambert S.A., 24 Avenue Marnix, B1050 Brussels; Chase Manhattan Bank, Luxembourg, S.A., 5 Rue Plactis, L-2338, Luxembourg, or Chase Manhattan Bank, Switzerland, 63 Rue du Rhone, CH 1204 Geneva (collectively, the "Paying and Conversion Agencies").

Holders of Bonds are reminded of the right to convert the bonds into fully paid and non-assessable Class A Subordinate Voting Shares of the Company at the current conversion price of U.S.\$20.75 per share. Such right may be exercised at any time prior to the close of business (London, England time) on May 19, 1993 by surrendering the Bonds, together with all unmatured coupons appertaining thereto, to any of the Paying and Conversion Agencies accompanied by a duly signed and completed conversion notice. Copies of the conversion notice form may be obtained from any of the Paying and Conversion Agencies. Please note that, pursuant to the provisions of the Amended Trust Deed, the conversion right will expire at the close of business (London, England time) on May 19, 1993.

NOTICE IS FURTHER GIVEN that, pursuant to the provisions of the Amended Trust Deed, all interest upon the principal amount of the Bonds shall cease to accrue from and after the Redemption Date and coupons for interest accruing after the Redemption Date shall become and be void.

DATED at Markham, Outario, Canada this 26th day of April, 1993.

Brian IC MacLEOD

# **AB ELECTROLU**

TO THE SHAREHOLDERS OF AKTIEBOLAGET ELECTROLUX

The ANNUAL GENERAL MEETING of the Company will be held at Komsethuset, Stora salen, Hötorgat, Stockholm, Sweden, on Tuesday, May 18, 1993, at 3.00 p.m.

. Ordinary business Ordinary business

Matters prescribed by the Swediah Companies Act 1975 and by the Company's Articles of Association including, inter alla, presentation of the smusal report and accounts and the auditor's report on the Company and of the consolidated annual accounts and the auditor's report on the Group; randiations on the adoption of the profit and loss statement and the balance sheet; and of the consolidated profit and loss statement and the consolidated balance sheet; on appropriation of the Company's profit according to the adopted balance sheet; and the resolutions on the Directors' and the Managing Director's discharge from liability and on the election of Directors. Deputy Directors and Auditor.

Authorization to have a convertible debenuare to a Proposals by the Board of Directors that the Board be authorized, until the next Annual General Meeting, to decide to issue a convenible debenture town in the nominal amount of DEM 80,000,000, convertible into ordinary shares in AB nominal amount of DEM 80,000,000, convertible into ordinary surers in AB Electrobux of Series B, such issue - deviating from the shareholders' preferential right of subscription - to be subscribed by AEG Aktiengesellschaft. The term of the loan is intended to be approximately five years and the loan shall carry interest at a rate of 8.9% p.a. The conversion rate shall be SEK 475 with a fixed rate of exchange constitution for DEM 1 = SEK 3.60. Upon full conversion of the loan. able upon conversion of DEM 1 = SEK 3.60. Upon full conversion of the los the share capital - with the said conversion and exchange rates - will increase by fully SEK 15 million which corresponds to 0.8% of the present share capital and to 0.03% of the number of votes.

The reasons for the deviation from the shareholders' preferential right of subscription are the following.

As earlier made public, AB Electrolus has reached a cooperation agreement with ABG Aktiengesellschaft under which among other things Electrolux will acquire 10 per cent of the shares in ABG Hausgeräte Aktiengesellschaft with the possibility of increasing its shareholding to 20 per cent, and AEG Aktiengesellschaft will subscribe a convertible debenture ioan issued by AB Electrolux.

The cooperation will strengthen Electrolus' competitive position in Europe by creating economies of scale in product development and production, and also enable Electrolux to meet more effectively the increasing competition from the United States and Japan in the European domestic appliance market.

Amendment of the Articles of Association The proposal by the Board of Directors that the wording of the present as-called record day provision in §12 of the Articles of Association be adapted to current

### Attendance at the Meeting

Shareholders who intend to participate in the meeting must be registered with Vardepapperscentralen VPC AB (Swedish Security Register Center) not later than Friday May 7, 1993. In addition, notice of intent to participate must be given to Electrolux, not later than 4 p.m. on Thursday May 13, 1993, by mail to AB Electrolux, Dept. C-J, S-105 45 Stockholm, Sweden, or by telephone at lm +46 8 738 6793 or 738 6789. Notice should include the shareholder's name, registration number if any, address

Shareholders whose shares are registered through banks or trustees must have their shares temporarily registered in their own names at VPC not later than Friday May 7.

A shareholder may attend and vote at the meeting in person or by proxy but in accordance with Swedish practice the Company does not send forms of proxy to as shareholders. Shareholders wishing to vote by proxy should submit their own forms of

Subject to endorsement by the meeting of the Board's proposal of May 24, 1993, as record date for the dividend, it is expected that dividends will be paid by VPC on June

# Consultant picks up the reins at Exco

Richard Lacy, one of the best and in July 1991 he handed known figures in the global money broking business, is handing over the chief executive's reigns at Exco International to Ron Sandler, a 41year-old management consul-

Lacy, who joined Exco in 1966 as a trainee broker and tea-maker, may be only 45 but he comes from a sector of the financial services industry where executives tend to retire

A popular figure with staff, Lacy has helped keep Exco on an even keel following the collapse of its parent, the British and Commonwealth empire, in 1988. He tried to mount a manement buy-out of Exco from the B&C administrators in 1990, but this came to nothing

over the chairmanship to Carel Mosselmans, a former chair-

man of Sedgwick group. Last summer the administrators sold 60 per cent of Exco's shares to a group of institutions and the intention is to refloat the company on the stock market. Lacy has now decided to lighten his workload and move up to be deputy chairman.

Ron Sandler, Exco's new chief executive, comes from a very different background. After Cambridge and Stanford. where he got his MBA, Sandler worked first for Boston Consulting and then became managing director of the UK operations of Booz Allen & Hamilton, before running his own consultancy for a period.

At the end of 1990, he was introduced to the money-broking world after one of his clients, Citibank, sought his help in recovering money lent to Gary Klesch's Quadrex, owners

money-broker. Sandler took over as chief executive and reshaped the Bierbaum group so that it could be sold to David Hagan's Trio Investments at the end of 1992.

Sandler, who takes over a business roughly twice as big as Martin Bierbaum, dismisses suggestions that he has been brought in to Exco for a similar mission. He says Exco has a good cash flow and a strong position in the three timezones in which it operates. Meanwhile, Exco has also

announced that Richard Jack. son, 45. previously president of RMJ Securities, Exco's US treasury bond inter-dealer broker, has been appointed chairman of RMJ and retires from the Exco board.

### Chatham House plugs | Constructive Nigel Lester quits County environment gap

Nigel Lester, who heads County NatWest Investment Management, is leaving for personal reasons, but has been asked by the board of NatWest Markets to stay on for another three months while a successor is found.

The fund management operation has been hit by a string of departures, with two other senior figures quitting just recently. David Gamble, dep-uty chief executive, has left to run the British Airways Pension Fund, and Bruce Pullman, who was in charge of quantitative product development, is moving to Hill Samuel Life and Investment Management.

County denies that these departures are connected or reflect changing fortunes of the operation. Total funds under management last year rose from £12.6bn to £14bn. Lester, 40, had been at County for three years.

# A Modernist of east and west

Colin Amery on the work of Fumihiko Maki, winner of the Pritzker Prize

e has been described as a "New Modernist"; he is famous for his loud and frequent laughter; his architecture is thought by some to be in the realm of transcendental materialism; and today he joins the small band of architects to win the Pritzker Prize. Fumihiko Maki is an architect who is often seen as bridging the cultures of east and west because he was born in Japan in 1928 and from 1953 has spent a large part of his career in the US.

This coveted prize is often described as the Nobel prize for architecture. It was the brainchild of Jay A. Pritzker, the president of the Hyatt Foundation, and it has been presented annually since 1979. It is generous - \$100,000 and the presentation ceremonies have been held at important architectural locations all over the world. The jury is international but inevitably there is a strong transatlantic flavour to the award. The list of laureates is interest-ing: Philip Johnson; Luis Barragan; James Stirling; Kevin Roche; LM. Pei: Richard Meier; Hans Hollein; Gottfried Boehm; Kenzo Tange; Gordon Bunshaft with Oscar Neimeyer; Frank Gebry; Aldo Rossi; Robert Venturi; and Aalvaro Siza. Seven of the winners have been American and many more are prominent in the academic world of architecture which has a strong leaning

towards the American schools. There is, I think, a feeling that the award should mark the whole career of the architect and so it is inevitable that it should have a certain predeliction for the masters of the modern movement and their immediate heirs. This year the jury states its view of Maki very clearly: "He is a modernist who has fused the best of both eastern and western cultures to create an architecture representing the age old qualities of his native country while at the same time juxtaposing contemporary construction methods and materials . . . Maki has expressed his constant concern for the parts' and the 'whole' describing one of his goals as achieving a dynamic equilibrium that includes sometimes conflicting masses, volumes and materials. He uses light in a masterful way mak-

ing it as tangible a part of his design as

are the walls and roof. In each building, he searches for a way to make transparency, translucency and opacity exist in total harmony. He uses precise detailing to give his structures rhythm and

Maki's buildings are not as well known in Europe as they are on the American/Japanese architectural axis. His major works are all in Japan. although he is now designing major office buildings in Munich and has a number of commissions in the US. He is, curiously, very famous for not winning the competition for the major new Getty museum in Los Angeles: his entry was much favoured by many members of that jury. An important visual arts centre project by Maki is currently under construction, which is literally on top of the Moscone Convention Centre in the Yerba Buena Gardens in San Francisco.

As a student Maki was much influenced by the Bauhaus and after studying at the Harvard School of Design he worked for Skidmore, Owings and Merrill in New York. When he returned to Japan in 1965 he became a founding member of a group that called them-selves "The Metabolists" . They had a terrifying philosophy of creating the largest possible megastructures as the solution to urban architectural problems. Their ideas embraced technology and vastness of scale as natural bedfel lows and sometimes the results were built in Japan. The great Harumi apartment block designed by Kunio Maekawa is one of largest concrete framed blocks of flats, and it was admired by the Metabolists for the way it fitted hundreds of little traditional Japanese houses into a Corbusian block. Kikutake's Sea City and Tange's plan for a megastructure for the whole of Tokyo Bay were the most extreme examples. Many of the Metabolist's ideas were taken up by mad groups like Archigram in England or Paolo Soleri's collectives in Arizona. Today it all has a sad period feel and Metabolism is rightly seen as a dire example of a modern architectural

he demonstrates successfully the virtues of small-scale town planning. I saw recently his Tokyo Metropolitan Gymnasium, which is a giant of a building but has a strange, anthropomorphic presence that is very powerful. His Spi-ral Building, which is part of the Wacoal Arts Centre in Tokyo, has an elegance and an invisible mastery of technology that is masterful. I particularly enjoyed the games he plays with the language of modernism in the Tepia Science Centre in Tokyo full of referces to De Still and reinterpretations of the dead language of cubism.

The greatest influence on Maki is probably the late work of Eero Saarinen in the US. Both architects have the same fascination with new shapes and a modern architecture.

certain clarity combined with innovation when it comes to structure. Contemporary Japanese architecture

is not specifically eastern or western and I feel it is wrong to think of architects like Maki as important cultural "bridges". Architecture in Japan is undoubtedly contemporary but in a more timeless way than fashionable contemporary western architecture Maki does for architecture what Japanese manufacturing has done for cars and electronics. He makes technology elegant as a setting for modern life. His best buildings have a quality of stability that is very rare and rewarding in

and structure work for the user, and so his architecture remains cool and often

### Singing competition

# Kathleen **Ferrier Awards**

The prize money at the Kathleen prize went to Ferrier Awards has gone up again this year. No doubt there is good reason in trying to keep the competition itself in first place ahead of its rivals - but the result is not necessarily as intended.

A five-figure first prize does not just bring in high-quality students. It is mough to lure young professional singers, who could not earn as much in a couple of evenings otherwise. The result was a selection of finalists more experienced than in previous years, who fitted in the competition b flying off to engagements at San Fran-cisco or La Scala, Milan (1 jest not - the biographies of the eight touched that

The main culprit is the Cardiff Singer of the World competition, which has pitched its sights at the international level, luring away the public's attention and a lot of the available finance. Other competitions have either closed down or been forced to raise their game. A gap has opened up, leaving the young, unfinished singer of 23 or 24 who really needs the money without much chance

of winning a major award. Against that background the jury of this year's Ferrier Awards (chaired by David Murray | Janet Baker) did a good job. The first

a finalist last year, but re-appeared at the Wigmore Hall on Friday much advanced. Her richly-coloured mezzo was better focused; her artistry was more mature, filling out the long lines of her aria from Massenet's Werther with skill and heartfelt emotion. She was the right choice - by a

Second prize was taken by the mezzo Sara Fulgoni, already noted as a major talent at the Royal Northern College of are remarkable. Had she sung her two songs at the final with a bit more variety of colour, she might have won. Ruth Peel, a contralto generous in tone, less forthcoming with words, came third. That left no prize for the baritone Peter Snipp, who had taken command of the stage with unabashed professionalism. In contrast, the soprano Eldrydd Cynan-Jones and tenor Toby Spence gave notice of genuine promise, deserving of recognition. There was no accompanists' prize this year (has it been dropped?) but with one or two exceptions the standard in that department

was poor, as the jury rightly noted.

Richard Fairman

### Shakespeare in London

# Die lustigen Weiber von Windsor

Sam Wanamaker's grand design of a faithfully recon-structed Globe Theatre close to the original site took another step forward at the weekend with a production of Die lustigen Weiber von Windsor by the Bremer Shakespeare Company. The weather on Friday was not kind, but not quite cruel enough to prevent the show going through to the end. If the sun had shone, the superlatives in this piece would be even stronger. For I do not share the general British scepticism that Wanamaker is pursuing a heroic endeavour doomed not to come off. He has been at it now for over 20 years and the arguments for what he is trying to achieve become stronger with time.

In the first place, the internaspeare is greater than the British. There are imitation Globe Theatres strewn around the world, though none with the advantage that could accrue to one set in the heart of Shake-

speare's London.

The site is on the south bank of the Thames more or less midway between the Royal National Theatre on the same side of the river and the Royal Shakespeare Company's Barbican home not far across the waterway. All three sites are just about within walking distance of each other, and would be even more comfortably so if Wanamaker's further dream of a pedestrian bridge across the river were realised.

The concentration of three theatres in broadly the same area would add to the attraction, especially to foreign visitors. Both the RNT and the Page, almost better when just RSC stand to benefit from the Globe going ahead.

I also think that Shakespeare is very good in German, as the Bremer production, brought to us in association with the Goethe-Institut, showed. As we have already seen from the Schiller Theater's interpretation of Macbeth, the Germans take a less deferential approach to Shakespeare than some of our own directors. That does not mean that they are always right, but it does help to demonstrate the Bard's

infinite variety.

Die lustigen Weiber (or in other words The Merry Wives of Windsor) is a perfect example. Some of the language and contemporary allusions are hard enough to understand in English. But it is a marvellous comedy designed to take liberties with, which perhaps explains why it has been the base for several operas.

The Bremer production looked as if it had added components especially for London. Characters carry their bits and pieces in Harrods bags. A search for a marriage partner is pursued by consulting the (obviously newly introduced) agony column in the Evening Standard. When things go wrong, as in Friday's conditions frequently they did, the characters address the audience in English.

There is a cast of only five true to the Shakespeare tradition, all men. One of the revelations is that it is the arms rather than the legs that tell the men from the women. Erik gesturing than when speaking. The triumph is Norbert Kentrup's Falstaff. The Germans do these things on the grand scale. No padding is required ~ we know this because for much of the time he wears a see-through nightshirt: he is just enormous, bigger even than Helmut Kohl, and remarkably good natured to boot. Note his entrance, dripping wet, after the interval. having just been thrown in the river, which in this case is conveniently nearby. Whether you understand German becomes

The Bremer company specialises in Shakespeare and has done 17 productions since it was founded 10 years ago. Possibly The Merry Wives, which is largely in prose, is a natural for a British audience. One wonders what it would do with As You Like It, the RSC's production having arrived at the Barbican from Stratford.

David Thacker's direction is notably austere, almost to the point of removing the comedy But there is is one wonderful performance by Kate Buffery as Rosalind, the heroine who dresses as a boy in pursuit of her love. At times she commands the entire, almost bare stage, and could equally well be the hero. Every Shakespeare production is different. That is why we can take more. The Globe Theatre could become a permanent fixture in a year, given another £2m.

Malcolm Rutherford

# The Who's Tommy

Broadway careened into the video age last week with the opening of The Who's Tommy, a spectacular new musical theatre version of the classic 1969 rock opera that is as addictively watchable - and as troublingly meaningless – as MTV music television.

Former Who member Pete Townshend, who wrote the music and lyrics, and director Des McInuff, have bolstered the narrative for this version which is playing at the St James Theatre, but the story's basic outline remains the same

A young British boy sees his father shoot his mother's lover and turns catatonic when his parents force him to suppress dumb and blind kid" is subjected to myriad unsucce cures, sexually abused by his uncle and harassed by his streetkid cousin. As a teenager, Tommy becomes a "pinball wizard" and is declared a genius. He snaps out of his daze when his mother smashes the mirror into which he constantly stares. This miraculous recovery makes him a media superstar, but he eventually rejects the adulation as mean-

The musical represents Tommy's estrangement from his environment by having Michael Cerveris, the rich-voiced and otherworldly-looking actor who plays the full-grown Tommy, appear on stage to voice the inner experience of himself at ages four and ten, played by two younger actors, before he takes over the action

midway through the first act. It is characteristic of McInuff's high octane direction that Tommy can fly. He bounds ten feet in the air to land on top of the mirrored wardrobe in which his younger self stares, and somersaults from the top of the proscenium to the middle of the stage (all supported by discreetly efficient wires). Tommy's excellent staging is

at its best in the overture, an expositional masterwork which, through Wayne Cilento's exuberant choreography, state of the art technology and stagecraft, tells a story that it would take pages of dialogue to communicate. It is filled with visual shorthand as when uniformed actors enact an air lift by jumping through an unseen hole in the stage floor as hundreds of tiny paratrooper images appear on a screen cov-

ering the front of the stage. John Arnone's spare set consists of a series of girders which frame the proscenium, and a few set pieces representing internal location. Crucial to the production's visual affect is a multi-panelled wall of video screens filling the back wall of the stage. The screens flash images which provide settings and comment on the action, representing Tommy's experience.

Diebard Who fans will probably find it jarring to hear the beloved rock'n'roll hymns of their adolescence played by a full orchestra and sung by 27 trained voices, but the score remains as vital as ever.

Tommy bombards the audience with so much aural and little time to wonder what it all means. It is a story that probably made much more sense in the mariluana cloud of the late 1960s. Broadly, it is concerned with the difficulty of leading an emotionally complete life in an uncompassionate, abusive society in which reality and relativity are distorted by the media. These are themes that have increased in relevance in the several decades since Tommy was written, but the production seems less interested in investigating these ing over them.

Anything menacing about the story is played down; pains are taken in casting and direction to make the characters whose actions might seem reprehensible appear sympathetic Uncle Ernie (Paul Kandell) is an alcoholic who cannot control his impulses: Tommy's parents (Jonathan Dokuchitz good-looking middle-class couple: the murder and subsequent denial which set the story in motion are made out to be an understandable crime of passion, soon forgotten.

Clearly the forces behind this production were more excited by Tommy's music and its visual possibilities than its message. They chose to dress up the story in the trappings of a Broadway musical what trappings they are! - but, although it feels great at the time, eventually, there is noth-

# Germany in need of new policy mix

recession. Real gross domestic product is now / expected to fall in 1993 by between 1.5 PERSONAL and 2 percent-VIEW age points;

unemployment will rise; and a turning point may be reached only in the first half of 1994, provided expectations of a sustained economic recovery in the US and a rapid expansion of world trade materialise. The western German economy, to be sure, will not play the role of a locomotive for the rest of European Community in the near future. The hope is that the recession does not become stronger than is now foreseen, otherwise eastern Germany would be

To many, it appears that a quick recovery is impeded by the Bundesbank's high interest rates which have strangled the other EC economies and thus have hampered German exports. But the Bundesbank is not the problem; the real difficulties lie elsewhere.

The biggest problem is fiscal policy. The fiscal deficit has been rising significantly since amounted to 4 per cent of GDP; if off-budget liabilities are included, the deficit was 7 per cent. Public financial transfers to eastern Germany (about DM150bn (£60.9bn) in 1992, equal to 5.5 per cent of west German GDP) will remain high for years to come. Such financial imbalances are not sustainable over the medium term. Hence, strict budget consolidation, with a cumulative four-year cut to bring the structural deficit down to 2 per cent of GDP, is necessary.

Whether or not the "solidarity pact" which political leaders agreed in mid-March puts fiscal policy back on a sound financial path remains to be seen. On the positive side, it is important that decisions on financial transfers to the east and the burden-sharing in the west have finally been taken. However, the chosen approach gives cause for concern.

Priority is being given to sharp tax increases rather than substantial spending cuts. Direct taxes, rather than the

25 April 1993

rect taxes, will be raised (with effect in 1995). The projected saving measures exclude social payments, whereas curbs on financial aids (which account for two-thirds of total subsidies) will remain relatively

Moreover, public indebtedness is going to increase further, as the borrowing limits of the Treuhand and the German Bank for Reconstruction will be raised. All this falls short of a sensible medium-term consolidation programme. The gov-ernment expects the deficit to come down substantially, but this is based on quite optimistic assumptions on nominal GDP expansion in the next four years and on the ability of the public sector to limit the growth of expenditures.

With regard to wage policy, things look relatively positive in western Germany, Recent wage settlements have been moderate and in view of high unemployment rates wage moderation is likely to persist

### The Bundesbank is not the problem; the real difficulties lle elsewhere

for a while. In eastern Germany, however, there is cause for concern. Trade unions insist on a rapid convergence of wages with western levels in spite of the great productivity gap still prevailing. A damaging strike in the metal and electrical sectors is possible next month. Fresh investment may therefore be deterred.

Monetary policy has been gradually eased since last autumn, with the latest cuts in Bundesbank interest rates made last Thursday. A further sharp reduction in key rates is not recommended. Inflation is still high and after the excessive rise last year, annual growth in the money supply (M3) has not come down convincingly to the target range announced for 1993 (4.5 to 6.5 per cent). If the Bundesbank were to give way to pressures at home and abroad and embark on an outright expansionary policy, it would put the credibility of its anti-inflation-

ary policy at risk.
It should also be recalled that expansionary monetary policies have not proved to be particularly successful in the past in overcoming recessions, above all when deep structural adjustments are necessary. A continued cautious easing of monetary policy would lead to a full normalisation of the yield curve later this year.

Germany needs a two-track strategy: consolidation on the budget side and a mediumterm supply-side policy to enable potential output to grow at a reasonable rate. This includes trade liberalisation. deregulation and privatisation, as well as reform of the tax system, to make it more conducive to private investment in the context of high international capital mobility. Germany also needs to overhaul its social welfare system, to reduce costs and strengthen

economic incentives. There is little, if any, co-ordination between these policies and short-term macroeconomic policies. Some measures are under way, but the government's preferred piecemeal actions are resisted by wellorganised interest groups. The recent decision to protect, via subsidisation, so-called "core industries" in eastern Germany is counter-productive and will be ineffectual.

The planned tax reductions, both on corporate profits and on earnings from doing busi-ness, will be combined with a narrowing of depreciation allowances. Such tax reform, if enacted, would therefore have only a minor impact on investment. Moreover, income tax increases agreed as part of the solidarity pact will transform Germany into a truly high-taxation country.

On trade policy, Germany still has to persuade her EC partners and the European Commission that the successful completion of the Uruguay Round is critical, especially in the short run, to restore business confidence about future economic developments.

### Juergen B Donges

The author is professor of economics at Cologne University and a member of Bonn's council of independent economic

t the City of London headquarters Monopolies and Mergers Commission, a handful of experts is hard at most complicated issues in UK competition policy - what to

do about British Gas. The deliberations are being followed closely - not only by the monopoly gas supplier, but by potential rivals in the industry and the rest of Britain's privatised utilities. The MMC report is expected to set a marker for the development of competition in industries privatised during the 1980s and will determine in which areas, and to what extent, the gas market is

opened to new entrants. The commission's discussions will focus on an ambitious blueprint for a fully competitive gas market. The plan. drawn up by Sir James McKinnon, director-general of the regulatory body Ofgas, calls for the division of the company into 12 regional business separate gas-purchasing arm and a pipelines company. So complex are the issues that the commission has postponed its report, due at the end of this month, until the end of July.

Sir James's ideas are radical. His plan is to break up the monopoly structure forced on the industry six years ago when British Gas was privatised as a single entity. The company's dominant position in the market has obstructed the development of competition, Sir James believes. Rivals now supply about 30 per cent of industrial sales, but Sir mes would like to see competition extended beyond the industrial sector.

Ofeas also wants competitors to move into the household supply market - where British Gas holds a monopoly. This is the only way to offer consumers real choice and lower prices, Sir James claims.

Ranged against him are British Gas, many of the North Sea oil operators and the Gas Consumers Council, which represents household customers. British Gas says prices will rise in a more open market. Large industrial users fear they will lose their access to cheap supplies of gas - which are currently subsidised by household customers – if more competition is introduced.

British Gas desperately wants to retain its monopoly over household supply. It has proposed decentralising its operations in an effort to fend off calls for a wholesale break-up. It has suggested to the commission that it split its **Deborah Hargreaves** examines the case for a radical restructuring of British Gas

# Monopoly under the microscope

business into five wholly owned subsidiaries covering sales of gas to the industria market, household supply. pipelines, sales of appliances, and installation and servicing. The company has also offered to dishand its central purchasing arm as a way of diminishing its buying power in the

British Gas receives some support from North Sea oil nanies. Producers such as Shell point to the need for long-term supply contracts to assist the development of gas fields – these may not be available without British Gas's

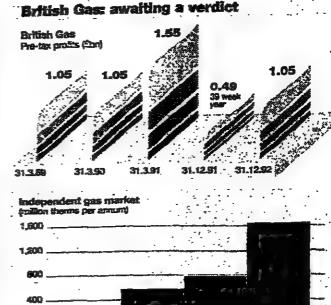

strong buying power.
Shell argues that the current industry structure has served customers well in many respects. Consumer groups agree with this prognosis. The Gas Consumers' Council is sceptical about the benefits accruing to domestic consumers in a liberalised market.

The commission's first challenge is to weigh these arguments and decide whether British Gas's monopolistic power has worked against consumers' interests. If it concludes that the household supply market should be opened up to rivals, it must then decide how this could be done and, if necessary, suggest relevant structural changes. But the commis sion can only recommend not have to follow its advice.

The government has indicated that it would look favourably on a gradual opening of the gas market. Last year, Mr Tim Eggar, energy minister, said he would consider the introduction of competition in bousehold supply in May this year. But the government's plans were thrown into disarray by the monopolies reference last August.

Rival gas shippers are nonetheless convinced that pressures for liberalising the market will be difficult to resist. British Gas has about 25 main competitors in the industrial market and almost all of them have told the commission they are keen to become invoived in sales to households.

Though they differ over how

Jan 1992

should be given access to those customers, the competitors to British Gas do agree that they could offer customers cost savings. Alliance Gas, a joint venture between British Petroleum and Norway's Statoil and Norsk Hydro, reckons that households could save an average 550 a year or 10 per cent of their gas bills if it were allowed to supply them. The company is basing its claims on evidence drawn from sales to the industrial sector, where

au 1991

it currently supplies 6,000 sites. British Gas buys its gas at about 20p a therm and sells it to households at close to 50p a therm, a substantial profit margin which competitors believe they could erode. But the mark-up is not pure profit, counters British Gas. Transportation costs must be added to the cost of the gas, and these are higher for some customers than others. For this reason, the company says 12m of its 18m customers could end up paying more in a liberalised market and only 6m would make a saving.

British Gas believes there would be a political outcry if customers in those parts of the quickly and in what way they country which are the greatest

distance from the gas terminals end up paying substantially higher costs than others. In addition, the company has argued that the flow of gas through its pipelines would be difficult to balance - ensuring

This view is echoed by some industry experts. If anything goes wrong in the system. there will be all sorts of recriminations, with shippers blaming the pipeline company and vice versa. In the meantime, the consumer is going

without gas," said Mr Jona-

than Stern, an industry consul-

that customers get enough gas

on cold days - with no single

company to monitor supply

tant with the Gas Strategies Competitors say these drawbacks are not insurmountable. saying they could provide financial bonds with the regulator so that the pipeline company could draw on the money if rivals fail to meet their supply obligations. "No one worries about the security of supply of, say, milk," said one

The Gas Consumers' Council, however, says it is not con-

bring more benefits to consumers than are currently available from the heavily regulated monopoly. Mr James Cooper, chairman of the council, is also doubtful about whether effec-tive competition is possible in the household market. He believes it is not practical to have several companies competing for customers in a small area because of the huge infrastructure required to service those customers. Large industrial users are

similarly sceptical about the benefits of increased competition. They fear losing supplies of cheap gas in the so-called interruptible market, Interruptible users pay very low prices for their gas in return for being cut off during periods of peak demand - on the coldest days in winter - when their supply is redirected to house-holds. "We're getting ready to fight very very hard to pre-serve the interruptible market," said Mr Anthony Mitchell-Harris, who represents large gas users in the Major Energy Users Council, a lobby group. If competitors were to supply the interruptible customers and so far none do because prices are too low - those large users fear prices would rise. The rival suppliers would not have British Gas's economies of scale or the same need to

they would not be able to subsidise industrial users. British Gas is trying to allay such fears by suggesting the creation of a market in peak gas sales to cover supply in this sector of the market. Injtially, it says, competing sup-pliers could bid for industrial contracts, with the sale going to the lowest bidder. Eventually, a so-called spot market could evolve, where gas is bought and sold like any other commodity. The company is planning to consult its rivals on how this market might

balance demand in the domes-

tic market. In addition, if com-

savings to domestic customers

British Gas will be hoping that such proposals will preempt the imposition of more radical reform. It might draw some comfort from the government's concern to avoid another damaging energy dispute after its controversial coal decisions. Mr Michael Heseltins, the trade and industry secretary, will be aware that he is bound to make enemies whichever way he decides. He is likely to hope that the experts remain embroiled in the complexities of the sector for as long as pos-

### IMPORTANT NOTICE TO SHARFHOI DERS OF NATIONAL WESTMINSTER BANK DIC

ANNUAL GENERAL MEETING 11 am Tuesday 27 April 1993

In view of the damage caused to the National Westminster Hall by the bomb explosion on 24 April, alternative arrangements have been made to allow the Annual General Meeting to take place as planned. The Meeting will now be held at the Porter Tun Room. Whitbread Brewery, Conference Centre, Chiswell Street, London EC1.

Shareholders with any concerns or enquiries are invited to contact the Company Secretary's Office on 071 726 1046

On behalf of the Board

# Survival jeopardised by steel price rise

From Mr T F Barnes

Sir. What business in today's marketplace can increase its prices by more than 40 per cent? Answer: the European steel industry.

We are a fairly typical engineering company supplying fabricated and machined products to a variety of markets from defence to leisure. We have survived the recession to date by prudent management and a shift in emphasis to exports and new products. We employ 50 people. All this

could be in vain now that the steel industry is implementing a 40 per cent-plus increase in its prices.

Our markets are extremely fragile - and our best customers refuse to accept any price increases. So we are faced with a huge, totally unrealistic increase which, because of our purchasing power (5 tonnes a month), we can do little to resist and our large customers

refuse to accept. We have made inquiries in

if we can purchase two or three months' supply from producers there. Consistently we are told that they cannot supply or must be careful on price because EC mills may cause problems for them. So much

for a free market. This increase - reasons for which include huge demand from China and capacity reduction - is nothing more than the result of deliberations of a price cartel taking no notice of the realities of the European countries outside the EC to see | market. Almost certainly

prices paid by China will be extremely low and we are being asked to support the steel mill margins. Apart from being inflationary it hits the medium and small-sized user, the bedrock of UK manufacturing industry.

Are we to support China at the expense of the UK? T F Barnes. managing director B Dixon-Bate. Unit 45, 1st Avenue Deeside Industrial Park. Deeside, Clwyd CH5 3LG

### Future of the Travelcard

From Mr Maxwell Blake. Sir, Why is it that the dere-gulation of London buses should be paid for by their ridera ("Travelcard doomed" April 22)? I use my Travelcard to go by bus where I cannot easily travel by the Underground. Is the Travelcard underpriced? Its "critics" appear to forget that London Transport gets my annual fare upfront; would that all customers were so willing.

Can it really be beyond the wit of 40 or so bus operators (about one bus load, incidentally) to draw up a revenue sharing agreement? It would be more equitable to use the smart-card technology to record individual journeys at the point of sale - that is, the bus - and use that data to apportion the pooled revenue. That at least might encourage some competition between the Maxwell Blake,

McCowan Blake, 119 Bishopsgate, Landon EC2M 3TE

### No remuneration hike at Premier

Sir, Lucy Kellaway's article, "Facts show fat cats are fatter" (April 20) and the letter from Mr Donald Butcher, of the UK Shareholders' Association (April 23), both suffer from a failure to check facts, and from the tendancy for an untruth, once written, to be accepted as

The supposed 50 per cent hike in management remuneration in Premier's 1992 accounts stems from an elementary failure to notice that the comparative period is one of only nine months. When the comparative figure is grossed up to the 12-month period, the increase is 12 per cent. However, this is not due to directors being awarded 12 per cent increases, but that an additional executive director joined Premier in June 1992 and in the previous year another new executive director did not join until September 1991.

The real increase for executive directors for that year and for 1993 was basically in line with inflation - that is, no increase. In 1993, following retirement of two senior executive directors in June and December, total management remuneration is likely to be down by at least 30 per cent. I suggest that in future both your newspaper and the representative from UK Shareholders' Association have the courtesy to check the facts. The old adage about not being able to believe what you read in the newspapers seems true in this situation, but unfortunately in

our case mud tends to stick. C Jamieson chief executive Premier Consolidated Oilfields, 23 Lower Belgrave Street London SWIW ONR

### Bar on age discrimination unlikely in EC

From Mr Bryan Cassidy MEP. Sir, Joe Rogaly's suggestion that we should be thinking of raising rather than lowering the pension age ("Age of the old buffer", April 20) has an attractive logic given the recent Carnegie inquiry projections of 31 per cent of the UK population in the age group 50-74 by 2021, compared with 24 discrimination in employment.

per cent now. But what are we going to do to enable older peo-ple to work more years if they wish to? (Mr Rogaly quotes statistics which show a declining percentage of men aged over 55 as being "economically

I regret that it is unlikely to do so, however, since the Commission, the Council of Ministers and the European parliament all practice age discrimination in recruitment with the full approbation of EC staff unions! Bryan Cassidy, European Parliament, 97-113 Rue Belliard, 1040 Brussels

# Longstanding plea for European technological strategy

From Prof Ian Mackintosh. Sir, Professor Hollerman (Letters, April 22) suggests that, in my plea (Letters, April 15) for a much-increased emphasis on technology in industrial and economic planning, I "could make a stronger

case". But I already have.

In my 1986 book Sunrise Europe (now regrettably out of print). I believe I gave a convincing description of how the European electronics industry got into its mess (now even messier) vis-à-vis the (Research on Advanced Com-

this was followed by an even more convincing prescription of how to get out of it through the increased demand for information technology products and services which would have been created by my proposed pan-European fibre-optic network, Eurogrid,

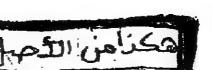

But, as usual, the cry of the technologists was of little avail. Apart from the laboured efforts of the European Commission in setting up the Race

Americans and Japanese. And | munications in Europe) project, there is little sign of my mooted broadband connections to every European home. office, hospital and school etc. Meanwhile, President Clinton is energetically doing just that by actively supporting the US infrastructure investment in "information highways" - or the "USA-grid".

The point, then, is that whereas the views of technologists are important in the formulation of corporate and governmental policies in America,

Japan and elsewhere in Asia, this is certainly not the case in the UK or many other Euro-pean countries. Until we can match their understanding of the salience of technical matters, both in production and use of technological goodies, we shall continue to suffer substantially lower economic growth rates than our transoceanic competitors. lan Mackintosh European Foundation for Technical Innovation,

University College, London

40 mend to

If the Northern Ireland policy supported by all Britain's political parties is correct, it would be quite wrong to waver in it now merely because the buildings heing damaged are in Bishopsgate not Belfast. In discovering the vulnerability

of London's financial district to large, primitive bombs, the IRA has put its hands on a fresh, pow-erful weapon. That does not of itself change the nature of the political problem - it merely adds to its urgency.

These are the issues of principle. But many people, in the City and elsewhere, will find one practical issue more pressing. How great a threat do two huge explosions in a year pose to London's position as a financial centre?

The initial responses of some of the companies most affected by the two giant bomb attacks are reported elsewhere in this issue. On this sort of occasion, however, second thoughts are the ones that count. They will be influenced by a number of factors. First will be the adequacy of the insurance arrangements, underpinned by government guarantee, which were set in place after last year's

The scheme is in its infancy; its enabling legislation has yet to pass through parliament. The government would be right to avoid legalism in its approach to this issue. The important thing is to make sure that the scheme works, and that the state provides the backing necessary for it to do so.

Escape route

A second factor is the way in which changing modern business practices reduce the impact of this ort of disaster. These days, a large business has its files, its intellectual capital, its soul, stored in its computers. That sounds like an added risk.

but in fact it is an escape-route. Providing the computer operators daily, storing copies safely off-site, tive advantage.

and so on - the entire system can be rapidly re-created elsewhere. The third factor is less encouraging. The risk is that the bomb-

ing will be one more reason to view London as different, risky, a piace at the margin, subject to its own unpredictable influences.

There are enough of such forces already at work: the EMS debacle. the Taurus collapse, the City's well-known transport problems, the local authority swaps fiasco even the perennial nuisance of sing through immigration controls at Heathrow.

City's advantages

Until now, these have been far outweighed by London's countervailing advantages: an open, inno-vative atmosphere, skilled labour and support services, welcoming authorities, and a cosmopolitan financial tradition. Two bombs are unlikely to tilt the balance. But it is the future risks that matter; and even with extra security precautions, they will clearly be much greater than they seemed 13 months ago.

Britain's big financial houses are tied to London; so are the handful of leading international ones. It is the smaller, more footloose institutions - the ones that give the London markets their unique breadth and depth - which can choose to vote with their feet. Ensuring that their decisions come down in London's favour will require tighter security precautions, keener intelligence and better use of police resources. But as important will be a renewed determination to focus on the other aspects of the City's compet-

The speed with which the City has coped with the two big disasters of the past year is a tribute to the professionalism of its support staff and the flexibility and commitment of its workforce. Those are among the reasons why London has remained the leading international financial centre. Its chances of retaining that title were high before Saturday's bomb. They remain high now - as long as the government, the City authorities and the leading financial houses display a commitment have been taking routine security not just to London's physical secumeasures - backing up the files rity, but also to its future competi-

# Mr Heseltine's magic lantern

MR MICHAEL Heseltine is personal political risk. He has enjoying himself again. After hard labour in the House of Commons over the future of British Coal, the trade and industry secretary is again doing what he does best -reorganising a Whitehall depart-ment and selling a line in policy.

The central themes of the slide show he premiered to the Financial Times and a group of industry leaders last week are incontestable. British industry is inadequately competitive and the rambling government department which oversees it is unfocused and

ineffective.

Mr Heseltine has a good track record in Whitehall management. At both the Department of Environment and the Ministry of Defence, he improved motivation and efficiency. At the Department of Trade and Industry, he will use similar techniques, overhauling structures and accountancy proce-dures and drawing in private-sec-tor managers to sharpen up performance. "Partnership" has long been a Heseltine watchword and it

is still very much in vogue.

A key aim is to improve communication within the department and between officials and industry, so that the DTI knows what it is talking about. There will once more be teams of officials to analyse the competitiveness of 15 sectors of British industry; data base will speak unto data base in gov-ernment research establishments; a "domesday book" of regulations will be heavily edited; there will be "one-stop shops" around the country to facilitate the transmission of advice and information to business. Mr Heseltine will proclaim these plans with a promoter's flair. Hezza is backing British industry, in export markets and in the cabinet.

Good deeds

It will be some time before the effectiveness of these changes can be judged, but they will certainly be welcome to British industrial ists. The question is whether Mr Heseltine, in his 1990s manifestation, will stop short of the marketdistorting and economically damaging forms of dirigisme with

which he flirted in the 1980s. To judge by deeds rather than words, his record in the last year has been good. He has fought for the right policy on coal, at some the right job at the right time.

resisted the temptation for quick, taxpayer-funded fixes at Leyland

More doubtfully, his strengthened financial support for exporters could result in subsidies for poor business deals, even if the measures are not lavish by international standards. Government selection of "national champions" even in the limited context of bids for export contracts, is a tricky

Competition policy

But the biggest question marks over Mr Heseltine's tenure at the DTI concern competition policy and Europe.

On the former, be insists that there is no change in the Tebbit-Lilley doctrine, to confine competition policy judgments to ques-tions of competition. But doubts have been raised in practice by his decision to overrule the Office of Fair Trading in a couple of recent cases. Since Mr Heseltine shares the view of his predecessors that no public explanation should be given for these decisions, there is a danger that policy will become opaque and arbitrary. With crucial judgments ahead on British Gas and other privatised utilities, this

is worrying. More important still, if Mr Heseltine fosters an illiberal cul-ture of shady ministerial meddling in his own department, it will be reflected damagingly in the councils of the European Community, where DTI ministers play a large role, on everything from energy to

Mr Heseltine's instincts will certainly be to join the political fray on questions such as the future of Airbus and its potential collaboration with Boeing on a super-jumbo project. He looks back with pride at his role in creating the Euro-

pean Space Agency.
On some such matters, minis ters have a necessary role, but there is a risk that Britain is lured towards the unrewarding and out-dated game of picking industrial and technological Euro-winners. More broadly, Britain could blunt its influence as an economic liberaliser, in matters of trade, industry and energy. If he can avoid these pitfalls, Mr Heseltine will show that he is the right man in he biggest challenge for economists today is understanding the

extraordinary success of east Asia. The region has hearly quadrupled per capita incomes in the past quarter of a century - a record unparalleled in economic history. On present trends it may begin to overtake much of the industrialised west early in the 21st century.

If its startling success could be

replicated elsewhere, billions of people in developing and formerly com-munist countries could look forward to improved living standards And the hope, eventually, of eliminating the scourge of grinding pov-erty would seem less quixotic.

Yet the region is as puzzling as three-dimensional chess. It has done far better than conventional theories predict, even allowing for such quantifiable pluses as macroeco-nomic stability, high rates of invest-ment and a focus on exports. There is just no generally accepted explanation for its main distinguishing feature - supercharged rates of productivity growth (see chart).

The puzzle is deepened by the region's lack of homogeneity. The high-fliers are far from being carbon copies. At one extreme, Hong Kong has pursued a broadly free market approach; at the other, South Korea has intervened in just about every way conceivable. And the magic formula for growth has entirely eluded some countries in the region, such as the Philippines,

At the World Bank in Washington, an exhaustive analysis of the "Asia miracle" is nearing completion. Bank staff are distilling les-sons from Japan, the four "tigers" -South Korea, Taiwan, Hong Kong and Singapore - and the so-called "cubs" - Malaysia, Thailand and Indonesia. They have also taken a look at the recent explosive growth in parts of southern China.

The study was undertaken partly at the instigation of Japan, the bank's second-largest shareholder, which has long wanted to play a bigger role in policy design. Japan has been critical of aspects of conventional World Bank/International Monetary Fund prescriptions and, justifiably, believes more attention should be paid to its own outstandingly successful development strate gies - which formed a model for much of east Asia.

In 1991, Japan's Overseas Economic Co-operation Fund told the bank it was putting too much emphasis on deregulation and privatisation and made a case for salective import protection in developing countries and for the use of subsidised credits as a tool in indus-

Mr John Page, a senior member of the bank's Asia miracle team, says the Japanese criticism struck a chord because the results of marketoriented reforms had often proved disappointing in developing economies. By cutting budget deficits, eliminating market distortions and shrinking government, client countries had stabilised their economies. But too often they had not achieved virtuous cycle of rapid growth; they still lay "at the bottom of the league table relative to east Asia". The question became: "What now?"

The bank's benchmark for judging Asian policies is not an extreme free market philosophy, which would have the public sector shun responsibility for just about every-thing bar national defence. It is rather the less controversial "market friendly" strategy set out at length in the bank's 1991 World

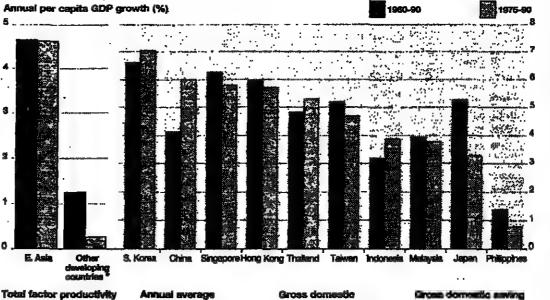

Development Report.

This clearly delineates the role of markets and the state. Development would be fastest, it claimed, when government concentrated on two obs: maintaining macroeconomic stability through conservative fiscal and monetary policies; and investing in people through public educa-tion, training and healthcare pro-

Beyond this, developing countries should rely on market forces. They should create as competitive as possible a regime in industry, commerce and the financial sector. And they should eliminate all barriers to trade and foreign investment. The core idea is that governments **Michael Prowse** on whether east Asia's economic success can be repeated

# Miracles beyond the free market

The east Asian economic miracle

growth (% 1960-87) Inflation rate (% 1981-89) investment (% of GDP) linet Asia (10 countries) \*Low & middle Income countries (56 countries)

should focus on the things only they can do and leave everything else to markets. It turns out that most of the

Asian high-fliers have adopted a more permissive attitude to the role of government. Indeed, Mr Page argues that the success of the region can best be understood in terms of a "strategic growth" model that focuses more on what has to be done to achieve rapid growth than on who should do what.

On the strategic theory, development will be rapid provided countries find a way-of: accumulating capital rapidly; allocating resources efficiently; and catching up techno-

But there is no presumption that any of these functions should be reserved exclusively for the private sector. The miracle economies appear to have used a mixture of market incentives and state intervention in each of these areas: Accumulation. Gross domestic investment averages a startling 37 per cent of GDP in east Asia against an average of 26 per cent in developing countries as a whole. Yet this advantage was not won purely by adhering to the market-friendly approach.

The region has admittedly created a positive climate for business investment by pursuing conserva-tive fiscal and monetary policies inflation has averaged 9 per cent over the past 30 years, less than half the rate in other developing countries. The public sector has also invested effectively in people (enrolment in primary education far exceeds levels elsewhere, as does attention to vocational education). although it has not spent an atypical proportion of national income

But most of the Asian high-filers have also interfered with market mechanisms. They have limited the personal sector's ability to consume and heavily regulated the financial sector so as to ensure a predictable supply of low-cost capital for industry. Mechanisms for forcibly shifting resources from consumption to investment vary - Japan, South Korea and Taiwan, for example, have maintained stringent controls on consumption and housing. The net effect, however, is the same everywhere: an abnormally high

 Efficient allocation of resources. Governments have striven to ensure that the most important market of all - that for labour - is flexible, if not fully competitive. Wages have largely reflected market supply and demand, partly because trade unions have been suppressed. Focusing hard on suc-

It turns out that most of the Asian highfliers have adopted a more permissive attitude to the role of government

cess in export markets has also imposed crucial competitive discipline and prevented domestic prices for industrial inputs moving far out of line with world markets.

Yet bank research indicates governments have also intervened vigorously. While less protectionist than the third world as a whole, few accepted western free-trade principles. Many have used import controls to protect strategic sectors (for example, quotas in South Korea, high tariffs in Thailand) and showered offsetting subsidies on export industries. At one time or another state-owned industries have played an important role in many of the economies, including South Korea, Taiwan, Indonesia, Singapore and Thailand. Many have not hesitated to direct the supply of credit to particular sectors. Both South Korea and Taiwan provided automatic credit for exporters in the early stages of development.

 Technological catch-up. The lesson again is that remarkable productivity growth only partly reflects market-oriented policies. Singapore, Malaysia, Thailand and, to some degree, Talwan, have welcomed foreign investment. Early developers such as Japan and South Korea used other devices, such as licences letting them copy foreign technology. But unlike many other developing countries none tried to rely on home-grown technology.

However, all high-fliers intervened selectively to promote particular industries, with varying intensity and success. The process of trying to shift industrial output towards high-valued-added sectors is described by enthusiasts as "getting prices wrong in order to create dynamic comparative advantage". South Korea provides a wealth of

examples of aggressive and successful intervention. The government's most audacious move was perhaps to create from scratch a domestic steel industry despite foreign donor opposition and lack of private-sector enthusiasm. The state-run business went on to become the world's most efficient steel producer.

An internal bank memo sums up South Korea's record: "From the early 1960s, the government carefully planned and orchestrated the country's development.... (It) used the financial sector to steer credits to preferred sectors and promoted individual firms to achieve national objectives. . . . [It] socialised risk, created large conglomerates (chaebols), created state enterprises when necessary, and moulded a publicprivate partnership that rivalled Janan's.'

Singapore provides another classic example of directed growth. When private sector companies failed to respond to opportunities identified by bureaucrats, stateowned or controlled groups were often pushed to the fore, the memo says. The bank has documented lective interventions throughout the region, even in supposedly free market Hong Kong.

The Asian example poses a dilemma for bodies such as the IMF and the World Bank, especially in former communist countries. Does it still make sense to advocate a form of "shock therapy" - the doctrine that deregulating and privatising everything as fast as possible is the optimum policy? Or should they recommend east Asia's slower more interventionist path to economic maturity? It all depends on whether east Asia's deviations from orthodoxy can be replicated.

There are some grounds for caution. Mr Vinod Thomas, the bank's chief economist for east Asia and an architect of the market-friendly ment activism outside east Asia has produced dismal results. A distinction should also be drawn between the earlier "northern tier" of Asian high-fliers - Japan, South Korea and Taiwan - and the later "southern tier" of Malaysia, Thai-

ntil the 1980s, countries such as South Korea were able to promote exports and protect imports with-out provoking much criticism. But sure for a more level playing field has since grown intense. Broadly speaking, the southern tier of later developers has pursued more market-oriented policies than the first wave of Asian stars, Indus trial interventions have also tended to be less successful. A bank memo describes Malaysia's efforts as "by and large a costly failure" and Thailand's as "largely ineffective".

Less tangible political and cultural factors may also be crucial. Most Asian high-fliers benefited from long periods of stable (if authoritarian) political rule. This encouraged long-term horizons. Public-sector bureaucracies have also tended to be more able and less corrupt than in most other third world countries. Governments were thus unusually well placed to implement development strategies.

Policymakers were also remark-ably pragmatic; if a policy did not work it was rapidly dropped. South Korea, for example, went through several phases. It was relatively market-oriented in the early 1960s. became highly interventionist during the "heavy and chemical industries" drive of the 1970s, and then reverted to greater reliance on market forces in the mid-1980s. No region, it seems, has been less weighed down by ideology or more willing to seek advice from abroad.

The bank has only just begun the politically charged process of drawing conclusions from mountains of research papers. But senior officials believe the study may lead to a new paradigm for development in the 1990s. The evidence confirms that the miracle economies did indeed "do things differently". In many instances, "government played a big role, trade was not open and financial markets were repressed", concedes Mr Thomas.

"If we're right," says Mr Page, "the economic policy arsenal has many more weapons than we sus-pected." Mr Thomas agrees; the lesson from east Asia is that "you need a government guiding hand; you cannot just abdicate development to the private sector". He predicts that the bank will nev more attention to the role of institutions and to the potential for partnerships between the public and private sectors.

The most encouraging aspect of the Asian story, officials say, is that habits and institutions crucial for economic success were created rather than inherited. To raise the social standing of entrepreneurs, for example, South Korea had to overcome its Confucian traditions, which had glorified the scholarbureaucrat. Singapore raised its savings rate from 1 per cent in 1965 to more than 40 per cent today. The implication is that sufficiently determined governments can work similar miracles in other places.

### Have livery, can deliver

■ The time for eating their own words has perhaps arrived for any pillars of the City of London's long-pedigreed establishment who lamented last year's granting of livery-company status to a bunch of parvenus calling themselves information technologists.

On Friday night leaders of the new worshipful company of same were looking forward to spending tomorrow in Honiton, Devon, for the launch of one of the body's pioneering ventures - portable high-tech communications units called Telecentres.

But now the company's master, Mrs Steve Shirley, is volunteering to prove the product's mobility by rescheduling the launch for London. The demonstration model could easily be put on a lorry and delivered to the City ready to operate from Wednesday morning,

### Floater

■ Could peace be near in the Beer War at Britain's Department of Trade and Industry?

As Observer reported last Tuesday, Edward Leigh and Neil Hamilton, both of them Thatcherite ministers at the department, are at loggerheads over regulations that a pint must consist fully of liquid - the frothy head cannot

### be included.

Hamilton wants to get rid of the rule as part of the government's deregulation initiative. Leigh is sympathetic, but as he introduced the regulation in the first place, he wants it saved.

A compromise plan being floated is that pubs should become total regulation-free zones, able to serve beer in whatever measures they liked. There would be no need to check that a pint was a pint, and disgruntled customers could take their custom elsewhere.

Such radicalism has obvious appeal to right-wingers such as Hamilton and Leigh. But it seems unlikely to win approval higher up in the government. Indeed, the plan has the look of being brewed up over a pint or two.

### Clashing shades ■ Meanwhile any supposition of

a deep change in Lady Thatcher's philosophy is an exaggeration. However outraged she may be by the plight of Bosnia's Moslems. she was back in classic form during her visit to Warsaw, whose citizens must be feeling peculiarly blessed by the presence of retired British politicians of conservative hue. In town to open her foundation's

office as well as Forte's new hotel, the former prime minister drummed home to her audiences that they must never, never succumb to the allure of Marxist and Leninist ideology. All would be well in the world, she boomed, as long as the

Ethnic cleansing

frontiers of socialism were being turned back. What may lead the local citizenry

to feel not just blessed but somewhat confused is that in Thatcher's wake there arrived her ex-deputy Lord Howe of Aberayon. whose views on the matter differed in more ways than being voiced in less strident tones. Besides wondering aloud whether

the situation in the erstwhile Soviet Union would not take a turn for the worse, he admitted the west was now less confident about the future than it had been three years ago when the Berlin wall came down.

There was another contrast too. President Lech Walesa, for

reasons best known to himself, gave Lady Thatcher a wide berth. But Lord Howe - attending the But Lord Howe - attending the opening of a Centre for English Legal Studies at Warsaw University, financed by the UK Know How Fund - did get to renew acquaintanceships with Solidarity chiefs he met when he was foreign minister and they were opposition leaders on a visit to Warsaw eight

### Black biting Sixteen months after winning

go through.

control of Australia's Fairfax newspaper group, Conrad Black is embroiled in a second public row with John Kerin, the country's

former finance minister.

After Kerin claimed the bid was against the national interest, Black labelled Australian politicians "venal" and described the bidding process as a "degrading, grotesque charade", but was later allowed to acquire 15 per cent of Fairfax,

and management control.

Now Black is saying he became angry because, during a meeting with then prime minister Bob Hawke, Kerin had assured him that foreign holdings of less than 35 per cent were "piffle", implying that the bid would be allowed to

In reply, Kerin claims that no assurances were given, and insists he would never use such an un-Australian word as piffle.

All good fun, but the back-biting may be a bit academic. Black

admits that the government's 25 per cent ceiling on his Fairfax stake makes the group a sitting duck if Kerry Packer decides to add to his 10 per cent holding.

### Rare document

 Considering that it exists to promote independent non-executive directorships – and is chaired by Sir Adrian Cadbury of corporate governance, no less - Pro-Ned is scarcely a model of openness when it comes to circulating its own annual report and accounts.

Perish the thought, but could one of the reasons be that, just as directors' pay rises are coming in for such sharp criticism, the 1992 figures show the organisation's highest paid director received a healthy 9 per cent increase to a comfortable £77,813?

Since it would appear from the accounts that Pro-Ned is lacking a remuneration committee at the moment, perhaps its board should consider creating one to investigate such questions.

# Pressure on Attali mounts on eve of EBRD annual meeting

Editor, in London

THE European Bank for Reconstruction and Development yesterday pressed ahead with its help the economies of eastern Europe and the former Soviet Union as controversy about the bank's high spending continued to dog Mr Jacques

Attali, its president. As the bank announced an \$80m (£51.9m) loan to Romania to improve its roads and launched a new programme on behalf of the United Nations Development Programme to improve management practices in central and eastern Europe, a senior German politician from Chancellor Kohl's Christian Democrat party called for Mr Attali's removal from the

In a letter to Handelsblatt, the German business newspaper, Mr Karl Fell, spokesman for the influential finance committee of the German Bundestag, also urged Mr Theo Waigel, the German finance minister and current chairman of the EBRD board of governors, to intervene more in the bank's affairs.

Referring to the high cost of fitting out the EBRD's London headquarters, Mr Fell said that "extravagance on such a scale would normally be regarded as a breach of trust" in Germany. He also accused Mr Attali of being "professionally out of his depth".

The EBRD's annual meeting gets underway formally today in London with its board of governors, representing the countries the costs of its City establishment as well as the bank's progress towards assisting former communist countries develop market oriented economies.

It is expected that member countries, if they want to voice criticism of Mr Attali's management style, will save their most forthright comments for a closed session of the board this afternoon rather than express them in the public opening session.

However, Mr John Major, who as chancellor played a key role in ensuring the EBRD would be headquartered in London, is expected to underline the importance of the bank providing value for money when he speaks at today's opening ceremony.

The British government appears to be satisfied with last week's statement from Mr Attali in which he admitted that mis-

takes had been made at the bank. It regards the measures that he announced to reinforce the EBRD's management structure, including the plan to appoint a new budget director, as a good basis for further development.

Some delegates attending the EBRD meeting suggested the bank might emerge strengthened from the controversy, with its forts more clearly focused on assisting the former Communist countries and its members taking more interest in its affairs.

What is important is that the G7 countries are continuing to load new responsibilities onto the bank," said Mr Olin Wethington, a former senior US Treasury official for international affairs in the Bush administration.

Privatisation a priority, Page 2

# EC backs tougher sanctions against Serbs to end fighting

By Lionel Barber in Middelfart, aura Silber in Belgrade and Philip Stephens in London

EUROPEAN Community foreign ministers yesterday put their weight behind tougher UN sanctions aimed at ending the fighting in former Yugoslavia, but left open the option of military intervention against the Bosnian

After two days of talks at Hindsgavi Castle near the Danish town of Middelfart, the ministers pledged to enforce new sanctions which will freeze Serbian assets abroad and clamp down on traffic on the Danube and in the Adriatic Sea, from today.

The EC agreed to consider appointing a new "sanctions supremo" to streamline the multiple international efforts to tighten the sanctions, with the UK favouring an American. Mr Douglas Hurd, UK foreign secretary, said the person needed to be someone able to "knock on every door from the Kremlin to Klev and anywhere else".

Lord Owen, the international mediator, in Belgrade yesterday tried to win last minute backing for his international peace plan from Bosnian Serb leaders. At the end of his five-day diplomatic

blitz returns

to the City

Continued from Page 1

Owen cautioned that the fate of the Serbian people hung on the acceptance of the plan, which divides Bosnia into ten provinces

along ethnic lines. If Mr Radovan Karadzic, the Bosnian Serb leader, rejects the proposed maps, more sanctions will go into force in Yugoslavia, now comprised of Serbia and Montenegro. Lord Owen said: "At midnight New York time today starts a sanctions regime of extreme toughness. Once it starts, it will be very difficult to take them off until there has been total peace and major steps towards the peace plan in Bosnia-Hercegovina

Croats again fought Moslems. their former allies, in several towns in central Bosnia in the face of a ceasefire organised by Lord Owen at the weekend.

The EC ministers expressed grave reservations about using force against the Bosnian Serbs because of unpredictable consequences and the risk of disrupting the United Nations humanitarian effort.

Mr Klaus Kinkel, German for eign minister, said using force, including air strikes, was very risky. "We could pass the point of

The UK, however, appeared to

urday when officials announced Britain was prepared to use force if necessary to protect 150 Canadian troops engaged in humanitarian operations in Srebrenica.

UK officials have said they expect a senior US envoy to arrive in Europe for consulta-tions on possible military options. But Mr Hurd said he did not expect "a cut and dried plan" and said UK support would depend on its concerns about the use of force being met satisfactorily. France, along with other EC members, stressed that the use of force required UN backing. Mr Hurd said later on BBC

radio that any plan would need also to set out clearly the military resources to be employed and its likely impact on the humanitarian aid effort. "I have not seen a plan which covers all of these points," he added.

Despite his own misgivings, Mr Hurd has made it clear to cabinet colleagues that if President Bill Clinton does decide on air strikes it would be impossible not to

In an attempt to salvage the peace plan, Lord Owen met Serbian President Slobodan Milosevic, Mr Momir Bulatovic, his Montenegrin counterpart, and Yugoslav President Dobrica

only 19. "I thought stuff the IRA and we went ahead and did it." But at St Ethelburga's the bells may never ring again. The church, originally built before the Great Fire of London, which survived the Victorian building boom and the Blitz was reduced to rubble. The smallest and one of the oldest churches in London's business district had taken the full force of the blast.

The weedkiller bomb packed into a tipper truck left a crater nearly 20 feet deep and 30 feet

Amongst the destruction there was a touch of humour as an office worker from the Rong Kong and Shanghai Banking Corporation watched paper blowing in the breeze. "Our computer data is all safe, but our files are spread around the City. If anyone sees a piece of paper with our logo ou, could they kindly pick it up and return it to us?" In those early hours of the morning Bishopsgate resembled a sea of glinting blue glass. Two Barclay's bank cash machines were pushed askew in their housings. The window had caved in on a security shop called Bishopsgate Crime Prevention Centre. A sign on the door said: "How secure is your home?"

Ms Janine Barber, and executive director of IndoSuez Aval inSt Helen's Place, just off Bishopsgate and near to the centre of the blast, said: "We got hit by the last bomb, we've just had a burglary and now we have had this so we've learned to cope by

By John Gapper, Banking

THE UK government should follow the example of the US and the Federal Reserve in helping banks to widen their margins to help them raise profitability and maintain lending in recovery, according to Sir Peter Middleton, deputy chairman of Barclays

The Fed has helped US banks to restore depleted capital by establishing a gap between allow for the risks." money market interest rates and

short-term bond yields. That has allowed banks to increase their capital by buying government In one of the strongest warnings yet about the danger of a "credit crunch", Sir Peter said it

would not be very surprising if the banking system became riskaverse in a big way when a need comes for finance for the recov-High street banks' lending to small businesses may be under

threat unless the UK government helps them to widen loan margins and restore their profitability, he added However, the Bank of England

has indicated that it is not likely to try to imitate the US. Banks have limited incentive to use money market funds to buy Treasury gilts at the moment because the yield on such bonds is not high enough.

Sir Peter's remarks, at a lecture given to public-relations practitioners in London, follow widespread concern that banks' losses on small-business lending in the late 1980s will lead them to restrict lending over the next few

Although bankers have denied that. Sir Peter argued that "whatever may be said, there are some areas of lending that are clearly under threat" - even though "money is always available at a

He said: "It is not totally clear that lending to small businesses can earn returns sufficient to

Banks have sustained big losses on small-business lending over the past two years, and Sir Peter's bank made a pre-tax loss of £242m (\$372m) last year after provisions for bad and doubtful loans in the UK of £1.96bn.

Sir Peter's remarks follow a call from Mr Brian Pearse, Mid-land Bank chief executive, in February for the UK to encourage bank lending with measures such as a "loan support scheme giving subsidies for small-busi-

Sir Peter said that banks needed "some of the same attitude and some of the same understanding" on the part of the Brit-ish government. "That is the basis of a relationship that would flourish if it is worked at," he

He said banks had made mistakes in the late 1980s after the relaxation of credit control. He added that many of them "took on excess amounts of risky assets and mistook the result for profits" only to be hit by subsequent

### by west's economic attitude By Charles Leadbeater in Tokyo EAST European governments are

E Europe

frustrated

frustrated by growing protectionism among western states pledged to assist economic reform in the region, several east European trade and economy ministers warned yesterday.

The ministers voiced their concerns during a weekend meeting in Tokyo of ministers and businessmen from the Group of Seven leading industrialised nations and their counterparts from east European and former Soviet states.

The conference discussed proposals to assist micro-economic reforms such as privatisation, small business development and trade promotion in east Europe. But the growing signs of protectionism in west Europe sparked prolonged and heated debate.

Several east European delegates warned that without access to export earnings it would be harder for former communist states to reduce their foreign debts and so stabilise their public finances

Dr Karel Dyba, the Czech economy minister, told the meeting that to attract foreign investment from the west, the eastern states needed access to export markets so that investors could earn hard

Mr Dyba said: "If we are to help ourselves we have to have access to markets. We are worried by some tendencies in some western countries towards more

Mr Bela Kadar, Hungary's minister for international economic relations, said: "We want to speed up the implementation of a free trade agreement within

Europe.
"But", he added, "the propen sity of the west to speed up the removal of trade obstacles seems months.

Western officials conceded that trade tensions were a growing concern. Ms Helle Degn, the Danish minister for development who was representing the EC presi-dency, said trade liberalisation could not proceed as quickly as the east wanted because of sensitivities among some west European industries about low-cost

Ms Degn said: "It would be better to make slow and steady prog-ress towards trade liberalisation rather than take a large step and then meet business opposition."

Mr Andrei Shapovaliants, the Russian deputy economic minis-ter, said the issue of protectionism had been the most vexed.

"We have to export to repay our debts," he said. Mr Shapovaliants noted that most foreign investment in Russia had gone into its traditional export industries such as timber.

oil and gas rather than to develop higher technology industrie which could compete with the According to participants, these public comments were con-

siderably softer in tone than the complaints voiced during the

### THE LEX COLUMN

# Tough prescriptions

It will take more than comforting profits figures to restore drugs stocks to a premium rating. With competition increasing and government regulation tightening past results are an unrelia-ble guide to future prospects. Yet respectable first-quarter figures from the likes of Merck and SmithKline Beecham last week lifted the stricken sector. Friday's correction notwithstanding, drug company ratings may have hit bottom just below the market

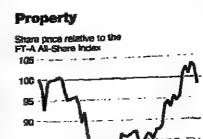

A sustained rally cannot be expected until Mrs Clinton's plans for reform of US healthcare are clearer. Even then, most drugs stocks will not return to the heady rating of the 1980s. That was founded on worldwide sales of pharmaceuticals which, according to Zeneca's pathfinder prospectus, grew at an annual compound rate of 13 per cent. The price component of that growth - perhaps 5 percentage points - is unlikely to be repeated. Regardless of US reforms, buyers of healthcare are getting tough. Following government intervention, drug prices are falling in Japan and Germany. Mar-gins will be squeezed even if volume

growth is maintained. The industry can cut costs, espe cially in sales and marketing. But that will only run so far. Profit margins of 30 per cent, after research and development expenditure, look unsustannable. If volume growth can match the 1980s, drug company prospects might still look better than the market average - but only for those which develop innovative new drugs. The best in the sector may return to a premium rating. Robbed of the ability to hide behind price increases, the rest may never make a full recovery.

### Tarmac

Building material and construction companies have announced some thumping provisions in recent weeks but Tarmac could lay claim to the clear-out cup when it reports its results this week. The UK's biggest housebuilder provisions may exteed £300m. knocking a quarter off the value of shareholders' funds. Yes despite the profusion of red lak, both Tarmac and its sector have been star stock market performers since sterling's devaluation. Tarmac's shares have risen from a low of 53p in September to 140p now; the building materials sector is up by two-thirds.

Investor demand has been fuelled by falling interest rates, the continuing strength of housebuilding starts and

evidence that recent price rises from the likes of Pilkington, Blue Circle and RMC appear to be sticking. Many such companies have high financial and operational gearing ensuring that even small sales and price increases have a startling impact on profits. Savage cost-cutting has also left the sector primed for recovery.

Much of this, though, is already in the price. The prospective rating on both the building materials and construction sectors now stands at a considerable premium to the market. Many companies will doubtless exploit such buoyancy and seek extra funds. Nevertheless, few investors will want to sell such stocks at this point in the cycle. Guessing the intentions of the predatory and cash-rich MB-Caradon will only add spice to the market.

### UK property

New life is surusgling from the rub-ble that was the UK property sector. Last week. British Land issued a 2200m decenture stock following a 2:47m rights issue from Slough Estates, Great Portland Estates and Frogmore Estates have also staged share placings to help fund acquisi-tions. The good reception for these issues makes it likely that a wad of other paper will follow. Companies may want to pay down debt to gain greater financial flexibility. But any enthusiastic shareholders

will be taking a lot on trust despite the sector's recent strong stock market rise. Intuitively, it may seem probable that the bottom of the property cycle has been reached. Yet the latest evidence suggests both rental and capital values are still falling fast. The hope is that rights issues will lessen the compulsion for cash-strapped property companies to sell high-yielding

would not be enough to remove their attractions in the upturn. Fresh capital may also create a self-reinforcing mechanism whereby greater liquidity ensures firmer property values, more secure dividend yields and higher

The theory is debatable. The most certain beneficiaries of fresh capital injections into the property market, though, will be the banks. If the appetite for new equity issues extends to some harder-pressed property develop-ers, this will help firm up some of the banks' shakier loans. New funds may also stimulate the property market itself to the benefit of the UK's two biggest property companies - Barcleys and NatWest.

### Japan

share prices.

The US Administration seems to be causing no little irritation in Tokyo with its apparent attempt to talk up the yen. Having delivered a stimulus to the Japanese economy which was larger than expected, the government had hoped that US officials might ease off on trade. Instead, it seems that some of Mr Clinton's advisers believe that the strengthening yen has prompted a drop in Japanese car sales in the US. They hope that any further appreciation will hit other Japanese exports. Either the Japanese make trade concessions or the US allows a strong yen to do its work for it.

\$450.7

1,027

5....

2.177

Dometry and

\$85: 0.75

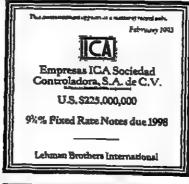

So far, Bank of Japan intervention has managed to hold the the line at Y110 to the dollar. Still, the pain is being felt. Japanese exporters are making some efforts to reduce costs. but deep cuts have been avoided, and companies are loath to give up cosy labour practices. While the currency has not moved as sharply as it did in 1986. Japanese companies are starting with much weaker balance sheets. Lower cost Asian manufacturing centres such as Taiwan and even China are now producing high-quality textiles and commodity electronics which are displacing Japanese goods: A strong currency is a significant brake on the stock market's recent run.

It remains unclear whether a rising yen is the right prescription to solve the trade problem. The imbalance is caused more by a collapse in Japanese demand than by an export surge. Fur-ther cuts in the Japanese discount rate might have more effect - always supposing that US exporters can take advantage of any recovery in the

# SEIZING OPPORTUNITIES

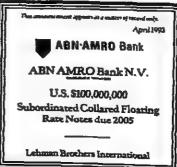

in the debt markets requires a partner with global experience.

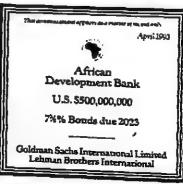

fully in today's global marketplace depends on the experience of your partner in local markets, world-wide. Now, more than ever before, issuers and investors alike face growing uncertainty in fixed income markets. The sheer volume and complexity of offerings, added to daily fluctuations in currencies, intensifies the need for comprehensive and timely data and market intelligence: the kind we provide to our clients across the continent and

IN-DEPTH, INDEPENDENT ASSESSMENTS OF THE MARKETPLACE.

As a major market maker with offices in 35 kev cities around the world, 10 within Europe, we offer clients the widest range of products available in the broadest range of markets, maturities and currencies. Our continuous contact with issuers and investors world-wide, means we are strategically positioned to interpret market information effectively and advise issuers on the best structure

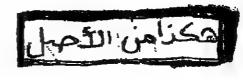

and pricing of an offering. Today, Lehman Brothers indices are recognized as the industry standard for portfolio performance measurement. To take an integrated approach when problem solving, we tap the resources of our entire firm in corporate finance, sales, trading and research. Only then can we develop the most appropriate solution for each client.

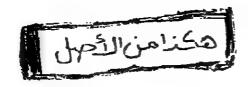

### WORLD-CLASS DISTRIBUTION WORLD-WIDE

Our global salesforce, with access to the world's institutional and individual investors, can place an offering quickly and smoothly. In just the past year, we lead managed U.S.\$7,000,000,000 in European debt markets for clients world-wide. While such volume alone would ensure liquidity for our clients. Lehman Brothers is also a major trader in the active after-market for issues. Our success comes solely from serving the needs of our clients. If you are interested in exploring opportunities in fixed income, we are ready to work with you

eral African countries. ventionist approach by the UK government. The deal has received UK state funding both through regional selective assis-tance totalling around £4m from the Department of Trade and Industry, and through additional finance of £4m provided to the

wood Heath in east Birmingham. The business plan prepared by

the MBO team is far more modest than the failed van strategy developed by Daf in the wake of its takeover of the former Freight Rover van operations in 1987 as part of its acquisition of Leyland Vehicles.

The MBO team plans to concentrate on the sale of basic, lowcost utility panel vans to large UK fleet customers. Trucks buy-out near, Page 18

# \$400m into rising gold market

By Deborah Hargreaves

MR GEORGE Soros, the international currency trader, has agreed to buy a \$400m stake in Newmont Mining, the Denver-based gold mining company, as a way of gaining exposure to the rising gold market.

The company will announce today that funds controlled by the Soros family have bought 6.8m shares in Newmont and agreed in principle to buy a further 3.2m shares at a cost of \$39.50 a share. The shares are being sold by General Oriental Investment which is controlled by Sir James Goldsmith and Lord Rothschild's RIT Capital Partners.

The sale will make Mr Soros the second largest shareholder in Newmont Mining with 13 per cent, leaving Sir James with a stake of about 30 per cent. Mr Soros rose to fame in September as he made a Sibn profit when the UK was forced to leave the

exchange rate mechanism of the European Monetary System. Mr Gordon Parker, Newmont's chairman and president, said yesterday that he "couldn't have magined a better home for the shares, for what it tells the world about sentiment on gold".

The gold market has been improving in recent weeks with the price reaching a six-month high of \$347 per troy ounce on

"We're seeing the confluence of gold as a commodity and gold as money," said Mr Parker. Demand for gold from Asia has been increasing while production has remained steady. At the same time, investors have increasingly been buying gold as a hedge against uncertainty in the currency markets, fear of inflation and economic unrest.

Newmont's shares rose by \$3 In New York trading on Friday to \$45% while trading in gold futures on the Comex was extremely busy.

Mr Parker said that Sir his Newmont stake was consistent with his plans when he bought into the company two and a half years ago. Sir James started selling Newmont shares in February when he placed 1.8m with institutions. At the time, he insisted he was still bullish on

Sir James acquired a 42 per cent holding in Newmont as part of a deal with Lord Hanson in October 1990.

purchase price, working capital, and financing of dealer stocks. Equity in the venture is understood to total around £7.5m in both ordinary and redeemable preference shares. The deal marks the first rescue

of part of the Levland Daf truck which plunged into receivership of the failed UK Leyland Daf

Patrick Harverson looks at a shift in power as takeover experts lose status Bond traders take over the reins of Wall Street

7 ALL STREET'S bond traders are on a roll. Not only have they been bringing in billions of dollars of revenues for their employers in recent years, and millions of dollars in salary and bonuses for themselves, but they have also taken a firmer grasp of the reins of management on Wall

Their rise is a turnround from the 1980s, when the investment bankers from corporate advisory and mergers and acquisitions (M&A) departments, who put together the multi-million dollar transactions and earned the multi-million dollar fees, ruled the roost. Revenues from the M&A business have tumbled over the past few years, and with them the status of corporate advisers and dealmakers.

Recent managerial changes at big firms illustrate how the power base on Wall Street has

In the most interesting move, Morgan Stanley surprised Wall Street in early March by announ-eing that Mr John Mack was replacing Mr Robert Greenhill as president of the firm. Mr Mack emerged from the bond trading naving run Morgan Star ley's fixed-income securities operations for six years. His predecessor was a veteran investment banker, and one of the top M&A advisers of the 1980s.

Later the same month, a management shake-up was announced at Merrill Lynch. After the firm had created two management committees and moved executives, analysts labelled Mr David Komansky, the head of Merrill's bond operations.

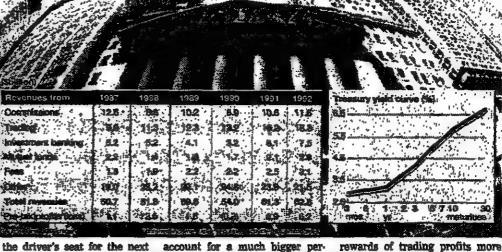

was given charge of both debt and equity trading and sales, and was promoted to the new office of the chief executive.

Finally, at the end of March the investment bank Lehman Brothers named Mr Richard Fuld, a former bond trader, as sole president of the company, Mr Fuld's appointment left his former co-president, the M&A veteran Mr Tomilson Hill, out in the cold. Mr Hill promptly As Mr Michael Flanagan, an

analyst at Lipper Analytical in New York, says: "Just from the examples we've seen over the past few months, the emergence of the bond trader as a manager on Wall Street is more than a coincidence." Mr Perrin Long, securities

industry analyst at First Michigan, agrees. "Bond traders, and traders in general, are getting more power. We saw that, for example, with the recent shifting around of the second- and thirdtier levels of management at Morgan Stanley. And to some extent it's the M&A people and the deal-makers who are losing out."

r Long, however, says there is nothing there is nothing unusual about this power shift on Wall Street. "If we go back to May Day [the aboli-tion of fixed brokerage commissions in 1975] and the 1970s, the big guns were from the research department. They then went away, and in came the M&A peo-ple during the 1980s, and they had their day in the sun. Now it's the bond people who are having their day in the sun. They will be

in the driver's seat for the next couple of years, at least until interest rates come back up.

Low US interest rates and the steepening of the yield curve (the widening in the differential between yields on short- and long-term government securities) have been key elements in the traders' success

Low rates have reduced firms' total interest costs, which despite large debt loads are now shrinking to 1987 levels. And the steep yield curve has allowed traders to borrow cheaply at the short end and use the money to buy longer-term assets that not only earn higher rates of interest, but which also have been appreciating considerably in value because of the booming bond market.

this lavourable climate bond traders have thrived. According to Mr Long, trading revenues at Wall Street firms reached \$16.3bn, up from \$9.9bn in 1988. Over the same period, however, revenues from the M&A business have tumbled.

In 1968, at the height of the M&A boom, Wall Street's invest-ment bankers brought in \$1.37bn of fees from M&A transactions. By last year, fees were just \$217.3m. Trading revenues now centage of total industry earnings. In 1988, earnings from trading accounted for about 19 per cent of industry revenues, while investment banking revenues (which include M&A, underwriting and corporate advisory fees) accounted for about 10 per cent of the total. By 1992, trading contributed 26 per cent of revenues, while the share taken up by investment banking had risen to

only 12 per cent.

Now that they play a greater role in generating profits, it is no surprise that traders are assuming more power on Wall Street. Yet does this mean that firms will now concentrate their energies more on their trading businesses, and less on the tradiclients? Such a strategic shift would make the industry's earnings, already very volatile, even more prone to sudden swings.

n emphasis among Wall A Street nrms on account, for their own account, Street firms on trading however, is not a particularly new development. Since the mid-1980s securities houses and investment banks have increasingly pursued the shorter-term

rigorously than they have the longer-term returns from client relationship banking. The arrival of the traders at the top of the management tree can be seen as the culmination of that process. As for the danger of increased earnings volatility, Wall Street firms are well aware of the poten-

In the past few years many of

the biggest players in the indus-try have added a new dimension to their earnings profile by aggressively building up a presence in asset management - an area traditionally dominated by the big mutual funds and money managers. The asset management busi-

ness has grown quickly. In 1985 the feas Wall Street firms earned from managing client accounts totalled \$947m. Last year, the business brought in more than

So does this mean that executives from the asset management will eventually take their turn at the top, perhaps after the trad-ers? It is unlikely, says Mr Long, who adds, only half joking, that asset management "just isn't a sexy enough business for Wall

THE environment is a bit like

his March Budget, Britain's chancellor Mr Norman Lamont cited last year's agreement in Rio de Janeiro on a new UN convention on chimate change as the reason for imposing value added tax on domestic fuel and power from 1994 and for UK government plans to increase road fuel duties by an average 3 per cent a year in real terms in future Budgets.

Less than a month later, Mr Lamont was in Tokyo at the Group of Seven finance and foreign ministers' meeting to decide western help for Russia. Although Mr Lamont's Budget speech had referred to the possible need for further co-ordi-nated international action on global warming, he and his G7 colleagues failed to consider any such plan when working out how best to help Russia.

Admittedly, Russia's prob-lems of slumping output, incip-lent hyperinflation and policy gridlock were and are pressing. Moreover, the perceived need of the West to provide speedy support for President Boris Yeltsin probably precluded an elaborate link between western support for economic reform and action to clean up Russia's But Mr Lamont's Budget

efforts to halt global warming". If it is that important, it clearly merited being taken into account in the discussions over Russia's eco-

speech referred to the Rio con-

vention on climate change as a

"milestone in international

The reason why is spelt out

A cool look at global warming

in a recent work\* from the Paris-based Organisation for Economic Co-operation and Devel-opment. This makes clear that efforts to control global warming by limiting the emission of greenhouse gases can-not succeed if they are con-fined to the industrial

countries. Russia and the other former communist countries of the Soviet Union and eastern Europe have – alongside India and China - a key role to play in limiting the output of car-

ness-as-usual basis, the OECD projects that China and India, with their much larger populations and relatively unsophisticated technologies, will increase carbon emissions by an annual average of 3.7 and 3.9 per cent respectively in the period from 1990 to 2050. By contrast, the growth of carbon emissions in the former Soviet Union is projected at 1.4 per cent a year on average. In the OECD area, emissions would

grow by 1 per cent a year if no action is taken.

**Economics Notebook** By Peter Norman

bon dioxide, the most impor-tant man-made greenhouse gas, in the next 50 years. Using an econometric model, known as GREEN, the OECD

has concluded that its 24 industrialised member states would need to cut emissions by 44 per cent compared with the level that could be expected on a "business-as-usual" basis if they were to act alone in the spirit of Rio to stabilise their CO<sub>2</sub> emissions at 1990 levels in the period to 2050. But this effort, which would inevitably cost output, would reduce world emissions by only 11 per cent from what they would

otherwise be.
"Thus", the OECD says,
"action to tackle the climate change issue must involve the major non-OECD countries emitters - China, India and the former Soviet Union."

At first sight, Russia is not the biggest problem. On a busi-

On the other hand, Russia and the other former Soviet republics top the international league table for subsidising domestic energy prices.

The OECD study makes clear that only the western indus-trial countries actually tax energy. Coal prices in China and India are kept lower than marginal costs. At the time of writing, the administered oil prices in the former Soviet Union were only a tenth of the world prices because recent increases in the official oil price had been offset by successive rouble devaluations. Russia's domestic oil prices have fluctuated wildly in relation to the world price in recent months but are now estimated at only 4 per cent of world prices compared with about one third last autumn.

The OECD study estimates that worldwide energy subsidies (net of taxes in the industrial countries) amount to \$235bn in 1985 prices and exchange rates, which is equiv-alent to a subsidy of \$45 per ton of carbon pumped into the atmosphere. Subsidies in the former Soviet Union alone totalled \$163bn, an implicit subsidy of \$175 a ton of carbon produced, it says.

Eliminating energy subsidies worldwide could go a long way to cutting carbon dioxide emis-sions. Calculations based on the GREEN model suggest that such a reform would cut world emissions by almost 20 per cent below business-as-usual levels in 2050 while also raising the real income of many non-OECD countries by improving the efficiency with which energy resources are used. US and UK officials argue

that the international Monetary Fund's economic reform programme for Russia should go some way to reducing such subsidies as Russia brings its energy prices into line with world market levels.

But if — and it may be a big if — we are to take global warming seriously, it is difficult not to conclude that the G7 missed a trick in its recent negotiations in Tokyo.

Although it is always possible to dispute the assumptions behind, and results from, econometric exercises such as GREEN, the OECD's figures suggest that a huge effort will have to made in both the industrialised and non-industrialised countries to limit

emissions of greenhouse gases. Making the environment a clear part of the G7 assistance for Russia would have pro-vided a useful precedent for the international co-operation agreements that will be needed to turn the aspirations of last year's Rio earth summit into reality.

### All Nippon **Airways** plans to cut dividend

By Paul Betts, Aerospace Corre

ALL NIPPON Airways (ANA), Japan's largest airline, is plan-ning to cut its dividend in the face of the downturn in the international and Japanese strine markets.

The airline expects to report sharply lower net profits of around Y3bn (\$27m) for the year ended March, 1993, against a profit of Y7.6bn previously.

Profits are expected to

remain under pressure during the next two years, Mr Isao Yagt, ANA's corporate planming director, said.

Mr Taiji Rameyama, ANA's
bead of international relations, warned the dividend was likely to be trimmed. "It

represented 10 per cent of the face value of the shares last

year; this percentage will most probably be reduced this year," be said.

The airline is embarking on rationalisation and cost-cutting, including increased use of aircraft leasing, the reduc-tion in the annual intake of new recruits, the possible hir-ing for the first time of lower-cost foreign cabin attendants, and the redeployment of cor-porate headquarters staff to sales and marketing functions.

Faced with a Y10bn increase in interest charges, the afrline is reining back its 1991-35 cap-ital spending programme from Y1,300bm to Y1,000bm, and is delaying the introduction of

The airline's international operations lost money last year while domestic operations were profitable. Empty seats, Page 19

# Deal soon on Leyland trucks

By Ian Hamilton Fazey, Northern Correspondent

A £40m-plus deal, including the management buy-out of Leyland Daf's Lancashire truck factory, is expected to be finali-sed this week following agreement over the week end by Barclays Development Capital to provide all the equity

An equity injection of £5m was the final piece needed to complete a complicated package involving the company's management, clearing banks, Barclays Development Capital and Lancashire Enterprises.

Coopers and Lybrand, the management's principal adviser, will today start what it hopes will be final negotiations with Arthur Andersen, the Leyland Daf receiver. The aim is to complete the deal

If successful, the buy out would secure the 900 jobs remaining at the truck factory in Leyland, Lancashire. Nearly 1,200 jobs have been lost there since Daf's parent company in the Netherlands went into receivership in February. If the factory was to close, it would leave a gap in Dal's range of trucks in Europe.

Under the deal now proposed by Coopers, Lancashire Enter-prises - the privatised industrial development arm of Lancashire County Council would buy the 230-acre site and 1.8m sq ft complex of factory buildings from the receiver. It would then lease back 800,000 sq ft of factory space to the truck company's management - which is all the truckmaker says it will need - and develop

the rest as a science and tech-

nology park.

The values of individual elements of the deal have not been disclosed but Mr Tony Hyams, director of the Manchester office of Barclays Development Capital, put the total between £40m and £50m.

Management would buy the husiness and other assets such as equipment, stock and work-in-progress - needed to run it, but would be free of the burden of having to buy land and buildings, the bulk of which it does not need. Most of the management's

deal would be financed with bank loans. It has been talking with Barclays and NatWest. The package envisages deferred terms for the buyout, involving a large down payment, of which the equity injection is an important ele-

ment. Staged payments would

funded from cash flow. The company has sufficient contracts with the British Ministry of Defence and Daf dealers throughout Europe to guarantee future payments, provided it can keep trading.

Lancashire Enterprises is confident about marketing the site, which is strategically well-placed near the M6 motorway south of Preston. There is a large pool of skilled local labour because of the concentration of delining and defence industries in the area

Mrs Louise Ellman, leader of Lancashire county council and deputy chairman of Lancashire Enterprises, said: "This deal would maintain truck production in the area and safeguard thousands of jobs among suppliers, many of whom are local-

### £150m tag on Field in summer flotation

By Andrew Bolger

FIRLD GROUP, one of the longest established and biggest carton packaging compa-nies in Britain, will come back to the stock market through a flotation in the summer which is expected to value it at about

Field was first listed on the stock exchange in 1929, but has had a series of different owners since being purchased by Reed in 1965. In 1988 it was sold as part of the management buy-out of its parent's packaging interests, Reedpak, which was in turn acquired in 1990 by SCA, the Swedish

paper and packaging group. The recession caused SCA to sell Field in 1991 through a £109m management buy-out led by Mr Jim Gilchrist, the company's chief executive

In spite of these changes of ownership, Mr Gilchrist said the business had continued to grow steadily and now had 14.5 per cent by value of the UK market for folding cartons. Field's cartons are used to package brands such as

Kodak, Cadbury's Milk Tray and Chivas Regal, and a significant proportion of its output is exported. Sales for the year to April 4 are estimated to have grown from £124m to not less than £135m.

The group employs about 1,900 people and has six manufacturing sites in the UK and one in Belgium. Some 600 employees participated in the 1991 buy-out, which was organised by CINVEN, the venture capital arm of the Coal Board pension fund, and Barclays Bank among others.

Mr Gilchrist said: "By focusing on market sectors with international exposure such as confectionery, drinks, tobacco and pharmaceuticals, Field has proved resilient to the recession, increasing sales by an average of 11 per cent per annum over the last five Vears.

Field is to use the proceeds to belp it expand steadily in higher-margin areas such as

# Changing image at Pearson Ray Snoddy looks at its strategic move towards TV HE Thames Television totally new departure. The those two figures. executive said with a publishing group already has The programm

smile that Pearson had "started wearing its hair just a shade longer."

He was referring to the planned acquisition of Thames by the publishing, banking and industrial group noted more for caution and a rather conservative outlook than getting involved in racy and high risk businesses such as indepen-Dent television production.

Yet with irrevocable undertakings already given for Thora EMFs 58.85 per cent stake in Thames at 200p a share, Lord Blakenham, chairman and chief executive of Pearson, will soon find himself in control of Rumpole of the Bailey, the smutty double entendres of the Benny Hill Show and Arthur Daley's Minder.

But why should Pearson want to buy Thames when its principal asset, its broadcasting licence, has already been lost to Carlton Communications, and why should Thames be seen as a "nice little earner" worth just under £100m? Many of its remaining assets, programmes such as This is Your Life and Wish You Were Here, have been around a long time and could be replaced by ITV at any time after the end of

this year. Pearson's decision to buy what is now the UK's largest independent producer is not a

stakes in BritishSky Broadcasting, the satellite television venture, and in Yorkshire Tyne

Tees Television. However, last autumn the Pearson board took a strategic decision - that it had to have a more central role in visual media to complement its profitable but mature print based companies such as the Financial Times and Penguin

Books. Although Pearson has no plans to dispose of its oil services and fine china businesses at least for the foreseeable future - the company is likely to move towards being a more tightly focused media and entertainment group.

gainst such a background Pearson and 1 Thames were destined

to meet. Parts of the Thames deal are easy to value - others much less so. Apart from a net cash balance of £13.8m there is the recently revalued £20m stake in the Astra satellite system and freehold studios at Ted-

The Thames programme library of more than 10.000 hours has been variously valued at amounts ranging from £18m to £80m. Mr Derek Hunt, the retiring finance director of Thames, insists the truth deflnitely lies somewhere between

The programmes already being shown are the UK Gold Library Channel launched on satellite by Thames and the BBC. A second channel of general entertainment aimed mainly at women is expected in the autumn

Programme making is even more difficult to value. ITV will pay
Thames more than £40m this year for its programmes, many of them in the ITV top 20, but so far no longer term contracts have been signed. Rating winners such as the three times a week police series The Bill are likely to have a considerable life on ITV. Thames longer term success will depend on its ability to come up with new ideas for sale to UK broadcasters and international markets. But even if a fraction of the hundreds of televison channels now being promised actually materialise, then there will be a growing demand for pro-

grammes from those who own the rights in them. Thames represents the core of a ready-made television division for Pearson. But Mr Frank Barlow, managing director of Pearson and current chairman of BSkyB, clearly sees it as something of a beginning. Stakes in other broadcasters around the world and the launch of new international

channels could follow.

# Anagen valued at £40m in June float

By Norma Cohen,

ANAGEN, a biotechnology company with no sales to date, plans to raise about £10m through a flotation in June. About 25 per cent of the company's capital will be sold in the float through its brokers Albert E Sharp, giving a total market valuation of

Anagen is developing a line of automated medical diagnostic systems follow-ing development of a fully automated

immunoassay system.

The initial product, to be known as AN2000, is a fully automated immunoassay system which is an ultrasensitive method of measuring the presence of cancer markers, fertility hormones and other substances in blood.

Mr Mervyn Sennett, managing director, said the company will not be ready for commercial production until November 1993 although its product is currently in

pre-production. Its development costs - so far at £14.5m

 are financed by a consortium of venture capital firms led by Schroder Ventures and including CINVEN, the venture capital arm of the Coal Board pension fund, Electra Capital, Norwich Union Venture Capital and Questa.

Anagen has signed a marketing agreement with Organon Teknika, a subsidiary of Dutch pharmaceutical chemicals company Akzo. Teknika already markets a line of tests for such diseases as hepatitis and HIV, considered complementary with the product line contemplated by Anagen.

### **18%** rise for British **Assets Tst**

OVER THE six months ended March 31 1993 net asset value of British Assets Trust rose by 17.9 per cent to 105.9p. in particular the trust bene-

fited, as a consequence of sterling's devaluation following exit from the ERM, from holding overseas assets. A year earlier at March 31 1992, net asset value stood

On the revenue side the half year produced a total of of 2.71p (2.32p). A single final £14.6m. against £15.7m. Net dividend of 2.7p is being recomavailable for ordinary worked mended, compared with a total £2.05m (£1.74m) including

### Jove Investment capital growth

At February 28 1993, net asset values of Jove Investment Trust had shown increases Per capital share the growth was from 29.04p to 38.38p and per income share the rise was from 51.5p to 51.84p.

The revenue account showed total income at \$1.52m (£1.55m). Earnings per share were 5.94p (5.59p) and a dividend of 5.6p (5.4p) has already

### Schlumberger

### SCHLUMBERGER FIRST QUARTER 1993 EARNINGS

New York, New York, April 21 - Schlumberger Limited reported today million and earnings per share were \$0.55, a decline of 15% over the same period last year. Operating revenue was \$1.60 billion, up 3% over one year ago. The extraordinary item was a charge of \$248 million or \$1.03 per share relating to adoption of the new accounting standard for post-retirement benefits beginning January 1, 1993.

Active drilling rigs worldwide were level with one year ago. The 18% increase in rigs in North America was offset by declines in the rest of the world. The 8% increase in Schlumberger Ollfield Services revenue can be attributed to the acquisitions announced at the end of 1992. Firmer gas prices, which are behind the rise in officed activity in North America, seem to indicate that the supply of natural gas is now closer to demand than at any time in the last decade. This situation will result in continued improvement in results in all of our North American companies led by Wireline & Testing and Dowell (now 100% owned).

Measurement & Systems revenue decreased 4% due primarily to a significant weakening in the European economy and despite a strong performance at Automatic Test Equipment.

According to Chairman Euan Baird, The continued strength and growing importance of the industrialized nations of Asia coupled with the slowly improving conditions in the United States give the perspective of real growth in the world economy as a whole later this year. The resulting increase in energy demand should spur renewed exploration and development activity worldwide in 1994".

# Packer, Murdoch in joint satellite TV licence bid

TELECOM Australia, the government-owned telecommunications carrier, has joined forces with News Corporation, Mr Rupert Murdoch's US-based media group, and Mr Kerry Packer's Channel Nine televi-sion network to bid for Austra-lia's first satellite television

If the bid is successful it would establish Mr Packer, proprietor of the Consolidated Press Holdings media group, as the dominant force in Austra-lian commercial broadcasting. It would also mark the return to Australian broadcasting of News Corp, which controls 70 per cent of daily newspaper circulation through its News subsidiary.

The consortium said other investors might join the con-sortium before the end of the week - the bidding deadline for two four-channel satellite broadcasting licences being

offered by the government.
Australia's two other commercial television broadcasters are believed to be seeking a role in satellite television, as are a number of US media groups, including Time Warner, Times Mirror and the

Los Angeles Times.
Independent Newspapers. the Irish newspaper and a sub-scription television group run by Mr Tony O'Reilly, chairman of Heinz, the US food manufacturer, have expressed a wish to become involved.

The inclusion of Telecom gives the consortium signifi-

cant technical flexibility if problems emerge in the development of the digital transmission system which will be a

condition of both licences. The formation of the consor tium clears the way for a USbased bid for the second licence, which was reserved for new entrants in an attempt to reduce the concentration of Australian media ownership.

The uncertainty about the shape of subscription television services adds to confusion about the future of the John Fairfax Holdings newspaper group, the main competitor to News Corp.

The government agreed last week to allow The Telegraph, Mr Conrad Black's UK newspaper group, to increase its shareholding in Pairfax from 15 per cent to 25 per cent to "safeguard" its investment.

In spite of its small shareholding. The Telegraph has management control of the group, which publishes the Sydney Morning Herald. The (Melbourne) Age, the Austra-lian Financial Review and Business Review Weekly.

Mr Packer recently acquired 10 per cent of Fairlan, but is unable to launch a takeover bid unless he reduces his controlling stake in the Channel Nine network to less than 15

per cent.

An article published last week referred to Mr Dan Colson as deputy chairman of The Telegraph. In fact, Mr Colson is vice-chairman of the board. The deputy chairman is Sir Frank Rogers.

# Mitsukoshi slips into red as sales fall 3.9%

By Charles Leadbeater

MITSUKOSHI, Japan's most famous department store yes-terday reported a Y2.16bn (\$19.5m) pre-tax loss for the year ended February.

The company blamed the fall in consumption plus a shift away from the luxury goods which Mitsukoshi is famous for. Mitsukoshi is facing tough competition from a string of newer retailers.

The results reflect the difficulties which Mitsukoshi has had in cutting costs in the face of a downturn in sales. It is bearing a heavy depreciation charge for aggressive expansion in the late 1980s.

The Japan Chain Store Association yesterday reported that sales last month were 4.6 per cent down from the year before, the seventh consecutive monthly fall. The decline was led by a 34 per cent fall in sales of household goods.

Mitsukoshi swung from s Y10.9bn pre-tax profit to the Y2.16bn loss on a 3.9 per cent

decline in sales to Y842.4bm. Mitsukoshi said it would pay an unchanged annual dividend of Y6 per share. It forecast it would move back into modest profit in the coming year.

Mitsukoshi's vuinerability to

a fall in sales contrasts with Daimaru, another department store operator, which reported a 23.2 per cent fall in pre-tax profits to Y4.6bm on a 6.3 per cent fall in sales to Y569.500

Matsukaya department store group reported pre-tax profits for the year to the end of Feb-ruary fell to Y3.8bn from Y10.2bn in 1992 on sales of Y491.3bn, down from Y501.9bn. Nagasakiya, the leading supermarket chain, reported a

consolidated pre-tax loss of Y2.37bn in the year ended February, its first loss since listing on the Tokyo stock market in 1963. It sales were 2.8 per cent down at Y494.52bn.

### Court gives go-ahead to Marriott bond group

By Nikki Teit in New York

A US court has declined to dismiss the fraud suit brought by certain bondholders of Marriott Corporation, against the hotel and food services group. The bondholder group is led by PPM America, the Chicagobased US fund management arm of Britain's Prudential insurance group.

The controversy centres on Marriott's plan to demerge its financially-healthy lodging business, leaving behind a company which retains the

property assets and the bulk of the group's large debts. The PPM-led bondholders alleged that Marriott sold them debt securities in the spring of 1992, when it knew of the plan.

Marriott, which announced the plan last autumn, sought to have this suit dismissed. Judge Aexander Harvey, in the US district court in Maryland, denied to dismiss four counts of the complaint but dismissed a fifth count. This allows the PPM-led bond-

holders to go ahead with the

pre-trial "discovery" process.

# Empty first class on All Nippon Airways

Paul Betts on the response to dwindling domestic demand at the Japanese airline

A ll Nippon Airways, Japan's largest airline and one of world's biggest, suspended for one day its first class service on its London to Tokyo flight last Sun-day because there were no fee-paying first class passengers. On its Tokyo to Sydney route it has discontinued first class. And on its recently-launched Tokyo to Shanghai service it has decided to offer only business and economy class.

ANA has been hit by the tur-Chrysler said the sale of moil in the international airline market as well as at home 15.5m shares left it with a by the downturn in the Japa-nese economy. "We've seen a big decline in first and busiholding of about 35m shares in the Japanese vehicle manufacturer and cut Chrysler's stake from about 5.9 per cent to 4.1 ness class passengers of between 10 per cent and 20 per Chrysler has been gradually reducing its Mitsuhishi stake cent depending on specific routes," said Mr Isao Yagi, the as part of a plan to concenairline's corporate planning trate financial resources on its own motor operation. In March last year, Chrysler director. "As a result we are thinking of discontinuing first class service on certain

routes," he added. The rationalisation of the airitne's first class service is only one relatively small aspect of a broad series of measures ANA is undertaking to adapt its operations to difficult times. Although the airline remains one of the few big international carriers to remain profitable, it expects net earnings for the year ended March, 1993 to have fallen to

about Y3bn (\$68.5m) from Y7.6bn in 1991-92. Profits are likely to come under even greater pressure during the next two years. "We are going to make the maximum effort to achieve another Yen 3bn profit next year but it's going to be tough," Mr Yagi said.

The airline's shareholders are expected to approve in June the appointment of Mr Seiji Fukatsu as ANA's new president and chief executive. Mr Fukatsu, head of the airline's domestic Air Nippon subsidiary, will take over from Mr Akio Kondo, who is to become vice-chairman.

expected to place the emphasis on rationalisation, unlike Mr Kondo, who presided over the airline's international and domestic expansion during the past 614 years. Senior ANA officials

The new chief executive is

cknowledged that the costs of Japanese carriers have been too high.

However, they explained it was virtually impossible even in hard times to adopt the same sweeping approach to restructuring and job cuts as airlines in other parts of the

ANA has established a task force to study ways of improving efficiency, cutting costs

while increasing revenues in the difficult climate. Senior ANA managers indicated that cost saving measures could include the hiring for the first time of lower cost foreign cabin attendants and a reduction in the traditional annual intake of new trainee recruits. It has started relocating beadquarters staff to sales and marketing tasks to strengthen the airline's marketing and sales operations.

We are also trying to contract out some of our functions and have postponed the delivery of some new aircraft on order," Mr Yagi explained. ANA is cutting back its 1991-95 capital expenditure plan from Y1,300bn to Y1,000bn. It is resorting increasingly to leasing rather than purchasing aircraft. The airline is considering

trimming its dividend.
The aim of ANA officials was to improve competitiveness by reducing costs close to the level of rival US carriers. However, they conceded it would be difficult to bring Japanese costs down to those of other

The strategy is likely to slow down the rate of the airline's international expansion. ANA, whose operations have been centred in Japan where it has a 58 per cent share of the domestic market, started

Asian carriers.

ANA has postponed the delivery of some new aircraft

expanding into the international market in 1986. With a network covering 18 international destinations. Mr Taiji Kameyama, ANA's head of international relations, said the company's international route expansion was complete. The next step will be to increase the frequency of services on some of these routes. In the shorter term, the airline sees the biggest potential in the Asian and especially Chinese markets.

The company is slowing down the expansion of its

and has suspended plans to open a hotel in London. The airline's strong presence

in the domestic market has helped it weather the downturn better than Japan Air lines, its rival which relies on international services for 70 per cent of its business. But growth has slowed down in the Japanese airline market after averaging about 10 per cent a

year during 1985-90. "For the first time since 1985 we had a small decline in domestic passenger numbers in our fiscal year to March 1993," Mr Yagi said.

In spite of a 0.3 per cent fall in domestic passengers to 33.3m. these services remained profitable last year. By contrast, the interna-

tional operations facing fierce fares competition lost money, although passenger numbers rose by 7 per cent to 1,574,201. ANA expects competition on international services from Japan to intensify during the next two to three years with at Tokyo and Osaka offering greater access for rival international airlines to fly into the

Japanese market. Our domestic services will continue to be in the future our core business," Mr Yag

extremely slow.

# Inflation news helps ease the recovery blues

THE gilt market shrugged off the economic recovery blues, but is thought susceptible to further attacks of this debilitating illness in the weeks

The first sign of this could come as early as today when the Central Statistical Office announces figures for growth in UK output in the first quarter. Should this lead to the first hard evidence that the UK recession is over, watch out for cries of alarm from the gilt market which could affect this Wednesday's big gilt auction.

Last week's rash of economic data gave further signs that a slow upturn may be on the way, a development that gilts traders reckon could kick off a spurt in inflation and bring a halt to the run of cuts in UK interest rates.

The biggest concern on this score came on Thursday when

long gilts lost nearly half a point on news that UK unemployment fell last month for the second month running. The 26,000 fall in the March job queues, after a revised 25.500 reduction in February, arrived with other indicators from the car and housing sectors pointing to a pick up in demand.

At the end of a week of promising economic data, the government said shop sales rose a seasonally adjusted 0.5 with February, and were 4.1 per cent higher than in the

same month a year ago. However, by the end of the week gilt investors had perked up, on the grounds that inflationary trends were more favourable than these straws in the wind would indicate. Pointing in this direction was that average earnings growth dropped again in February to a year-on-year 4.5 per cent from 4.75 per cent in January, the lowest increase for 25 years. For manufacturing, the rate dropped 0.25 percentage points to 5 per cent, while for the services sector average earnings

dropped to 4.25 per cent, compared with 4.5 per cent. The figures on wage inflation came after several months in which wage increases have been severely dented, and indicated that a take off in earnings demand may be some way in the future.

Business Strategles, a consuitancy, and Gallup, a market research group, weighed in with a joint report saying the recession was still not over and that consumer confidence in the first quarter of this year was less than the far from high levels in the same period a year ago. The survey estimated that consumer spending grew

UK gilts yield setated at par (%) Apr 23, 1993 .7.5 7.0 Apr 16, 1993 years estribe

by a minuscule 0.1 per cent in the first quarter compared

A third pointer was Friday's release of monetary data showing a £1.2bn fall in bank and building society lending last

SWEDISH GOVERNMENT BONDS

# Riksbank cautious in spite of market cheer

THE Swedish bond market had However, Mr Bengt Svelander, plenty to cheer about last week and yields ended Friday on a firm downward trend. The cut in German interest rates, a fiscally tight budget package and reduced political uncertainty contributed to the positive

Given this and the recent strength of the krona, the decision by the Riksbank, the central bank, to cut its marginal rate by a mere 0.35 of a percentage point to 9.50 per cent after the market closed on Friday seemed a little miserly. Dealers had expected a reduction of at least half a point, the round of European rate-cutting which followed the Bundesbank's announcement on Thursday. The Riksbank is taking a cautious line to enhance the credibility of Swedish monetary policy, indicating that further adjustments will be in 0.25 per stages.

"We are keen to show the market that we do not intend to pursue a policy of aggressively lowering interest rates, said Mr Thomas Franzen, Riksbank deputy governor

The bank's policy is based on the over-riding importance it attaches to a strong currency and the fight against inflation.

senior bond deal at Consensus Fondkommission in Stockholm, points to a difference of perception between the bank and the market. "The market believes the krona will get stronger as the economy gets stronger with lower interest rates. The bank is still concerned that it is only interest rate differentials which are

preventing the currency from weakening." he said. Nevertheless, most bond dealers expect the marginal rate to fall to 8.75 per cent to 9 per cent in the next few weeks, giving a much needed stimulus to the recession-hit economy. One prediction suggested the rate would be as low as 6.5 per cent early next year.

Bond prices are discounting further interest rate cuts, with the yield on the benchmark 1020 bond, due 1997, closing at 8.38 per cent on Friday, down 6 besis points on the day and 33 basis points on the week. Yields on longer-dated bonds were falling, with the 1033 bond due 2003 ending the week at 9.19 per cent, a drop of 30 basis points since the previous Friday.

The budget figures produced last week caused few surprises,

as large savings had been sig-nalled in the main January

The market appeared to have discounted the government's gioomier short-term economic predictions, which suggested gross national product would fall by 1.7 per cent in 1993. Even a prediction of a SKr190bn budget deficit for the 1993-94 year, equivalent to 12.9 per cent of GNP, and a SKr255.3bn borrowing requirement failed to disturb senti-

What the market liked about the budget was its emphasis on heavy spending cuts in the next five years to eliminate the structural budget deficit. By disclosing a further SKr81bn in savings for the 1994-98 period, the centre-right minority government has announced cuts of about SKr160hn since it took office in September 1991, equiv-

alent to 10 per cent of GNP. Equally positive was the backing given to the budget package by New Democracy, the political party that holds the balance of power in the Swedish parliament. This suggests an end to the political uncertainty which has unset-

tled sentiment in recent weeks. Yet the market reaction could hardly be described as ecstatic for two reasons. First, there are doubts about implementation, given that most of what is being proposed is scheduled to take effect after the next election in September 1994, which may bring the opposition Social Democrats back to power.

Second, there is a feeling that government forecasts on inflation and economic growth over the next few years might prove over-optimistic, and hence upset its calculations. The aim is to limit annual inflation to 2 per cent to 2.5 per cent while achieving GNP growth of about 3 per cent a year between 1995 and 1998.

The inflation forecast seems optimistic. Sweden is a country which is associated with the problem. Since the krona was floated last November it has weakened by nearly 20 per cent. Hence a large influence on bond market sentiment is likely to be the progress of the current round of wage talks. Evidence of low settlements will probably push yields down

> Christopher Brown-Humes

US MONEY AND CREDIT

# Clinton's Congress defeat shrugged off by markets

Clinton's economic stimulus and Mr Clinton is expected to ing economic picture seems package has injected some fresh political anxieties into the US credit markets, though these were hard to discern in last week's directionless trad-

ing pattern. Mr Clinton suffered his first large defeat in Congress on Wednesday when Democrats ahandoned his much-vaunted economic stimulus package in the face of a prolonged filibuster by an unexpectedly united Republican Party.

The setback, combined with the new administration's clumsy handling of several unlikely to be in a hurry to cut other issues, raises questions about Mr Clinton's ability to prise reduction in German push through Congress the more important items on his legislative agenda, especially large cuts in the federal budget through the market, with the

Failure to cut the deficit would be very bad news for the credit markets, since it could stoke inflationary pressures and increase the supply of goverament paper, thus tending to put downward pressure on bond prices.

However, the markets took Mr Clinton's defeat in their stride, with the benchmark 30year Treasury issue ending the week at a vield of 6.79 per cent just four basis points higher worries about the build up of than the 6.75 per cent of seven days earlier.

There are several reasons. Peter Marsh | First, the new administration learn from his strategy mistakes over the stimulus bill. Second, the credit markets

were opposed to the stimulus package as potentially inflationary, even though in its final \$16bn form it would have had minimal impact on the direction of the economy. Third, the consensus Wall

Street view of the economy presents a benign backdrop for bonds: the US is expected to remain in a slow but sustainable expansion, with both real gross domestic product growth and consumer inflation for the year likely to be around 3 per

These assumptions will be tested on Thursday when the Commerce Department releases its report on first quarter GDP, which will show a sharp slow-down from the 3.7 per cent and 4.7 per cent growth rates recorded in the last two quarters of 1992, possibly to around 2 per cent.

The slow-down was underscored on Friday when the government released statistics showing that orders for durahie goods fell 3.7 per cent in March, the biggest decline in 15 months and more than Wali Street had been expecting.

However, both these figures and those for first-quarter GDP will have been distorted by the severe storms which disrupted business activity in the middle

THE killing of President Bill is on a steep learning curve of last month, and the underly rather healthier than the GDP figures are likely to suggest.

Wall Street should get a clearer view of the momentum in the first week of May, when the first statistics for April are released, and these could propel the market out of its narrow trading range.

The market remains prone to inflation scares - the weakness of interest-sensitive share prices and the strength of gold prices last week has some analysts warning of a build-up in inflationary pressures - and signs of an April bounce-back could unnerve bond traders.

The first week of May will bring details of the Treasury's refunding plans for the month. as well as the results of a government study into the mix of maturities that make up the federal debt

The new administration has been considering a shift of emphasis from long-dated to shorter-dated instruments, although Mr Lloyd Bentsen, the Treasury secretary, repeated last week that nothing radical was planned.

Even so, the market has been subject to speculation that the government may not auction 30-year bonds in May, which has been one of the factors keeping yields steady over

# UK companies hit the US private placement trail

UK companies are flocking to the US private placement market, attracted by the ready availability of long-term funding at relatively favourable terms.

Last week saw the announcement of a \$116m US private placement for Lucas Industries, the engineering group. The deal, which has a 6.95 per cent coupon and 12-year maturity, comes hot on the heels of similar placements for the Vinten Group, H.P. Bulmer, and Hunting. Corporate advisers expect more UK borrowers to follow suit.

UK companies say there are advantages in using the US private placement market. "Interest rates in the US are at their lowest in nearly two decades, so you can lock into low fixed rate financing which is very attractive," says Mr Richard Green, financial director at Vinten. The group, a camera mountings and systems, surveillance and electrooptics company, raised \$40m of 10-year money this month. It is paying

a coupon of 6.72 per cent to the US institutions which hold its bonds. By comparison, Mr Green estimates the company would have had to pay at least 7.52 per cent for fixed rate

dollars in the UK. As important as the low interest rates is that companies find it easier to borrow long-term (from seven years up to about 15, depending on the borrower) in the US private placement market.

That UK companies have turned their attention to the US market reflects the lack of suitable borrowing opportunities on their own door-

Many of the UK names which have followed this route point out that they have little alternative to obtain long-term financing. The pricing on bank loans has risen over the past three or four years, reflecting new controls on capital and concern about the creditworthiness of borrowers at a time of reces-

Mr Green says there is more flexi-

ing acquisitions which in the longer term would help to lift its profits. While some of the bigger, blue chip names can tap the Eurobond market for longer-term financing.

this route is not open to less renowned credits. "Companies below the double-A rating level can't access the Eurobond market easily." points out Mr Stephen Schechter, managing director at Wertheim Schroder. Lucas's long-term credit rating was recently downgraded by IBCA from A- to BBB+, Mr Edward Freeborn, Lucas's director of corporate finance, admits that given the cur-rent credit rating "it would not have been as easy" to go to the Eurobond market as to the US private placement market. Others, such as H.P. Bulmer, do not have a

£13m ... certainly for us a Eurobond would be out of the question," points out Mr Dennis Clark, finance director of Hunting.

Proceeds from US placements are

often used to refinance more expensive debts at lower rates. Hunting has used proceeds from its \$50m US private placement to replace its existing dollar borrowings at lower rates, while the proceeds from its \$35m seven-year placement have been converted into floating and fixed rate sterling. Lucas plans to use the proceeds of its bond placement to refinance its short-term debt, although it swapped proceeds from an earlier private placement into floating rate dollars and sterling. H.P. Bulmer chose to swap its long-term dollar borrowings into floating and fixed rate sterling to give effective 10-year funding at a margin over Libor of less than one

Sara Webb

One answer has been to move out along the yield curve towards the five-year area, picking up duration without losing the relative outper-formance of the short end of the yield curve. Also, banks have used the swap markets to structure instruments specifically aimed at investors wanting to take a position on the shape of the yield curve. These have sold well in recent months, though could prove expensive if the curve fails to steepen as sharply as many investors expect.

ing rate notes, which pay investors a higher return as interest rates fall, according to Deutsche Bank. The buyers of this paper were almost exclusively German retail investors.

rates have grown, these instruments have progressively offered less of a return: the first issues paid 14½ per cent a year minus the London interbank Offered Rate, a level

RISK AND REWARD

### Plotting a safe course along the yield curve as the slope changes

interest rates were reduced last week, the D-Mark yield curve took another lurch towards the sort of positive slope that the bond markets have been

awaiting for some time. If short-dated bonds are set to outperform longer-dated ones, what are the most effective ways of taking a position to benefit from the change in the months ahead?

The longer end of the yield curve has swung considerably, with the spread between five and 10-year vields lurching up as the curve has become positive. According to some, there is still a long way to go. Mr Jeremy Hale, fixed income econo-mist at Goldman Sachs in London. points out that the differential between five and 10-year yields has shifted more slowly that in other interest rate cycles, suggesting there is a sharper swing to come.

Simply buying short-dated paper has had one big disadvantage: the relative lack of duration (the life of the bond, taking into account both the maturity date and the timing of coupon payments) of short-term paper makes it less price sensitive as interest rates fall. Why pay more for a higher-yielding bond if it repays anyway in the near future?

This year has seen the issue of

more than DM6bn of reverse float-

As expectations of falling interest

AS official German which had fallen to around 121, per cent minus Libor by the time the flow of paper began to dry up a

Medium-term notes specifically structured for investors looking to play the German yield curve have been produced in abundance in recent months. Typically, the redemption price of the paper is linked to the fall in short-term interest rates: the sharper rates fall

the higher the redemption price. Mr Paul Abberley, a director of Lombard Odier Investment Management, the London-based arm of a Swiss bank, said his firm had used such paper to extend the duration of its D-Mark investments while keeping its exposure to the short-term end of the market. Such notes bought by Lombard Odier had been issued by institutions such as

the Halifax Building Society and the Republic of Ireland. "As recently as a year ago, this type of investment was very innovative - no one much in London was doing it," he says. US investment banks have more recently been marketing the idea hard both to issuers and investors, and making considerable headway.

Such swap-based products have a cost, of course - both the market spread, and the profit margin of the bank that constructs them. As a Deutsche Bank official says: "Most of our bigger investors can reproduce these in the market by taking out a number of swaps.

Most investors still prefer to focus their efforts on getting the direction of the market right, rather than on innovative investment products.

Richard Waters

# Accor reports 1992 results on target

7.25 99.7R 7 1000

ACCOR reported 1992 consolidated ner income of FF 802 million and 1992 consolidated cash flow of FF 2,739 million.

The Board will propose a dividen FF 18.00 per share, net of Avoir Fiscal These results include the initial full-year contribution of Compagnie Internationale des Wagons-Lits et du Tourisme, which is fully consolidated. The Group's performance in 1992 was in line with previously announced forecasts.

150

The 28.8 % increase in cash flow during the year contributed to the strengthening of the Group's financial structure and reflects the effectiveness of its geographical and sectoral diversification strategy: 61 % of 1992 sales were generated outside of France, and 65 % by non-hotel activities.

The 15.5 % decline in consolidated net income reflects an increase in financial expenses and goodwill amortization, both related to the Wagons-Lits acquisition, as well as depressed hotel activities in a sluggish economic environment. Efforts to develop synergies were launched in 1992, but have not yet had an impact on earnings. However, the Group's ratio of shareholders' equity over long-term resources (shareholders' equity plus long-term debt) improved, from 40.5 % in 1991 to 47.4 % in 1992.

(In FF millions)	1992	1991
Total revenues	30,569	14,539
Net operating income, including minority interests	870	913
Exceptional items not of taxes	220	183
Net Income, Group share	802	949
Net income per share	PF 36.30	FF 44.20
Code Gow	2,739	2,126
Cash flow per share	FF 123.90	FF 99.00

On a comparable structural basis, i.e. including sales of Wagons-Lits, 1991 sales would have amounted to FF 27,648 million. Thus, comparable sales increased by 10.6 %

The Board will propose a dividend of FF 18.00 per share, net of "Avoir Fiscal" tax credit of FF 9.00, up 12.5 % from the 1991 level, reflecting the confidence of the Group's co-Chairmen and Board in the medium-term outlook.

The dividend will be payable in cash or share form, following the same procedures as in the prior year. The cash dividend will be payable July 16, 1993.

1993 OUTLOOK

In 1993, ACCOR will strive to meet the following objectives:

 to streamline its hotel brand name portfolio and its operating structures; to further improve Motel 6's performance, in line with the results achieved in the first quarter of the year in a US environment

which remains hesimat; to focus on developing high-potential activities with relatively low capital requirements (contract catering, travel agencies, budget hotels, service vouchers) and - when appropriate - develop horel activities through joint-ventures such as those already in place in Asia and the Pacific Rim;

 to continue selling off non-strategic assets and accelerating the implementation of synergies in purchasing and marketing.

### FINANCIAL TIMES SURVEY

# European Finance and Investment: Portugal

Monday April 26 1993

While Portugal may be the last to fall into the recession that has gripped most of the European Community, it is determined to be the first to climb out. Peter Bruce and Peter Wise look at the prospects of its catching up with richer EC partners so that it can take full advantage when recovery comes

# A head above the crowd

ORTUGAL has a history of arriving late for recessions. In the 1970s and 1980s, the Portuguese economy boomed when the rest of Europe suffered. But then it sank into crisis, just as its peers began to celebrate recovery. This time round. Lisbon's centre-right Social Democratic government is determined not to repeat the

As a small, open economy, Portugal is being tinged by the recession that is gripping most of its European Community partners. But the government is convinced that however low growth in Europe dips, Portugal can keep its head above the crowd.

Portugal may again be the last to fall into recession, government officials say, but it is determined that it will also be the first to climb out.

Why in past decades did Portugal feel the full brunt of recession when other countries were enjoying an economic comeback? The answer, according to Mr Jose Braga de Macedo, the finance minister. is that profligate governments threw money at problems and lost control over budget

This time round, he says, things will be very different. Structural measures have

been taken to stimulate the competitiveness and productlvity of the economy, a tightlycontrolled public spending programme focuses on investment and keeps budget deficits from eating into economic growth, and a social pact should help keep wage rises moderate, he argues.

"We have the resilience and the policies to hold on until the recovery comes and then take full advantage of that recovery," he says.

Portugal today is working to a markedly different set of economic and business rules than when it was dragged down by recession in the 1970s and the 1980s. EC entry came in 1986 and with it the support of a massive inflow of structural funds and later a strong commitment to economic and monetary union.

This goal led to the development of a 1992-95 convergence plan. Quantum II. that set annual targets aimed at bringing inflation, public debt and budget deficits down to EC averages. The election of Mr Anibal Cavaco Silva as prime minister of a majority government in 1987 brought political stability and business began to be able to plan medium and long-term

administration.

with what some independent analysts predict. Mr Rui Martins dos Santos, chief economist at Banco Portugues de Investimento, for example, estimates growth at zero to 0.5 per cent.

Total employment

But this is a numbers game in which the finance minister refuses to get tangled up. What is important is not exactly how much we grow but that we grow more than rest of Europe, to ensure that we are continuing the catching up process," he says.

"As long as we are growing faster than the rest of the Community, we are dampening the effects of the foreign recession," he continues.

"If the EC grows 2 per cent and we grow by 3 per cent, that is one thing. But if Community growth is zero. then reaching just 1 per cent is much, much, harder. If EC growth is negative by, say, 0.5 per cent then just reaching zero growth would be absolutely wonderful."

But in the bleak climate currently facing Europa, what makes Portuguese officials so sure they can escape all but a smidgeon of recession this time and come up smiling as soon as European growth re-establishes tixel?

Lisbon believes it has learned from the mistakes of some its EC partners and put the right structural measures in place at the right time. 1992 brought tax harmonisation. placed the escudo in the exchange rate mechanism of the European Monetary

System and saw the beginning

there is ample room for it to stumble. "If there is a breakdown in one economic policy, all the interlocking architecture of the government's macro-economic policy could come tumbling down," says Mr Miguel Namorado Comercial Portugues.

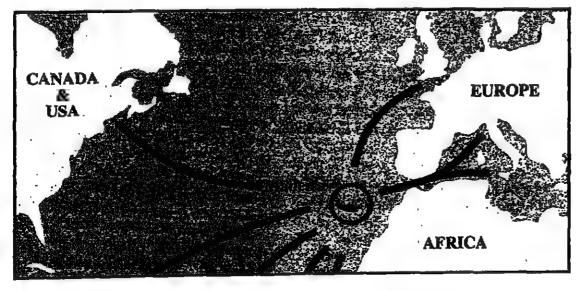

and private sector. The commitment to a strong Competition in a newlyescudo, preventing lower liberalised financial sector has been stimulated by a new marked deceleration of banking law and the virtual economic activity, considered the weakest link in completion of a sweeping privatisation programme. the policy chain.

The result has been a drop in How well could the government withstand a corporate interest rates and more attractive and flexible recession? Low unemployment, cash-management services. currently less than 5 per cent, The government has sharply would help lessen the shock and the threat of unemploycut its borrowing needs, raising a considerable amount ment would almost certainly of funds abroad and freeing up moderate wage claims. credit for the productive

Politically, the government is in a strong position. While it could suffer losses in local arlier this year, the government announced a series of EC-supported elections scheduled for December, the next general election is not due until October 1995. The opposition packages worth more than Es1,100bn (£4.81bn) to support Socialists do not appear to housing, agriculture, export have the strength to force an diversification and other areas. early poll, even if the economic "These are structural programmes that are exactly situation seriously the opposite of throwing money at problems," insists Mr deteriorates.

Were Portugal to escape the Braga de Macedo. He says they recession, that would be a boon as it struggles to catch up with are contained within its richer EC partners. medium-term plans for control fronically, the know-how for of budget spending. Their aim is help the Portuguese doing so may come from economy pick up quickly when peering quietly over the fence to see where the country's the European recovery comes. The government is confident more advanced partners have that it can take the European gone astray.

Madeira. The European Community's newest international business centre. Only 3 hours away from most European capitals and just over 1 hour from Lisbon, Madeira is poised to take full advantage of 1992, the year of the European Single Market.

Strategically placed on most Atlantic shipping routes, Madeira is unmatched as an offshore centre in the European Community.

### Free Trade Zone

All industrial and commercial activities are permitted within the free trade zone, subject to the preservation of the natural environment and to the rules of public health and national security.

### **Offshore Financial Centre**

Banks and financial institutions may establish offshore operations anywhere in Madeira, free from domestic restrictions. Transactions may be carried out in any currency, with supervision from the Central Bank of Portugal.

### International Services

International service companies such as trading, holding, management and trusts will be able to conduct and plan international investments through Madeira thus benefiting from all the fiscal incentives available.

### International Shipping Register MAR, Madeira's International Shipping

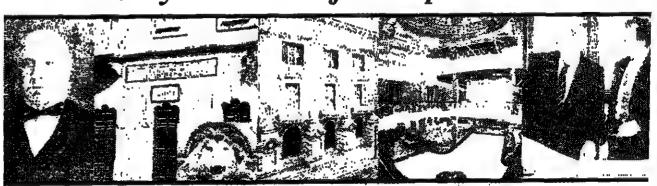

Register offers the global shipping industry some of the most favourable and competitive conditions available today. All vessels registered will fly the Portuguese flag. A wide range of tax and financial incentives are also available to investors, making the package even more irresistible.

Madeira. Your high-yield investment in the future.

# years of experience

# a background for the future

150 years ago the vision of a man marked the history of the oldest commercial banking institution in Portugal.

As it is today. Banco Totta & Acores is the result of mergers and acquisitions of several banks and finance houses over the years, dating back to 1813.

Proud of its past, Banco Totta & Acores is now one of the leading banks in Portugal. But more than just a bank, Totta became the true expression of a powerful financial group.

Totta, probably the most experienced Portuguese bank in International business.

For the moment, though, exchange rate and interest

"I don't want to harp on The prospect of the numbers," he says. "We believe bank becoming fully autonomous holds out the promise of munity." monetary stability

rate policy are made in conunction with the government. meaning, probably, that the finance ministry has the final

But, assuming the EC's efforts to forge a monetary union remain on track, the Bank of Portugal will become its own master, fully autonomous, before the end of the iecade. It will (so the theory goes, at least) control mone tary policy and remain the main regulator of the country's financial system.

This may have been where the finance minister stepped in. He says he was not trying to force the bank to out official interest rates but to get it to persuade commercial banks to narrow the vast gap between the high rates that small busi-

nesses have to pay for loans.
"The Bank of Portugal could do more to explain how the economy works in a time of change," he says. "It is part of forming a consensus."

The minister sees this political role for the central bank as an extension of four key structural measures taken by the government in the last few years to drag the country's financial system into the late 20th century:

The end of the bank's obli-

gation to finance the govern-The start, last December, of

full convertibility of the The decision to enter the exchange rate mechanism of

the EMS last year. ■ New banking laws which open the sector to full competi-

By explaining "how the economy works". Mr Braga de Macedo means that the bank should become involved in debates on how the banking system should respond to the crisis sweeping small and medium-sized businesses as the country teeters on the verge of recession. "Consensus is important," he says. "If we are incapable of responding rapidly to the crisis we will find ourselves still at the bottom while others are recovering. There is a great deal of

work for everyone to do."

Is this interference? On balance, it probably is. The question is whether it is interference in the bank's monetary policy role, or in its other task as a regulator. More likely, it is the latter. Even after full autonomy is granted to the central bank, it is unlikely to include banking regulation, where the government will still have the power to make

The issue has implications for the approaching indepen-dence of central banks in Spain, France and elsewhere in the EC. If a central bank cannot be told how to behave as a guardian of monetary policy once full autonomy is achieved, will governments then try to follow Mr Braga de Macedo's lead and implicate their central banks, through their continued exposure to government as banking regulators, in the implementation

The bank's credibility is cen-tral to the growth of Portu-gal's financial markets and its

The present government has already overseen an important transfer of autonomy to the Bank of Portugal. It is no longer obliged to finance the government (by underwriting treasury bills) and, says Mr Miguel Beleza, the governor, while it could if it was thought appropriate, "we have not thought it appropriate for the

it currently hovers at between 7 and 8 per cent - the government is committed to a stable exchange rate policy which forces it to keep interest rates frustratingly high. Economic growth may above

the EC average but it is a far cry from the buoyant late 1980s. Unemployment, while extremely low at just over 4 per cent, is likely, economists say, to rise about 2 percentage points this year and wages are going up at an average 9 to 11 per cent if you listen to private sector analysts or, according to and 9 per cent. Perhaps most worrying to

the authorities, though, has been a series of niggling problems with the escudo. This started during the currency turmoil in Europe last autumn. While the currency weathered the initial storm guite well, the Portuguese were forced into a 6 per cent devaluation last November when Spain deval-ued. Ironically, the escudo quickly recovered after that but was hit again in March by the resignation of the deputy governor of the Bank of Portu-

The affair was quickly and credibly explained away as so much political theatre but the markets were not listening and have been doggedly testing Lisbon's resolve. Intervention by the Bank of Portugal cost it 10 per cent of the country's nongold reserves in March. The central bank also chivvied short-term interbank rates up from around 13 per cent to 25

per cent at the peak.

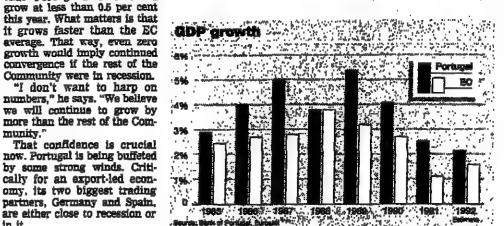

Although Mr Miguel Beleza, governor of the Bank of Portugal, quite discards the possibility that Portugal would, as Spain did to its discredit last year, resort to capital controls to defend the escudo, he insists that "we can and we will use the instruments at our disposal (interest rates and reserves)' to defend the escudo's parity.

Despite this resolve to hold the escudo within its current parity band in the exchange rate mechanism of the European Monetary System, calming down the markets, he concedes, "has taken longer than we would have liked". Neither he nor independent economists believe the attacks will continue much longer. Short-term rates have already fallen back to around 18 per cent and the bank believes it has ample reserves - some \$17bn - to fend off attackers and to hold the escudo above Es93 to the

Typically, both the Bank and the finance ministry rule out a Lisbon-inspired realignment in the ERM, in which the escudo could gain a little competitiveness. "We believe exchange rate stability is crucial," Mr Beleza savs.

Fortunately for Portugal non-residents do not actually own many escudos but the nature of the attack on the currency is changing and, believes

Mr Rui Martins Dos Santos, chief economist with Banco Portugues de Investimento perhaps becoming more dan-

Last autumn; the assault consisted of foreign institutions selling their long positions in escudo securities. The volume of shares, bonds and money market instruments in foreign hands has fallen from Es800bn last September to Es350bn now. At almost the same time, worried Portuguese companies began paying back row in escudos. First, though, they had to borrow foreign currency to pay the original loans back, thus further weakening

Mr Beleza now sees the short positions that foreign institutions have taken in the escudo as being much more problematic, potentially, for the central bank. These positions are mod-est but he believes the Bank was wrong to resort to an interest rate defence of the currency after the resignation of his deputy. The fact that rates moved so quickly caught the market's attention, he says.

"It was counterproductive. Predators can see the fear in the eyes of their victims," he says. "It's better to have one or two sharks nibbling away than to have a whole lot of blood in the water. That just attracts

The sharks, if they care, will also have noticed recent pledges by the government to pump about Es1,000bn into housing, agriculture and exporting programmes over the next few years despite many proclamations in the past of its fiscal discipline. Is the government's political

Its political programme will have an impact on the budget from next year - though much of the total will come from EC transfers and includes the

value of land the government plans to give away. That may slow progress towards convergence, but Mr Braga de Macedo quick to point out that Lisbon's convergence programme commits it to meeting only EC averages and not the strict

monetary union targets established in the Maastricht treaty. Economists like Mr Dos Santos like what they see, "Policy is becoming more flexible," he says. "The government needs to pay much more attention to the economy and forget a little

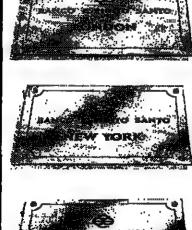

How quickly these pro grammes put money into the pockets of construction companies, farmers and exporters remains to be seen but both the finance minister and independent analysts believe the current slump is different and that Portugal is poised to make an important break with its economic past.

Mr Dos Santos argues that even if Portugal does slip into recession, it will be this year and it will be short and shallow. Typically, Portugal would go into recession much later than its main trading partners but the hope in Lisbon is that, this time, it will recover along with the rest. But the speed with which recession has overtaken Spain has clearly alarmed the Portuguese and it may be that the "last in, first out" conjecture is just wishful thinking.

"Our great concern is to avoid the impression that there is nothing we can do in the crisis," says the finance minister. "This time we have a medium-term strategy in place and the economy continues to show a resilience which the government hopes will enable it to pick up with the rest of Europe. Our cycle is always late and we need to hold on until recovery occurs."

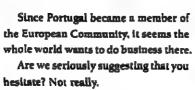

Peter Bruce

# How to do business in Portugal. Without all the business of getting there.

But we do suggest that you drop in to your local branch of Banco Espirito Santo before you dash off to the airport. in the comfort of your own country, we can advise on the best way to invest

We can explain local procedures and suggest local contacts. We can clarify regulations and help cut red tape. We can assist with feasibility studies and forward planning.

Once everything is in place, we can then provide all the commercial and investment banking services you'll need. From arranging foreign exchange

and letters of credit to stock brokerage,

venture capital, leasing and factoring. In short, when you talk to Banco Espirito Santo outside Portugal, you gain access to Banco Espirito Santo's unrivalled network of branches, services and contacts inside Portugal. (Not to mention the experience and resources of the whole Espirito Santo Group, in Portugal and elsewhere 1

All of which means that, when you do get there, you can start doing business. Without all the usual business.

Peter Wise on the opportunities for commercial banks

The challenge of freedom

External trade by product groups

One of the advantages of the previous credit ceiling system is that the majority of Portuguese banks are well capitalised. The two or three exceptions are all public with the guarantee of the state behind them and are eventually likely to be financially restructured.

A key area of attack for Portuguese banks in the less auspicious climate of 1993 will be costs. Higher financial margins in Portugal compared to the rest of Europe tend to allow a higher ratio of costs, enabling banks to accommodate ineffi-

branch, installing information technology and generally grow-ing lean and mean can you assure a decent return on assets in these conditions." BCP, a classic success story

in many respects, cannot afford to ignore its difficulties on the cost side. A bank that has grown to the size of century-old rivals in less than a Es1,522bn. BCP runs several networks for different sectors of the market and is reputedly a text-book story of achievement studied at Insead, the

ssistant general manager.

working at will not be the margins of the future." Apart from the major Span ish banks, nearly all of which are aggressively expanding in Portugal, Barclays is one of the few foreign banks in Portugal to take the retail path, and as these have at least a two-year head start, other banks seem unlikely to enter that market.

As margins shrink, another avenue that Portuguese banks will have to explore is that of commissions. Banking services in Portugal have largely been free because institutions were earning so much on their margins. Now a lot of services that were free, from cheque books to financial intermediation, will attract charges.

Banks will also have to become more expert at crossseiling, according to Mr Gomes. "It will be crucial for banks to turn what have been just bank clerks into fullyfledged sales people, selling insurance, leasing and other products at the bank counter," he says. Only in this way will they increase premium income to satisfactory levels and get an adequate return from the financial groups they have been building up.

ORTUGAL is enjoying an unprecedented era of infrastructure development. A new 11km, Es121bu (£530m) bridge is to span the Tagus estuary at Lisbon. A railway crossing will be added below the existing bridge - all in time for 1998, the year national exhibition Expo 98 that will lead to a major face-lift for the castern side of the In the nower sector, a con-

European Finance and Investment: Portugal

sortium led by the UK's National Power is paying Electricidade de Portugal, the state-owned power company. Es183bu to take over over the construction of two 300MW coal-fired power plants at Pego in central Portugal. The deal could eventually extend to four units. Natural gas is be introduced into the country and one, probably two, gasfired power plants will be built downstream.

The total cost of European Community and government infrastructure development between 1989 and 1993 is estimated at Re3.500th and a similar sum is expected to be spent to the end of the century. What distinguishes the

above projects from the bil-lions being spent on new motorways, bridges, railway improvements and telecommunications is that all are being financed by phenomena new to Portugal - project finance, in the strict sense of private sector enterprise in which the cash flow of the project is enough to pay back all the loans raised without recourse

to shareholders. Previously, major infrastructure projects in Portugal were carried out by giant stateowned enterprises and financed by loans to enterprises that had the state guarantee of Portugal inc. Govern-ment officials do not deny that

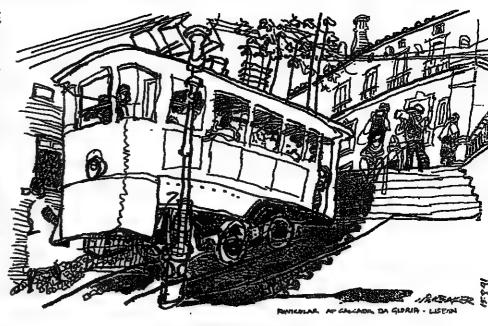

Farming out infrastructure projects to state-owned enterprises led to the building of costly white elephants

has led to the building of one or two white elephants. "Following the wave of pri-

vatisations that Portugal has experienced it no longer makes sense to farm out all the major projects to stateowned companies," says Mr Abdool Magid Vakil, chairman of the Lisbon-based Efisa investment company. "The government believes that, if it

can get the private sector involved, they will be much more careful and scrutinise everything and in this way avoid the possibility of building another costly white ele-But so far Portugal's experience with project finance has failed to overcome some initial stumbling blocks. "It's a little worrying," says Mr Filipe Cri-

sostomo Silva, a director of Banco Finantia. "Portugal has been involved in this for three or four years now and so far has failed to close one deal." The first project to turn sour was the Es130bn plan to introduce natural gas. The govern-

PROJECT FINANCE

# Stumbling blocks still need to be overcome

ment called off two years of talks in March between an international consortium led by Gaz de France (GDF) and EDP after the two failed to agree on prices and risk-shar-

We would rather have no deal than a bad deal," Mr Luis Pereira, Portugal's energy secretary, said. He blamed GDF, saying it had expected EDP to take on exaggerated risks. It had insisted on fixed costs that were too high and had undermined the talks by reviving already agreed questions close to negotiating

GDF said it remained determined to bring off the project if only the points in dispute could be overcome. The Portuguese government has set a leadline of mid-May to decide on what route it will take to bring natural gas into the

The difficulties leave a question mark over a 900MW plant powered by natural gas that is being constructed in Portugal by a Siemens-led consortium which cannot be financed until there is a guarantee of natural gas reaching Portugal - and over plans for a similar plant to be built by 2001.

"The failure of the gas project could be a bad precedent because project finance lives off credibility," says Mr Crisosiomo Silva. "International

gal, in the stability of the Portuguese government and the economic situation. When you start having problems like the gas project, people might look at Portugal as an unsafe. unstable country and resources may be diverted elsewhere."

A project much pearer financial closing than the natural gas project is the Pego power plant deal. But it, too, has been delayed. The closing was due to have been signed on March 31 but problems arose

The Pego power plant deal is as complex as any International agreement. The Tagus bridge project

could be more complex in three areas: an EC question over the competition status of EDP signing a 28-year exclusive deal to purchase power

from the plant and difficulties

over both the contract for coal

to be unloaded and over the contract for rail delivery of the coal. The finance package in place behind the Pego deal is as complex a deal as any major international project finance agreement. It involves the issuing of ordinary shares in Lisbon, shareholder loans, and detailed negotiations.

two Deutsche Mark non-re-

is an "offshore facility", the other a "domestic facility" provided by Portuguese banks. Analysts predict financing the new bridge project will be even more complex than the

Pego plan. The main guarantee for Pego is the power pur-chase agreement to be signed by EDP. In the case of the new bridge, which also brings with it the concession for the existing toll bridge, many complex factors have to be examined. A list of eight international

consortia for the bridge project has been cut down to five and should be reduced to two before the end of the year. Their proposals for the build. operate and transfer deal will have to take into account how many cars will cross the bridge, what toil should be charged, how soon can the consortium hand back the bridge to the state, what will be the impact of the new rail crossing over the existing bridge and other, difficult to assess questions.

"Portugal is learning from its mistakes," believes Mr Crisostomo Silva, "I think you will now see the government waiting longer to choose the preferred bidder and guaranteeing first that it actually has the banks and the money behing it before going into

still busy establishing themselves and one of their main objectives is to increase in size. This has ensured that most privatisations in the financial sector have been a success. With the possible exception of Banco Pinto e Sotto Mayor, which faces grave financial problems, forthcoming sales in this sector should go smoothly.

The same cannot be said of the stateowned industrial sector where many companies are seriously ailing. This has been seen in unprecedented difficulties in selling off cement, steel and petrochemical

This year's programme started on the wrong foot when the government failed to find a buyer for the cement companies Secil and Cimentos de Maceira and Pataias. It set a minimum price of Es59bn for its 80 per cent share in the two companies. Only Portuguese-controlled groups were allowed to participate. But the two domestic groups originally interested in the deal backed out, complaining that the price was too high. The government is now expected to open up the process to foreign groups in a

After apparently missing the right time to sell the Siderurgia Nacional steelworks, the government now faces the unnlessant prospect of having to pay to sell this loss-making giant. Analysts said it was clear from the start that SN could survive only as part of an international group. However, the one group that has come up with an offer, the French-Spanish

than any series of government

But AutoEuropa is not the beginning and end of the for-elgo investment story in Por-

tugal. Other projects have

co Nacional Ultramarino's building, designed by Tomas Taveira, in Avenida 5 De Outubro, Lisbon

Usinor-Sacilor joint venture, is reported to be interested only if the government takes over SN's liabilities, estimated at Es60bn. Portugal's largest enterprise, the oil company Petrogal, is proving to be another complex and arduous case. The Portuguese media has suggested that the government is considering declaring the sale of the first 25 per cent of the company null and void because of a dispute with the purchasers, the consortium Petrocontrol. Petrocontrol - a group comprising

is refusing to share the costs of a badly-needed Es40bn capital increase, arguing that when it bought the 25 per cent share last year it had no way of foreseeing the extent of losses Petrogal would make in 1992.

One need not envy Mr Jose Manuel Elias da Costa, secretary of state for finance, who is responsible for the privatisation programme, his task. In addition to the international recession, which has reduced value of companies, he has to contend with a constantly depressed domestic

capital market and with the increasing apathy of investors aware that the best companies have already been sold. In addition, margins between fixed minimum share prices and the highest bids have been practically non-existent.

In several cases the government has been accused of presenting the companies it is putting up for sale in too favourable a light. Share prices have often fallen following a privatisation, making small

investors wary. Domestic business groups complain of a lack of consideration for their restricted financial potential compared to the power of foreign investors. They claim that if the government were really interested in creating strong domestic groups, it would not make raising as much capital as possible from privatisations its first

It has been suggested that one way of achieving this would be to privatise more companies through direct negotiations or tenders instead of stock exchange auctions, the method used in most privatisations to date.

The government has indicated there will be fewer auctions in future, particularly in the industrial sector. However, officials are caught in a double bind as they have been criticised just as strongly for imposing tight restrictions on foreign participation as a means of protecting domestic interests. The arguments here are that there is simply not enough money in Portugal to guarantee the successful

sale of all public companies and that the government is distorting the market by imposing such limits.

These restrictions and the practice of revitalising state-owned companies with public money prior to their sale have also provoked a complaint from the European

Commission. Mr Elias da Costa sought to justify the limits on foreign participation in talks with Commission officials in Brussels earlier this month. He argued that only Portuguese assets were nationalised after the fall of the Portuguese dictatorship in 1974 and that the decision to give priority to domestic capital was a way of compensating for this "injustice".

While the Commission apparently remains sceptical. Mr Elias da Costa is confident that the matter can be resolved without a lawsuit against Portugal in the European Court of Justice. He says the Commission's reservations will not interrupt or slow down Portugal's process of privatisation.

Companies that may be privatised at least partially this year include: Banco Portugues do Atlantico; third

Banco Totta e Acores, remaining 14.5

per cent; Banco Pinto e Sotto Mayor,

 Petrogal, second phase; Secil and Cimentos de Maceira e

Pataias: Siderurgia Nacional;

possible choices in France and Spain.
The potential of the Portuguese market, where about 30 per cent of total output will be sold, weighed heavily in Pepsico's decision as did the development of transport networks and economic arguments that outweighed Portugal's disadvantages of being further away from the principal demand centres and the fact that the country has a less developed agricultural sector and less up-to-date distribution facilities.

"This is an integrated project from farmer to consumer, says Mr Cesar Bardaji, president and general manager of Pensico Inc in Portugal. "Our role starts on the farm, where we provide all the seed-potato technology that the farmer requires - irrigation, cultivation techniques and even storage requirements."
"At the outset we considered the possibilities of France, Spain and Portugal. The reason we decided on Portugal, in the end, was market conditions: it's a market that's

growing considerably and has

great potential.

TOTAL ASSETS (US\$ Million)

"Also, we knew that the local authorities were greatly interested in the investment and were prepared to grant the factors that exerted the greatest influence on the Portuguese government was the fact that the project provided a high level of employment and that it was an integrated agro-

The interest of the Portuguese government translated

into sizeable EC-funded investment grants that for contractual projects like the Pepsico enterprise can reach 50 per cent or more of the total

In a recent move to make contractual investment proects more accessible, the government has halved the minimum qualifying investment for the contractual regime from Es10bn to Es5bn. It is hoped that this will also enable some larger domestic companies to qualify.

Neste, the Finnish group, also recently reached agreement with the Portuguese government on a Es17bn project to make full use of the comparative advantages of the Sines Petrochemical complex. less than 100km south of Lisbon, where Neste already runs a petrochemical plant.

The contract envisages set ting up a Methyl Ter Butyl Ether plant with a production capacity of 45,000 tons a year. MTBE is a compound that

replaces lead in petrol, reducing pollution. The project also includes

increasing the production capacity of Neste's high-density polyethylene plant from 80,000 to 120,000 tons a year and enlarging and developing its polypropylene plant from 70,000 to 80,000 tons a year. The highly capital-intensive project will create only about

These major contractual investments get into the headlines. But it is small and medium-sized investments and joint ventures that make up the bulk of foreign investment in Portugal.

Even though both the Ford-Volkswagen project and the Pepsico investment were authorised in 1991 - Neste was the only contractual investment made in 1992 - and despite the international recession, direct foreign investment in Portugal last fell only to \$4.3bn from \$5.5bn the previ-

# We built our international network over seventeen years.

# Then created Portugal's leading financial group overnight.

When all the Portuguese banks were nationalised in 1975, our response was to bank elsewhere. First in Luxembourg. Then in Brazil. Followed by Switzerland, France and the United States.

Throughout the international expansion of the Espirito Santo Group however, we harboured an ambition: to return to Portugal and re-establish the Espírito Santo banking name where it all began in 1884.

We finally achieved this ambition in February 1992, with the reacquisition of Banco Espírito Santo. To our existing presence in private, corporate and investment banking. this acquisition added, overnight, real strength in retail and commercial banking.

In finalising the deal, we completed our range of financial services in Portugal: and complemented our services in the United Kingdom, Spain, Italy, Germany and the USA. Which puts the Espirito Santo Group in an even stronger position all round.

Both for Portuguese clients who want to expand abroad. And for international clients who want to take advantage of the fastest growing economy in Europe.

ESPIRITO SANTO FINANCIAL HOLDING S.A.

PORTUGAL UNITED KINGGON BELGIUN FRANCE LOXENBOURG SPAIN SWITZERLAND UNA BRAZIL ITALY GERMANY ANGOLA

In a country where liquid assets are known for maturing slowly, what would you expect from a bank that started only seven years ago?

since mid-86, we have enormous respect for the past. To a man our senior management team have impressive banking credentials. They all know the value of experience.

But their main focus is on the future. And on youth.

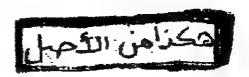

The average age in the bank is 30. Nearly a quarter of our staff are

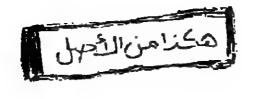

It's part of a unique corporate culture that has made us the fastest growing financial services group in Portugal. Made us one of the largest Portuguese commercial banks in terms of net income and shareholders' equity. And put us amongst Europe's Top 50 banks in terms of market valuation. More importantly, it's part of a long term strategy

by which we're determined not to maintain the position we've achieved in seven short years, but to

. We'll continue our programme of carefully planned market segmentation. We'll continue to maintain our commitment to quality service. And we'll continue to provide safe, stable growth by expanding our branch network and our client base. Bank on our success.

# A star of the small screen

Howard Stringer, president of CBS Broadcast Group, talks to Raymond Snoddy

York headquarters of CBS, has no shortage of the memorabilia you might expect to find sur-rounding the president of a US television network. There is a display of Emmy awards and a weighty bronze statue of a bronco rider, a gift from Burt Reynolds, star of the successful CBS sitcom Evening Shade.

But, as the Coronation mugs and Welsh national flag on his desk suggest, Stringer hardly fits the stereotype of a top American media executive. Born in Cardiff and educated at Oxford, he served with the US army in Vietnam before ris-

ing through the ranks of CBS.

More recently, the Welshman
has proved himself American television's most astute arbiter of taste, taking CBS's audience ratings from third to first place in the 1991-92 season - the first time any network has made such a jump in a single year. Its ratings supremacy was confirmed last week, with CBS completing the 1992-93 prime-time season with the highest overall ratings, while increas-ing its number of nights with top ratings from two to four.

Two years ago NBC said that in two years there would be only two networks and that CBS would be the one that would go away," says Stringer with an understandable sense of satisfaction. It is now NBC that is mired in third place.

As president of the CBS Broadcast Group, Stringer is in charge of all the company's broadcasting operations, a \$3.5bn-a-year business which includes the CBS network as well as wholly owned television and radio stations.

But although he is the boss of a leading US corporation Stringer is just as likely to be wooing the stars of rival networks as he is to be studying balance sheets. In January. after a long courtship, the CBS president lured away NBC's David Letterman, the popular late-night chat show host, in a deal believed to be worth more

than \$40m. Programming victories such as this are starting to translate into profits. Last year CBS had pre-tax profits of \$227m with only \$14m coming from the network, \$170m from CBS television stations and \$21m from radio. This year Ms Jessica Reif, media analyst at Oppenheim, the stockbrokers, is forecasting group pre-tax profits of ming - he walked into the cen-

he chorus of demands that something more

the war in Bosnia is becoming

leadership in a crisis, Amer

interminable horror of

oward Stringer's office in Black Rock, the New \$388.7m of which \$170m will come from the network. This is despite the disappointing ratings for the network's sports programming - an area in which CBS has been criticised

for overspending. The genial Stringer, 51, ha pace. At 30, when he was a CBS television researcher, he was given the opportunity to produce programmes, and the result was four prize-winning news documentaries.

His next big challenge was in 1981 when he was became producer of the CBS Evening News the network's main evening news programme, which had slipped into third place, behind NBC and ABC. Within two years he had taken the programme to number one, partly by resisting the trend towards short news stories. It has since fallen back into sec-

Stringer rose through the CBS ranks during the 1980s, changing jobs every two years as those above him - many brought in from outside the organisation - were fired.

I had relationships and a sense of loyalty to the organisation that kept me from being fired," he says, although he concedes he came close to being sacked when CBS was acquired by Mr Larry Tisch's Loews Corporation in 1986.

It was a time of rapid change and Stringer was not only one of the old guard but as executive vice-president of CBS News he was in charge of one of the big spending depart-Tisch on a train journey from New York to Washington he saw it as a make-or-break occasion. Tisch promptly fell asleep, which could have cost Stringer his one chance to get to know the new CBS owner. But Tisch woke up in time to talk, found he liked his employee and made him presi-

dent of the news operation. Then I had to preside over the largest lay-offs in our history," Stringer laments. "The company was in third place, the network was in third place and news division was losing \$50m-\$60m a year."

In response, he came up with

new programme ideas which, together with spending cuts, started to turn things round. Stringer was happy as head of the news operation. But in 1988, at the annual convention of CBS's affiliates - stations which take network program-

'There is no place for autocrats in the 1990s'

tre of a bitter attack on net-work executives. The affiliates were in open rebellion over CBS's dismal ratings.

"For some reason I was the only one who decided to speak. I took on everything and everyone," recalls Stringer. Two months later he was head of all of CBS with a brief to take the network out of bottom position. The challenge was not only to increase ratings but do it while cutting costs. In his

first year, he cut \$250m from the budget and had to push ahead with another round of

How Stringer came to the CBS network in the first place is as remarkable as how he came to run it. Born in Cardiff, he won an assisted place at Oundle, the English public school and went on to Merton College. Oxford, to read

He was drawn to America by images of President Kennedy and his "new frontier" and a belief that England by comparison was a stuffy place. But soon after persuading CBS to give him a clerk's job logging viewers comments, he was

drafted into the army. "For three weeks I had a dilemma. Do I join the army? Do I flee the draft? It was just stubbornness...I couldn't get on that plane to get out of the

sion bombing in wooded moun-

tain country can take out enough artillery pieces, which are small and mobile, to make

a serious military difference. It

is even less likely that it could

stop the Serbs on the ground,

let alone make them sign up

for the Vance-Owen plan, and

then surrender the vast excess

territory they have conquered.

Moreover, western leaders would be then hooked on the

undeclared logic of military

intervention. They would have denied that they were going to put troops into Bosnia; but

since bombing by itself must

fail, they would then face a

painful choice between going

back ignominiously, or going on to the next stage, which is

to put fighting troops on the

ground. It would be better if they spelt this out in advance.

Safe havens: Some people argue for a purely defensive

intervention, to create a safe

haven for the Moslems. This

might be militarily feasible,

with a few thousand troops, in

limited areas such Sarajevo.

But if the safe haven were easy

to set up, because it was lim-

ited to the Moslem heartland,

it would in practice define the

future frontiers of a new mini-

mal Moslem state, which

would be much more restricted

than anything in the Vance-

Owen plan. If it were less lim-

ited, it would mean fighting

the Serbs and Croats. We have

no reason to suppose that

other outsiders would not then

pile in on the side of the Serbs,

ostensibly for equally "defen-

sive" purposes.

Slippery slopes of Bosnia

country," says Stringer, who returned from two years in Vietnam as a sergeant with an army commendation medal. The experience, he says, has given him a certain perspective on the corporate hand-to-hand combat of network television.

He has pursued a dual strategy. As CBS president, his first aim was to encourage stability and collaboration after the years of turmoil. He made cer-tain all eight CBS divisions worked closely with one another, and that the corporate headquarters in New York and the entertainment headquarters in Los Angeles had a strong, open relationship. He also installed good communicators in senior positions. "What-ever you could do in the 1980s, there is no place for autocrats in the 1990s," Stringer says. in a more stable atmosphere he set about rebuilding his net-

work's performance by concentrating on winning individual programme slots one at a time. On Monday nights, he brought in a hit programme called Murphy Brown, a sharp-edged com-edy starring Candica Bergen, edy starring Candice Bergen, and used it as a lead-in to promote the rest of the schedule. On Tuesday nights he began showing popular films aimed

at a younger audience. "It's really a question of consistently slamming home building blocks over four years and when something doesn't work ditching it fast," he explains.

Yet the battle for ratings among the four American networks - CBS, ABC, NBC and Rupert Murdoch's Fox Television - is only one part of the challenge facing Stringer and his counterparts in broadcast television. The proliferation of rival cable and satellite channels - there are expected to be as many as 500 within the next few years - threatens to erode further the networks' audience share, which has declined by a third in the past 15 years to

at arm's length for our own

safety, yet have the impact on the war that can only come

from going in on the ground.

There is no safety net between

limited intervention at the

start and total intervention at

the end. This logic cannot be

finessed, and the politicians

talking about a military inter-

vention without devising, in

advance, a political strategy to

go with it. The seductive lure of the arm-the-Moslems option

is that it appears to exonerate

us from responsibility, though

of course it could not protect

us from the consequences of such an incendiary policy. But

any of the interventionist

options, however small at the

start, must end inexorably

with the sending of troops.

I am not against sending

troops. But what will they be

The answer is, unfortu

nately, self-evident: it can only

be to impose a settlement on

the whole of Bosnia, with or without the benefit of a peace

plan. There is no point starting

down the road of military

intervention unless the objec-

tive is a comprehensive politi-

cal strategy. That means that

governments must be pre-

pared, in advance, to send very

us the pretence that their new

policy will be safe and moral.

large numbers of troops.

sent to do?

Second, there is no sense in

must not pretend that it can.

just over 60 per cent. Stringer, however, is relatively optimistic about the

future. Technology may create excitement but the networks, he believes, will continue to create the bulk of original programming. On one recent Thursday evening between 9pm and 10pm, Stringer notes, the four networks got 90 per cent of the available audience. The total network share of viewing, he says, increased marginally last year from 62 per cant to 63 per cent and he believes the 60 per cent line

Stringer has signed up for another four years at CBS at more than \$1m a year, but after that he may return to the UK. Last year he was sounded out for the chief executive's job at ITV but he was not interested. If he was offered the director-general's job at the BBC, it might be a different matter. "I wouldn't rule it out. But by then I'll be too old and probably seen as too Ameri-

Clintonomics n the first 100 days of Mr Bill Clinton's presidency the nation has heard little of the "people-based" eco-nomics that figured so prominently in campaign speeches. You will recall the argument. In tomorrow's competitive

global economy everything will

be mobile except labour. The

relative performance of nations

will thus depend mainly on the

about investment in people

when he unveiled his economic

plan in February, but the ensu-

ing debate focused mainly on

the merits (or otherwise) of his deficit-cutting proposals.

Attention then switched to the

short-term fiscal stimulus,

finally defeated last week by

Senate Republicans. The social issue monopolising everybody's attention has been

healthcare. Mrs Hillary Rod-

ham Clinton has a 500-strong army of technicians working

like slaves to produce a health

plan sometime next month;

hardly anybody is steamed up

about vocational training or

This crucial element of Clin-

tonomics has been delegated to

Messrs Richard Riley and Rob-

ert Reich, respectively educa-

tion and labour secretaries.

Stiff and somewhat inarticu-

late in public, Mr Riley hardly

conveys a dynamic image. But the tenacity with which he

pursued educational reforms

while governor of South Caro-

lina has apparently earned Mr Clinton's lasting respect. Mr

Reich, one of the original FOBs

(Friends of Bill) and former

professor at Harvard's Kennedy School of Government,

does have the capacity to sell new ideas. But whether either

man will actually have much

In a newspaper column a

couple of years ago, Mr Reich attacked fellow Democrats for

proposing only "tiny, symbolic

shifts" in Republican spending

priorities. Preparing the work-

force for the 21st century, he

claimed, was a mammoth task

requiring an additional public

investment of \$200bn a year. It

could be carried through only

on AMERICA

A dash of real

a warrior like General Norman Schwarzkopf," the Gulf war hero. Well, General Reich is now in command, but unfortunately his president is proposing only a tiny, symbolic increase in spending - about \$10bn a year for all educational and training reforms.

This is fortunate because correcting flaws in US education and training mainly requires a change of attitudes and behaviour rather than masses of extra cash. In real terms per capita spending on schools has risen more than a third in the past decade. US companies spend about as much on training as their counterparts abroad. So what do Riley and Reich hope to achieve with the limited sums?

They set out their philosophy last week in a joint press conference. For a British journalist there was a strong sense of dėja vu. In effect, the administration is adopting large chunks of the Thatcher reforms of the late 1980s. Building on the work of the Bush administration, Mr Riley is creating a national council to oversee the introduction of new curriculum standards and sment techniques. As in the UK, the aim is to establish greater central control over what is taught in schools and to devise tests that effectively monitor the performance of both students and schools.

Mr Reich, meanwhile, is creating a national council (composed of businessmen, educators and trade unionists) to oversee a new system of vocational qualifications along European lines. Nearly a decade after Britain, the US is waking up to the fact that its

educational system is geared almost exclusively to the needs of the minority who gain university degrees. As in the UK each stage of education is essentially a preparation for more advanced education, rather than for life or work. Little or nothing is done to ease the transition from school to work for non-academic youngsters; there is no system of nationally-recognised credentials for non-graduates.

Economic tightens

State Comment

Age 37.45.

Both moves could provide substantial long-run benefits. But the Clinton reforms differ from Britain's in crucial ways. In the first place everything is voluntary. On the school side this was unavoidable because the US constitution gives states primary responsibility for education. With federal spending accounting for only about 6 per cent of school budgets, Washington is like a flea trying to discipline an elephant. At best it can hope to influence states by cleverly deploying the small carrots and sticks at its disposal. The success of new vocational qualifications, meanwhile, will largely depend on support from private business - which is by no means assured.

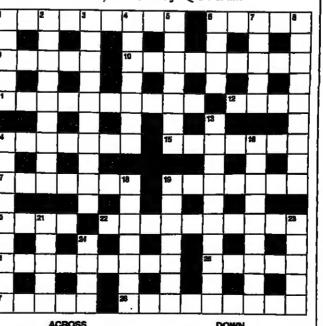

The other big difference is that the administration is putting no emphasis on increased competition between schools. Many reform-minded Demo-crats believe that schools should be able to opt out of the often stifling bureaucracy of local school districts (the US equivalent of local education authorities) and receive funding directly from state governments. Mr Clinton is not throwing his weight behind the idea partly because of opposi-tion from the teachers' unions, big contributors to the Demo-

Whether more "choice" would greatly improve educational quality is as hotly debated in the US as in Britain. But it is plausible to argue that a freeing-up of any long-established system will offer potential benefits. At the moment, the "people-based" economics that supposedly lies at the heart of Mr Clinton's strategy is looking decidedly tame.
